Damals kam Tina mit ihren beiden kleinen Töchtern Sam und Nicky plötzlich von der Straße ab. Der Wagen überschlug sich, aber niemand wurde ernstlich verletzt. Vater Craig gab Tina die Schuld, die oft zu viel trank. Nach diesem Ereignis blieb Sam beim Vater, Nicky zog zur Mutter. Als erwachsene Frauen leben Nicky und Samantha ganz unterschiedliche Leben. Aber zwischen Partnerschaft und Karriere, Mutterschaft und Kinderlosigkeit lässt sie die Erinnerung an damals nicht los. Was ist wirklich geschehen? Um das herauszufinden und nicht dieselben Fehler wie ihre Eltern zu begehen, müssen die Schwestern das schier Unmögliche tun: das Ungesagte aussprechen, die eigene Geschichte neu zusammensetzen.

Introductory Statistics Jun 09 2020 Introductory Statistics, Fourth Edition, reviews statistical concepts and techniques in a manner that will teach students not only how and when to utilize the statistical procedures developed, but also how to understand why these procedures should be used. The text's main merits are the clarity of presentation, contemporary examples and applications from diverse areas, an explanation of intuition, and the ideas behind the statistical methods. Concepts are motivated, illustrated, and explained in a way that attempts to increase one's intuition. To quote from the preface, it is only when a student develops a feel or intuition for statistics that she or he is really on the path toward making sense of data. Ross achieves this goal through a coherent mix of mathematical analysis, intuitive discussions, and examples. Applications and examples refer to real-world issues, such as gun control, stock price models, health issues, driving age limits, school admission ages, use of helmets, sports, scientific fraud, and many others. Examples relating to data mining techniques using the number of Google queries or Twitter tweets are also considered. For this fourth edition, new topical coverage includes sections on Pareto distribution and the 80-20 rule, Benford's law, added material on odds and joint distributions and correlation, logistic regression, A-B testing, and more modern (big data) examples and exercises. Includes new section on Pareto distribution and the 80-20 rule, Benford's law, odds, joint distribution and correlation, logistic regression, A-B testing, and examples from the world of analytics and big data Comprehensive edition that includes the most commonly used statistical software packages (SAS, SPSS, Minitab), ISM,

SSM, and an online graphing calculator manual Presents a unique, historical perspective, profiling prominent statisticians and historical events to motivate learning by including interest and context Provides exercises and examples that help guide the student towards independent learning using real issues and real data, e.g. stock price models, health issues, gender issues, sports, and scientific fraud

The Human Brand Jan 05 2020 Why we choose companies and brands in the same way that we unconsciously perceive, judge, and behave toward one another People everywhere describe their relationships with brands in a deeply personal way—we hate our banks, love our smartphones, and think the cable company is out to get us. What's actually going on in our brains when we make these judgments? Through original research, customer loyalty expert Chris Malone and top social psychologist Susan Fiske discovered that our perceptions arise from spontaneous judgments on warmth and competence, the same two factors that also determine our impressions of people. We see companies and brands the same way we automatically perceive, judge, and behave toward one another. As a result, to achieve sustained success, companies must forge genuine relationships with customers. And as customers, we have a right to expect relational accountability from the companies and brands we support. Applies the social psychology concepts of "warmth" (what intentions others have toward us) and "competence" (how capable they are of carrying out those intentions) to the way we perceive and relate to companies and brands Features in-depth analyses of companies such as Hershey's, Domino's, Lululemon, Zappos, Amazon, Chobani, Sprint, and more Draws from original research, evaluating over 45 companies over the course of 10 separate studies The Human Brand is essential reading for understanding how and why we make the choices we do, as well as what it takes for companies and brands to earn and keep our loyalty in the digital age.

Lemon-Aid New Cars and Trucks 2012 Dec 28 2021 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. The Safety Promise and Challenge of Automotive Electronics Jul 03 2022 "TRB has released the final version of TRB Special Report 308: The Safety Promise and Challenge of Automotive Electronics: Insights from Unintended Acceleration, which examines how the National Highway Traffic Safety Administration (NHTSA) regulatory, research, and defect investigation programs can be strengthened to meet the safety assurance and oversight challenges arising from the expanding functionality and use of automotive electronics. The report gives particular attention to the NHTSA response to consumer complaints of vehicles accelerating unintentionally and to concerns that faulty electronic systems may have been to blame. The committee that produced the report found that the increasingly capable and complex electronics systems being added to automobiles present many opportunities for making driving safer but also present new demands for ensuring their safe performance. These safety assurance demands pertain both to the automotive industry development and deployment of electronics systems and to the safety oversight role of NHTSA. With regard to the latter, the committee recommends that NHTSA give explicit consideration to the oversight challenges arising from automotive electronics and that the agency develop and articulate a long term strategy for meeting these challenges."--Provided by publisher.

Business Ethics May 01 2022 Business Ethics provides a thorough review and analysis of business ethics issues using several learning tools: Strategic Stakeholder Management as the Theme: All chapters use a strategic stakeholder approach as a unifying theme. The text is thus the first text that adopts this approach. Most business ethics scholars and practitioners agree that successful ethical companies are the ones that can strategically balance the needs of their various stakeholders. By adopting this approach, students will be able to see how the various aspects of business ethics are connected. Theory-based and Application-based: All chapters have important applicable theories integrated with discussion of how such theories apply in practice. Unlike other texts that are either too theoretical or too practical, this text provides the appropriate blend of theory and practice to provide deeper insights into the concepts covered in the chapter. Global Perspective: Unless most other texts, this text provides a global perspective on business ethics. Most chapters include material pertaining to ethics in global contexts. Included are cases about companies in a wide range of countries including Japan, U.K., China and India among many others. Cases: The text contains over 30 real world global cases. Each chapter ends with a short two page case as well as a longer case that varies in length. Each has discussions questions at the end. Finally each of the four parts ends with a Comprehensive Case; proven teaching cases from The Ivey School and other sources.
