Earth: The Operators' Manual Oct 02 2022 The book—companion to a PBS series—that proves humans are causing global warming and offers a path to the future. Since the discovery of fire, humans have been energy users and always will be. And this is a good thing—our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet. However, this mastery comes with a price: we are changing our environment in a profoundly negative way by heating it up. Using one engaging story after another, coupled with accessible scientific facts, world authority Richard B. Alley explores the fascinating history of energy use by humans over the centuries, gives a doubt-destroying proof that already-high levels of carbon dioxide are causing damaging global warming, and surveys the alternative energy options that are available to exploit right now. These new energy sources might well be the engines for economic growth in the twenty-first century.

The Leave-No-Crumbs Camping Cookbook Oct 29 2019 Imagine this: You're at a campsite 10,000 feet up in the Third Mono Creek Recess of the high Sierras. You have no refrigerator, no food processor, no non-stick cookware, no measuring spoons, no pepper mill, no sea salt. How are you going to cook a meal that is imaginative, delightful, and delicious? That's what *The Leave-No-Crumbs Camping Cookbook* is all about. Rick Greenspan and Hal Kahn show anyone who loves the outdoors how to make homemade pizza, braid challah, wrap poached trout in a sushi roll, and even make dumplings for Chinese dim sum at their campsite. Campers who have never cooked anything more complicated than s'mores might feel uncertain about tackling chocolate mousse in the wild, but Greenspan and Kahn have three decades of experience teaching camp-out cooking. "We've taught people who could barely boil water," they say. And they are reassuring about trailside mishaps. If your grilled trout falls into the fire, take it out, brush off the ash, and rename the dish Cajun Blackened Trout. If the eggs break in their plastic container, make a dinner of crêpes, huevos rancheros, and a cake. "The point of wilderness cooking is to have fun," say Greenspan and Kahn, "not worry if the Académie Française is looking over your shoulder." You'll find recipes for soups and stews; fruit, vegetable, and tofu dishes; pilafs, risottos, and polenta; pasta, noodles, and dumplings; sauces and schmeers (that's Yiddish for spreads); pancakes, crêpes, and soufflés; pizza and quiche. An entire chapter is devoted to trout, and the book even includes a recipe for chocolate cake. There are instructions and tips for all sorts of cooking techniques, including dehydrating, baking in coals or on a camping stove, grilling, frying, and steaming. And several pages are devoted to trip planning: how much food to bring, what to look for in a camp stove, how long you can expect your cooking fuel to last. This book is perfect for car campers, backpackers, bikers, canoeists, tail-gaters, and day picnickers who want good food to be part of the outdoor experience

Australien Nov 03 2022 Neben ihrem Reiseführer zu Nationalparks und Naturschutzgebieten Australiens (zuletzt BA 3/03) haben die Autoren ihr Handbuch zu Touren im Outback aktualisiert und erweitert (zuletzt BA 5/96). Das erste Viertel des Buches behandelt Überlegungen zu Route, Jahreszeit, Ausrüstung, AllradFahrtechnik, Verhalten im Notfall und bei Buschfeuern u.a.m. Der Hauptteil besteht aus 23 Streckenbeschreibungen mit sehr detaillierten KmAngaben, Reisezeiten, Benzin und Wasserstationen, Telefonnummern, Funkfrequenzen, lohnenden Nebenrouten und manchmal etwas undeutlichen Kartenskizzen. Kurze, eingestreute Artikel informieren über Entdecker, Ureinwohner, Fauna, Flora und Geschichten entlang der Pisten. Deep Excavations in Soil Jun 05 2020 The book describes the theory and current practices for design of earth lateral support for deep excavations in soil. It addresses basic principles of soil mechanics and explains how these principles are embodied in design methods including hand calculations. It then introduces the use of numerical methods including the fundamental “beam on springs” models, and then more sophisticated computer programmes which can model soil as a continuum in two or three dimensions. Constitutive relationships are

introduced that are in use for representing the behaviour of soil including a strain hardening model, and a Cam Clay model including groundwater flow and coupled consolidation. These methods are illustrated by reference to practical applications and case histories from the author's direct experience, and some of the pitfalls that can occur are discussed. Theory and design are strongly tied to construction practice, with emphasis on monitoring the retaining structures and movement of surrounding ground and structures, in the context of safety and the Observational Method. Examples are presented for conventional "Bottom-up" and "Top-down" sequences, along with hybrid sequences giving tips on how to optimise the design and effect economies of cost and time for construction. It is written for practising geotechnical, civil and structural engineers, and especially for senior and MSc students.

Secrets of Aboriginal Healing Jan 13 2021 A guide to the 60,000-year-old healing system of the Aborigines revealed through one man's journey to overcome multiple sclerosis • Written at the request of the Aboriginal people the author stayed with • Explores the use of dreamtime, spirit guides, and telepathy to discover and reprogram the subconscious motivations, thought patterns, and beliefs behind illness • Reveals how to tap in to healing support through the body/mind/spirit connection • Nautilus Silver Medal Winner and ForeWord Reviews Book of the Year Finalist In 1983 award-winning physicist Gary Holz was diagnosed with chronic progressive multiple sclerosis. By 1988 he was a quadriplegic. Then, in 1994, his doctors told him he had two years to live. Desperate and depressed, he followed a synchronistic suggestion and went to Australia to live with a remote Aboriginal tribe. Arriving in a wheelchair, alone, with almost no feeling left from the neck down, Holz embarked on a remarkable healing transformation of body, mind, and spirit and discovered his own gift for healing others. Written at the request of the Aboriginal healers Holz worked with, this book reveals the beliefs and principles of the 60,000-year-old healing system of the Aborigines of Australia, the world's oldest continuous culture. Chronicling the step-by-step process that led to his miraculous recovery, he explains the role played by thought in the creation of health or disease and details the five essential steps in the Aboriginal healing process. He explores the use of dreamtime, spirit guides, and telepathy to discover and reprogram the subconscious motivations behind illness--a process that enacts healing at the cellular and the soul level, where the root of physical illness is found. Supported by modern science, including quantum physics, Aboriginal medicine enables each of us to tap in to healing support through the power of the body/mind/spirit connection.

Australien Jun 17 2021 Für Selbstfahrer mit dem Touch von Abenteuer und vor allem für Geländewagenfahrer bietet sich dieser Reiseführer zu den Outback-Gebieten Australiens an (1. Auflage: BA 6/03). Das bekannte Autorenpaar hat 25 Strecken logbuchartig, aber genau beschrieben, und auch noch mit zusätzlichen Informationen über Mythen und Sagen einzelner Sehenswürdigkeiten versehen. Dafür sind Unterkunft, Läden und Restaurantadressen sehr knapp gehalten. Aber man kann davon ausgehen, dass diese Touren auch ohne zusätzlichen

Führer nachvollziehbar sind, zusätzlich gibt es kurze eingestreute Artikel über Land und Leute und Besonderheiten neben den Strecken sowie kleinformative, aber gute Bilder von Tierwelt und Landschaft des Outback. Für die Reiseplanung findet sich am Anfang ausführliches Material über Ausrüstung, Fahrtechnik und Verhalten im Notfall. Ausführlicher als E. Gillissen aus demselben Verlag (BA 12/04) und stärker auf die Zielgruppe der Selbstfahrer ausgerichtet als R. Dusik (Richtig reisen; BA 8/05), die alte Auflage sollte ersetzt werden. (2)
