[Science and Civilisation in China, Part 1, Paper and Printing May 01 2022](#) Part one of the fifth volume of Joseph Needham's great enterprise is written by one of the project's collaborators. Professor Tsien Tsuen-Hsuei, working in regular consultation with Dr Needham, has written the most comprehensive account of every aspect of paper and printing in China to be published in the West. From a close study of the vast mass of source material, Professor Tsien brings order and illumination to an area of technology which has been of profound importance in the spread of civilisation. The main body of the book is a detailed study of the invention, technology and aesthetic development of printing in China. From the growth and ultimate refinements of early woodcut printing to the spread of printing from movable type and the development of book-binding, Professor Tsien carries the story forward to the beginning of the nineteenth century when 'more printed pages existed in Chinese than in all other languages put together'.

Communicating in Science Jul 31 2019 Writing scientific papers and giving talks at meetings and conferences are essential parts of research scientists' work, and this short, straightforwardly written book will help workers in all scientific disciplines to present their results effectively. The first chapter is about writing a scientific paper and is a revision of a prize-winning essay. Later chapters discuss the preparation of typescripts, speaking at meetings and writing theses. There are also chapters addressed particularly to those scientists to whom English is a foreign language and to those in North America. The last chapter gives information about dictionaries, style books and other literature. The book draws on the author's wealth of experience in presenting his own work and in editing the work of others, and he draws his examples from a range of subjects.

Style and Ethics of Communication in Science and Engineering Feb 15 2021 Scientists and engineers seek to discover and disseminate knowledge so that it can be used to improve the human condition. Style and Ethics of Communication in Science and Engineering serves as a valuable aid in this pursuit-it can be used as a textbook for undergraduate or graduate courses on technical communication and ethics, a reference book for senior design courses, or a handbook for young investigators and beginning faculty members. In addition to presenting methods for writing clearly and concisely and improving oral presentations, this compact book provides practical guidelines for preparing theses, dissertations, journal papers for publication, and proposals for research funding. Issues of authorship, peer review, plagiarism, recordkeeping, and copyright are addressed in detail, and case studies of research misconduct are presented to highlight the need for proactive attention to scientific integrity. Ample exercises cause the reader to stop and think. Style and Ethics of Communication in Science and Engineering thus motivates the reader to develop an effective, individual style of communication and a personal commitment to integrity, each of which are essential to success in the workplace. Table of Contents: Motivation / Writing Well / Scientific Publications / Proposals and Grant Applications / Oral Communication / Authorship / Recordkeeping / Ownership of Ideas, Data, and Publications
