Environmental Solutions Dec 27 2019 In our changing world, society demands more comprehensive and thoughtful solutions from environmental engineers, environmental consultants and scientists dealing with the degradation of our environment. Lead by Nelson Nemerow and Franklin Agardy, experts in business, academia, government and practice have been brought together in Environmental Solutions to provide guidance for these environmental professionals. The reader is presented with a variety of solutions to common and not so common environmental problems which lay the groundwork for environmental advocates to decide which solutions will work best for their particular circumstances. This book discusses chemical, biological, physical, forensic, medical, international, economic, political, industrial-collaborative solutions and solutions for rural and developing countries giving readers the freedom to evaluate a variety of options and make informed decisions. End of chapter questions and additional resources are included making this an invaluable teaching tool and ideal reference for those currently involved in improving and preserving our environment. Contributions by international experts in government, industry, and academia. Editors are recognized as the editors of Environmental Engineering, the best selling title published by John Wiley. The first action-oriented book for environmental engineers.

**Romani Liberation** Feb 27 2020 Centered on the trajectory of the emancipation of Roma people in Scandinavia, Romani Liberation is a powerful challenge to the stereotype describing Romani as passive and incapable of responsibility and agency. The author also criticizes benevolent but paternalistic attitudes that center on Romani victimhood. The first part of the book offers a comprehensive overview of the chronological phases of Romani emancipation in Sweden and other countries. Underscoring the significance of Roma activism in this process, Jan Selling profiles sixty Romani activists and protagonists, including numerous original photos. The narrative is followed by an analysis of the concepts of historical justice and of the process of decolonizing Romani Studies. Selling highlights the impact of the historical contexts that have enabled or impeded the success of the struggles against discrimination and for equal rights, emphasizing Romani activism as a precondition for liberation. The particular Swedish framework is accentuated by a stimulating preface by the international activist Nicoleta Bitu, and afterwords by two prominent Romani advocates, the politician Soraya Post and the singer, author, and elder Hans Caldaras.

**COVID Curveball** Mar 30 2020 A riveting inside account of the most unforgettable season in Los Angeles Dodgers history, from the COVID-delayed start through the incredible playoff run, by the broadcaster who saw it all. As America's Pastime reeled from a global pandemic, the LA Dodgers rallied to win arguably the most difficult baseball season ever played. Amid strict new rules and Coronavirus outbreaks on other teams that wreaked havoc on the schedule, the Dodgers maintained a laser focus as a team and organization, and ultimately, won the first bubbled playoffs in the history of Major League Baseball. In COVID Curveball, author and Dodgers' broadcaster Tim Neverett takes us through this unprecedented season, offering exclusive access and firsthand, edge-of-your-seat, play-by-play coverage of the surreal days and weeks that led up to the dramatic championship climax. It's a highly entertaining, often humorous chronicle of the quirky nature of the season, the goings-on behind the scenes at the stadium and MLB at large, as well as the unique chemistry forged in the diverse and dynamic clubhouse. Along with insights into the potent lineup that produced jaw-dropping moments by Mookie Betts, Corey Seager, Justin Turner, Max Muncy, and Cody Bellinger, the book also celebrates the incredible achievements of Clayton Kershaw that cemented his Hall-of-Fame legacy, and the remarkable job done by Dave Roberts and the Dodgers' executives and ownership. Highlighted by empty stands, remote broadcasts, and relentless testing, 2020 was perhaps the strangest baseball season ever...but it produced the most savored World Series celebration in the history of the game. Includes an in-depth foreword by Dodgers' legend Orel Hershiser.

**The Price of Everything** Nov 06 2020 Why is a life saved from a terrorist attack felt to be worth two saved from a natural disaster? Why are men more valuable than women? Why do Americans tip when Europeans don't? And how can orange juice be used to predict the weather? The Price of Everything starts with a simple idea: behind every decision we make lies a price, whether that's buying a cup of coffee, taking a new job, or deciding to become a parent. Prices are the invisible thread that connect and explain our society, our economy, our culture, our mistakes and our successes. Revealing connections that are ingenious and unexpected, Eduardo Porter shows just how fundamental the price of things, work, happiness, faith, family and the future are - both to our everyday behaviour and to civilisation as we know it.

**What's Wrong with the Poor?** Dec 07 2020 In the 1960s, policymakers and mental health experts joined forces to participate in President Lyndon Johnson's War on Poverty. In her insightful interdisciplinary history, physician and historian Mical Raz examines the interplay between psychiatric theory and social policy throughout that decade, ending with President Richard Nixon's 1971 veto of a bill that would have provided universal day care. She shows that this cooperation between mental health professionals and policymakers was based on an understanding of what poor men, women, and children lacked. This perception was rooted in psychiatric theories of deprivation focused on two overlapping sections of American society: the poor had less, and African Americans, disproportionately represented among America's poor, were seen as having practically nothing. Raz analyzes the political and cultural context that led child mental health experts, educators, and policymakers to embrace this deprivation-based theory and its translation into liberal social policy. Deprivation theory, she shows, continues to haunt social policy today, profoundly shaping how both health professionals and educators view children from low-income and culturally and linguistically diverse homes.
