Jeep 4.0 Engines Sep 24 2021 The venerable Jeep 4.0-liter inline-six engine has powered millions of Jeeps, including CJs, YJs, Wranglers, Cherokees, and Wagoneers. The 4.0 delivers adequate horsepower from the factory, but many off-road drivers want more horsepower and torque to conquer challenging terrain, which means these engines are often built and modified. The Jeep 4.0, or 242-ci, is affordable, abundant, exceptionally durable, and many consider it one of the best 4x4 off-road engines. In this Workbench title, veteran author and Chrysler/Jeep engine expert Larry Shepard covers the rebuild of an entire engine in exceptional detail. He also delves into popular high-performance modifications and build-ups. Step-by-step photos and captions cover each crucial step of the engine disassembly. He shows the inspection of all critical parts, including block, heads, rotating assembly, intake, and exhaust. Critical machining processes are covered, such as decking the block, line boring, and overboring the block. The book provides exceptional detail during the step-by-step assembly so your engine is strong and reliable. Installing a larger-displacement rotating assembly or stroker package is one of the most cost-effective ways to increase performance, and the author covers a stroker package installation in detail. With millions of Jeep 4.0 engines in the marketplace (which are subjected to extreme use), many of these engines require a rebuild. In addition, many owners want to extract more

The Lineback To My Beginning May 21 2021

Walt was born in Nelsonville, a small town in southeastern Ohio, whose population has been around 5,000 for the last hundred years. In this book he tells us about many extraordinary events that he survived from the age of three to eighteen while growing up in Nelsonville. Like the time he almost drowned in the creek below their home on 969 Pleasant View Avenue. Or taking rabies shots when their pet dogs got rabies from a pack of wild dogs that roamed the hills on the other side of the valley. Or surviving car wrecks when the cars were totaled and there were no seat belts then. He graduated from NHS in 1960 in a class of 56, so you knew everyone and everyone knew you and your business. You didn't do anything without the whole town finding out very quickly what happened. So, when he broke the taillight in his Dad's car, Dad knew about it before he got home. Or, when he drove that same car and took his girl friend all the way to Columbus to the Kahiki Supper Club for dinner one time, and, ruined his older brother's white sport coat and Tanya's new dress when an orange fountain exploded while they waited in the Kahiki's crowded lobby, somehow people knew about the incident by the

time they got back to Nelsonville. They quickly told a story to their friends first, then their parents, that some kid sprayed orange soda all over them at the high school dance that evening. And the best part of that adventure was, that the dinner was free if they didn't take the free dry cleaning offer from the Kahiki. That is the way small towns were back then. Walt went on to work his way through Ohio University and eventually earned three degrees from there and a Master's Degree from the University of Dayton in 1980. Walt's adventures after finishing High School in 1960, like Ohio University, the party school, Western Electric in Columbus, and the Army and Vietnam, are in his next book, *The Second Eighteen Plus*.
