Peace Movements and Pacifism After September 11 Jun 17 2021 The book is a major contribution to our understanding of peace movements and pacifism after 11 September. While most people tend to take the importance of 11 September for granted, the book challenges the general understanding of the development and implications of the events. . . In addition, the philosophical, religious and theoretical discussion enriches peace research scholarship. Jian Yang, New Zealand International Review Noted international scholars from a range of disciplines present in this book Japanese and East Asian perspectives on the changed prospects for international peace post September 11. Because East Asia has not been preoccupied with the ongoing conflicts in the Middle East, the authors views serve as a balance to the war on terror declared in the United States. The book begins with chapters that explore the attacks from an historical perspective, and discuss whether they were indeed watershed events that changed the world. Further chapters explore pacifism in philosophy and religion through Kant, Christianity, Islam and constitutional pacifism in postwar Japan. The concluding chapters discuss

concrete ways to move toward peace in the twenty-first century. Scholars of international studies and politics, the Middle East and religion will find this insightful book a valuable addition to their library.

The Answers Are There Dec 12 2020 A New Architecture for Peace Our world desperately needs new ways to support community transformation. In *The Answers Are There*, Libby Hoffman shows us what is possible when outside aid animates, rather than obstructs, local leadership and recognizes and honors community wisdom, priorities, and resources. This book shares stories of individual and communal transformation in Sierra Leone, where the culture of community was nearly destroyed by civil war. But the unique approach of Fambul Tok (family talk)—anchoring reconciliation in indigenous traditions of communal truth-telling, apology, and forgiveness—restored that culture and unleashed a powerful resource for national healing. Fambul Tok's core conviction—that ordinary people have the creativity, capacity, and determination to transform their communities according to their own needs and desires—changed a country, and with it, international peace and development. Hoffman shares her learning journey as a peacebuilder and as Fambul Tok's co-founder, funder, and program partner. Her diligent, compassionate reflection on tending to community, to systemic failures, and to her own heart invites readers into "building peace from the inside out." *The Answers Are There* masterfully blends lived experience, thought leadership, and actionable techniques, inspiring and equipping readers to grow whole, healthy systems in the world.

More than Fighting for Peace? Sep 08 2020 This book provides a contemporary account of the linkages between the academic field of conflict resolution and the practice of military peacekeeping, through the lens of pre-deployment training for military personnel about to embark on UN peacekeeping operations. Military personnel serving on United Nations peacekeeping operations are deployed into highly challenging post-conflict environments, where the likelihood of violence remains high. Moreover, these personnel are deployed part of a wider peace process, and are thus situated as an anchor point in a transition from war to peace. This dimension of their work therefore means that a range of skills and techniques are relied upon, which come not from traditional military training, but from other, non-traditional fields. It is into this gap where the academic field of conflict resolution has made a valuable contribution to understanding international peacekeeping. Since the 1970's, studies have sought to understand international peacekeeping as a necessary stage in conflict de-escalation, and ultimately transformation. From this, there is a history of engagement including studies which seek to understand the skills peacekeepers may need to assist them in their day to day activities, and the role that international peacekeeping plays in wider projects of conflict transformation.

Rethinking the Liberal Peace Apr 03 2020 This book presents a critical analysis of the liberal peace project and offers possible alternatives and models. In the past decade, the model used for reconstructing societies after conflicts has been based on liberal assumptions about the pacifying effects of 'open markets' and 'open societies'. Yet, despite the vast resources invested in helping establish the precepts of this liberal peace, outcomes have left much to be desired. The book argues that failures in the liberal peace project are not only due to efficiency problems related to its adaptation in adverse local environments, but mostly due to problems of legitimacy of turning an ideal into a doctrine for action. The aim of the book is to scrutinize assumptions about the value of democratization and marketization and realities on the ground by combining theoretical discussions with empirical evidence from key post-conflict settings such as Iraq and Afghanistan. These show the disparities that exist between the ideals and the reality of the liberal peace project, as seen by external peacebuilders and domestic actors. The book then proposes various alternatives and modifications to better accommodate local perspectives, values and agency in attempts to forge a new consensus. This book will be of great interest to students of peacebuilding/peacekeeping, statebuilding, war and conflict studies, international

security and IR.

Negotiating Armenian-Azerbaijani Peace Jan 01 2020 Conflict resolution, conflict management and conflict transformations are major themes in this unique book which examines, explores and analyses the mediation attempts of the Organization for Security and Cooperation in Europe in the Nagorno-Karabakh conflict. Ohannes Geukjian shows the most striking characteristic of a protracted internal conflict such as this is its asymmetry and explains that, without meeting basic human needs like identity, recognition, security and participation, resolving any protracted social conflict is very difficult. The Armenian Azerbaijani case demonstrates how official diplomacy may not be able to solve protracted internal conflicts as, without addressing the real causes of the problematic relationship, attempts at peace making will always be sporadic and the space for mutual understanding and compromise shrink. Geukjian shows that conflict transformation has a particular salience in asymmetric conflicts such as this where the goal is to transform unjust relationships and where a high degree of polarisation between the disputants has taken root. Using the Nagorno-Karabakh case, this book focuses on the anatomy and causes of deadlock in negotiations and highlights the many difficulties in achieving a breakthrough.

Making Peace Last Jun 05 2020 The international community invests billions annually in thousands of projects designed to overcome poverty, stop violence, spread human rights, fight terrorism and combat global warming. The hope is that these separate projects will 'add up' to lasting societal change in places like Afghanistan. In reality, these initiatives are not adding up to sustainable peace. Making Peace Last offers ways of improving the productivity of peacebuilding. This book defines the theory, analysis and practice needed to create peacebuilding approaches that are as dynamic and adaptive as the societies they are trying to affect. The book is based on a combination of field experience and research into peacebuilding and conflict resolution. This book can also be used as a textbook in courses on peacebuilding, security and development. Making Peace Last is a comprehensive approach to finding sustainable solutions to the world's most pressing social problems.

The Israeli Solution Nov 03 2022 A landmark manifesto issuing a bold call for a one-state solution to the Israeli-Palestine conflict. The reigning consensus in elite and academic circles is that the United States must seek to resolve the Palestinians' conflict with Israel by implementing the so-called two-state solution. Establishing a Palestinian state, so the thinking goes, would be a panacea for all the region's ills. In a time of partisan gridlock, the two-state solution stands out for its ability to attract supporters from both sides of America's ideological divide. But the great irony is that it is one of the most irrational and failed policies the United States has ever adopted. Between 1970 and 2013, the United States presented nine different peace plans for Israel and the Palestinians, and for the past twenty years, the two state solution has been the centerpiece of U.S. Middle East policy. But despite this laser focus, American efforts to implement a two-state peace deal have failed—and with each new attempt, the Middle East has become less stable, more violent, more radicalized, and more inimical to democratic values and interests. In *The Israeli Solution*, Caroline Glick, senior contributing editor to the *Jerusalem Post*, examines the history and misconceptions behind the two-state policy, most notably: - The huge errors made in counting the actual numbers of Jews and Arabs in the region. The 1997 Palestinian Census, upon which most two-state policy is based, wildly exaggerated the numbers of Palestinians living in the West Bank and Gaza. - Neglect of the long history of Palestinian anti-Semitism, refusal to negotiate in good faith, terrorism, and denial of Israel's right to exist. - Disregard for Israel's stronger claims to territorial sovereignty under international law, as well as the long history of Jewish presence in the region. - Indifference to polling data that shows the Palestinian people admire Israeli society and governance. Despite a half-century of domestic and international terrorism, anti-semitism, and military attacks from regional neighbors who reject its right to exist, Israel has thrived as the Middle East's lone democracy. After a century spent chasing a two-state policy that hasn't brought the Israelis and Palestinians any closer to peace, *The Israeli Solution* offers an alternative path to stability in the Middle East based on Israeli sovereignty over Judea and Samaria.

Infrastructures for Peace in Sub-Saharan Africa Oct 29 2019 Cultures of violence are characteristic of many countries in sub-Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual. And yet, the wide variations in levels of violence within and between countries show that it is not inevitable; rather, it is the result of choices made at individual, community and societal levels. This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace. Peace infrastructures vary hugely in sophistication and level. The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations, peace committees which serve local communities, peace education and peace club programmes in schools, mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non-government efforts in peacemaking and peacebuilding. The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace. 1. It is the only book available which documents the experience and potential of nonviolence in post-independence sub-Saharan Africa. 2. It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable. 3. It explains how strategic planning can be utilised, both to bring about change and to institutionalise it.

Peace and Rural Development in Colombia Oct 10 2020 In *Peace and Rural Development in Colombia* Andrés García Trujillo investigates whether peace agreements geared toward terminating internal armed conflicts trigger rural distributive changes. Combining academic rigor with an insider's perspective, García Trujillo shows that the peace agreement in Colombia opened an exceptional window for addressing rural inequality. Yet, despite some progress, he argues that the agreement's leverage to stir change was severely constrained by opposing actors within and outside the government. García Trujillo later applies the framework developed for the Colombian case to explain key dynamics of other post-conflict societies that have dealt with agrarian issues under a transitional context, like El Salvador or South Africa. The original theoretical framework and empirically rich analysis make *Peace and Rural Development in Colombia* an indispensable read for scholars and practitioners who wish to gain an understanding on the political economy of peacemaking, policy change, and rural development in Colombia and beyond.

Comparing Peace Processes Nov 10 2020 This book offers a comparative survey of 18 contemporary peace processes conducted by leading international scholars. There is no standard model of peace processes and all will vary according to the context, type of conflict, timing, national and global economic climate, and factors like natural disasters. Therefore, making comparisons between peace processes is difficult, but it is beneficial – indeed, imperative – and is the principal motivation behind this volume. What works in one context may not work in another, but it can be modified and adapted to fit another context. The book is structured to maximise comparison between processes, and the case studies chosen are topical and span the major regions of the world. The concluding chapter systematically compares the case studies around 11 variables that cover the conflict context, peace process procedures, the responsiveness of the peace process to demands, and levels of participation and inclusion. Each peace process is then given a numeric score according to each of these variables, and the book thereby reaches judgements on whether each case can be termed a 'success' or a 'failure'. This book will be essential reading for students of peace studies, conflict resolution, war and conflict studies, security

studies, and IR.

On Building Peace Jun 29 2022 Now, 25 years after the end of the Cold War, the global peace order is going through renewed geopolitical changes that are less dramatic than those in 1989 but probably equally important. The post-Cold War Western dominance of global affairs and the singular US superpower status are eroding, making room for a more diffuse multi-polar world with many different global and regional players. Post-Cold War hopes that the winning political system of liberal democracy would spread around the world and bring global peace have turned out an illusion. To the contrary, Western efforts and military interventions to promote liberal democracy have increasingly resulted in the destabilization of countries and whole regions. At the same time, intra-state armed conflicts have, probably for the first time in human history, replaced inter-state wars as the main threats to global peace and security. This has created a completely new global threat scenario. Now, weak and corrupt governments are challenged by powerful belligerent non-state actors, be they Islamic extremist groups, other ideologically-motivated groups, separatist movements, or even transnational crime syndicates. Globalization has turned these local intra-state armed conflicts into international security concerns.

Peace-Building by, between, and beyond Muslims and Evangelical Christians May 17 2021 This timely work addresses sensitive issues and relations between Muslims and Christians around the world. The book uniquely captures the opportunity for Christians and Muslims to come together and discuss pertinent issues such as pluralism, governance, preaching, Christian missionary efforts, and general misperceptions of Muslim and Christian communities. It also shows the value of honestly sharing convictions while respecting and hearing the beliefs of another.

The End of the Middle East Peace Process Jul 07 2020 Presenting the Middle East peace process as an extension of US foreign policy, this book argues that ongoing interventions justified in the name of 'peace' sustain and reproduce hegemonic power. With an interdisciplinary approach, this book questions the conceptualisation and general understanding of the peace process. The author reinterprets regional conflict as an opportunity for the US through which it seeks to achieve regional dominance and control. Engaging with the different stages and components of the peace process, he considers economic, military and political factors which both changed over time and remained constant. This book covers the US role of mediation in the region during the Cold War, the history and present state of US-Israel relations, Syria's reputation as an opponent of 'peace' compared with its participation in peace negotiations, and the Palestinian-Israeli conflict with attention to US involvement. The End of the Middle East Peace Process will primarily be of interest to those hoping to gain an improved understanding of key issues, concepts and themes relating to the Arab-Israeli conflict and US intervention in the Middle East. It will also be of value to those with an interest in the practicalities of peacebuilding.

Teaching Peace and Conflict Apr 27 2022 This book illustrates the multiple roles of textbooks as victim, transformer, and accomplice to conflict by introducing the Intersecting Roles of Education in Conflict (IREC) framework for use in the research, development, production, distribution, and dissemination of textbooks and learning materials. The framework illustrates these three potentially overlapping roles by mapping the complex educational contexts of conflict-affected societies and considering how textbooks, learning materials, and education systems more broadly may simultaneously operate within these various roles. Country case studies from Asia, Europe, Africa, and the Middle East are used to analyze primary and secondary school textbook development, content, and application from a variety of approaches that articulate conflict as protracted and/or socio-political violence. The breadth of case studies shows how conflict discourse circulates in educational systems and materials in a wide range of contexts, indicating that the complexity of the relationship between textbooks and conflict is not unique to one culture, geographic region, or type of conflict.
