From Instinct to Identity Mar 01 2022 From Instinct to Identity begins an account of personality development by tracing the legacy of the human species from its primate heritage to its present form. Findings from ethology, primate studies, linguistics, and other sources are used to construct an account of the unique features of man. The evolution of early cultures is shown through use of anthropological work. The ideas of Sigmund Freud, particularly as modified by Erik Erikson, are presented together with the theories and findings of Jean Piaget and his collaborators in a series of chapters that follow the person from infancy to adolescence. Other chapters examine play, dreams, and fantasy; anxiety and its effects on the development of self; moral development; and identity. The emphasis throughout is on the growth of self, and its impact on social norms. The author blends together theories and findings from psychoanalysis, psychology, ethology, humanistic psychology, and child development, develops a model of human motivation in which the basic emotional systems of love, anxiety, aggression, curiosity and intelligence are traced from their primate background through the human life cycle. He brings together classic ideas on guilt and conscience with research on moral reasoning and ego development, and clarifies difficult ideas in a clear, direct prose style. This classic volume, now available in paperback with a new introduction by the author, will find a new audience among anthropologists as well as psychologists interested in the evolution of human behavior.

Disability and Popular Culture Jun 23 2021 As a response to real or imagined subordination, popular culture reflects the everyday experience of ordinary people and has the capacity to subvert the hegemonic order. Drawing on central theoretical approaches in the field of critical disability studies, this book examines disability across a number of internationally recognised texts and objects from popular culture, including film, television, magazines and advertising campaigns, children's toys, music videos, sport and online spaces, to attend to the social and cultural construction of disability. While acknowledging that disability features in popular culture in ways that reinforce stereotypes and stigmatise, Disability and Popular Culture celebrates and complicates the increasing visibility of disability in popular culture, showing how popular culture can focus passion, create community and express defiance in the context of disability and social change. Covering a broad range of concerns that lie at the intersection of disability and cultural studies, including media representation, identity, the beauty myth, aesthetics, ableism, new media and sport, this book will appeal to scholars and students interested in the critical analysis of popular culture, across disciplines such as disability studies, sociology and cultural and media studies.

Television Production in Transition Jan 19 2021 Focusing on the growing power of transnational media corporations in an increasingly globalized environment for distribution of television content, and on the effects of mergers and acquisitions involving local and independent television production companies, this book examines how current and recent re-structurings in ownership across the television industry reflect changing business models, how they affect creativity and diversity of television output, and to what extent they call for new approaches to regulation and policy. Based on a major study of the UK production sector as a case study, it offers a unique analysis of wider transformations in ownership affecting the television production industry worldwide and of their economic, socio-cultural and policy implications.

How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same Oct 28 2021 How To Write Anything: The Format Of What You Write May Change But The Process Of Writing Anything Remains The Same This book is called How To Write Anything, and I confess there is some ego involved in the title. But then I've been a professional writer for over 40 years. As one of Canada's most successful writers and authors, I have written hard news articles, soft news and feature articles, advertising and promotional copy, media releases, reports and proposals, case studies, research papers, email messages, website content, tweets, blog posts, and other online content. I have also written over 20 books on business, promotional and online writing and other topics, such as writing articles, memoir writing and living with Multiple Sclerosis, a disease that I have, but one that has not prevented me from writing or training. I've also written a collection of short stories, poetry, and a couple of plays. So while I haven't written everything, I've written many things. The fact is that you can't read this book and go forth and write anything if you are not familiar with the format or structure of the document that you want to write—be it non-fiction or fiction. For instance, if you want to write a report, you do so using the methods in this book. However, you have to know how to structure reports. The same is applicable to email, social media content, articles, promotional content, case studies, reports, white papers, PowerPoint presentations, speeches, website content, short stories or novels. So some of you reading this book might still have some learning to do. However, I suspect most of you know the structure of the documents you want to produce and you will be able to immediately apply the methods outlined in the book to writing any document that you need to write.

Asian Informal Workers May 03 2022 This thoroughly researched volume surveys the nature and extent of 'informal' work in Asia, which is a powerful and under-studied force in the region. After over half a century of development, even in the fast growing economies of Asia, the formal sector, and industrial jobs have grown rather slowly, and most non-agricultural employment growth has occurred in the informal economy. At the same time as this, there has been a feminization of informal workers and growth in subcontracted homework. Drawing on detailed case studies carried out in five Asian countries - two low income (India and Pakistan) and three middle income (Indonesia, Thailand and the Philippines) - where subcontracted production, usually by women and children working out of home, is now widespread, this insightful book acknowledges that home-based work is the source of income diversification for poor families, but is also the source of exploitation of vulnerable workers and child labour as firms attempt to contain costs. This wide-ranging and accessible survey, edited by key specialists in this field, along with an impressive team of contributors, examines the social protection needs of these workers arguing convincingly for public action to promote such work and protect these workers as a possible new labour intensive growth strategy in developing countries.

Digital Apollo Sep 14 2020 The incredible story of how human pilots and automated systems worked together to achieve the ultimate achievement in flight—the lunar landings of NASA's Apollo program As Apollo 11's Lunar Module descended toward the moon under automatic control, a program alarm in the guidance computer's software nearly caused a mission abort. Neil Armstrong responded by switching off the automatic mode and taking direct control. He stopped monitoring the computer and began flying the spacecraft, relying on skill to land it and earning praise for a triumph of human over machine. In Digital Apollo, engineer-historian David Mindell takes this famous moment as a starting point for an exploration of the relationship between humans and computers in the Apollo program. On each of the six Apollo landings, the astronaut in command seized control from the computer and landed with his hand on the stick. Mindell recounts the story of astronauts' desire to control their spacecraft in parallel with the history of the Apollo Guidance Computer. From the early days of aviation through the birth of spacecraft, test pilots and astronauts sought to be more than "spam in a can" despite the automatic controls, digital computers, and software developed by engineers. Digital Apollo examines the design and execution of each of the six Apollo moon landings, drawing on transcripts and data telemetry from the flights, astronaut interviews, and NASA's extensive archives. Mindell's exploration of how human pilots and automated systems worked together to achieve the ultimate in flight—a lunar landing—traces and reframes the debate over the future of humans and automation in space. The results have implications for any venture in which human roles seem threatened by automated systems, whether it is the work at our desktops or the future of exploration.

Toward an Anthropology of Ambient Sound Oct 04 2019 This volume approaches the issue of ambient sound through the ethnographic exploration of different cultural contexts including Italy, India, Egypt, France, Ethiopia, Scotland, Spain, Portugal, and Japan. It examines social, religious, and aesthetic conceptions of sound environments, what types of action or agency are attributed to them, and what bodies of knowledge exist concerning them. Contributors shed new light on these sensory environments by focusing not only on their form and internal dynamics, but also on their wider social and cultural environment. The multimedia documents of this volume may be consulted at the address: milson.fr@routledge.com.

Public Relations Planning Jul 01 2019 Public Relations Planning provides students with an in-depth understanding of the steps involved in planning and executing a successful PR campaign. Taking a strategic approach to the subject, the author brings years of practical experience to the project, helping students see how it all fits together in reality. The book goes beyond an introductory discussion of the theory of PR planning, incorporating material from cutting-edge research in the field. A discussion of the psychological aspects of communication, material on in-house/employee communication, as well as a chapter dedicated to discussing how social media strategies fit into a PR campaign, give students a real edge when it comes to executing an effective campaign. Plenty of global examples and a companion website featuring PowerPoint slides, a test bank, and answer key for end-of-chapter questions round out this excellent resource for students of public relations and corporate communication.

Conversation Analysis Dec 06 2019 This collection assembles early, yet previously unpublished research into the practices that organize conversational interaction by many of the central figures in the development and advancement of Conversation Analysis as a discipline. Using the methods of sequential analysis as first developed by Harvey Sacks, the authors produce detailed empirical accounts of talk in interaction that make fundamental contributions to our understanding of turntaking, action formation and sequence organization. One distinguishing feature of this collection is that each of the contributors worked directly with Sacks as a collaborator or was trained by him at the University of California or both. Taken together this collection gives readers a taste of CA inquiry in its early years, while nevertheless presenting research of contemporary significance by internationally known conversation analysts.
