Handbook for Teaching Statistics and Research Methods 05 2020 This volume presents a collection of articles selected from Teaching of Psychology, sponsored by APA Division 2. It contains the collective experience of teachers who have successfully dealt with students' statistics anxiety, resistance to conducting literature reviews, and related issues. For those who teach statistics or research methods courses to undergraduate or graduate students in psychology, education, and the social sciences, this book provides many innovative strategies for teaching a variety of methodological concepts and procedures in statistics and research methods courses.

Teaching Music Appreciation Online Dec 27 2021 In this book, readers will learn practical tips and strategies to teach music appreciation online. As online education is a growing field, an increasing number of teachers trained in traditional/live methods find themselves now teaching online and potentially without mentors to assist them. Student needs are also changing, seeking highly engaged, relevant, and interactive learning opportunities that connect to their lives. This book offers readers will find helpful guidance in planning curriculum, integrating multimedia assets, designing forum discussions, developing assignments, preparing rubrics, engaging in forum discussions, preparing, managing, and teaching, the course, providing feedback and grading, and following up with struggling and challenging students. The book can serve as a resource to those already teaching music appreciation online or as a comprehensive guide to those new to the field. Additionally, it may serve as a resource to instructors in other disciplines who seek to shift live-courses to the online format, as well as music appreciation instructors who would like to integrate digital or online components into their face-to-face courses. The book is organized into five major sections, designed to guide the novice online educator while also appealing to the seasoned veteran through the ability to review each section as a stand-alone resource. Although some readers will desire to read from cover to cover, they will also be able to move in a non-linear manner from chapter to chapter, using chapters in modular form, in order to benefit from the sections that most apply to their needs at a given time.

English Linguistics, Literature, and Language Teaching in a Changing World Sep 04 2022 This book offers a wide range of topics for the scholar interested in the study of English in this unsettling era of disruption in our lives – from literature to language teaching and learning. The chapters present snippets of thoughts and critical reflections, drawn from action research and other methodologies, and essays on troubling topics for language teachers. The authors are researchers, experienced teachers, and students engaged in exploratory research. The many ideas and suggestions in this book for further reflection and research will inspire teachers and researchers working in many different contexts, both local and regional. There is something in this book for everybody.

The Teaching of Mathematics 20 2021 This book includes some of the things that have been widely read and greatly appreciated by teachers of mathematics. Part I is a reprint of a statement on Mathematical Requirements. In Part II appears a reprint of nearly all of Professor Moore's presidential addresses in which he laid so carefully the foundation for the mathematical reform that has challenged the best efforts of progressive groups in many centers for a quarter of a century.
