Doing Without Concepts Aug 26 2021 In Doing without Concepts, Edouard Machery argues that the dominant psychological theories of concept fail to provide a coherent framework to organize our extensive empirical knowledge about concepts. Machery proposes that to develop such a framework, drastic conceptual changes are required.

The Scientific Article in the Age of Digitization Nov 16 2020 This book outlines the consequences of digitization for peer-reviewed research articles published in electronic journals. It is argued that digitization will revolutionize scientific communication. However, this study shows that this is not the case where scientific journals are concerned. Authors make little use of the possibilities offered by the digital medium; electronic peer review procedures have not replaced traditional ones, and users have not embraced new forms of interaction offered by some electronic journals.

Textbook of Palliative Medicine Jul 25 2021 Textbook of Palliative Medicine provides an alternative, truly international approach to this rapidly growing specialty. This textbook fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international curriculum for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind. With an emphasis on providing a service anywhere in the world, including the important issue of palliative care in the developing nations, Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors, and is an ideal complement to them. It is essential reading for all palliative care physicians in training and in practice, as well as palliative care nurses and other health professionals in the palliative care team

Husserl Mar 09 2020 This second edition of David Woodruff Smith's stimulating introduction to Husserl has been fully updated and includes a new ninth chapter featuring contemporary issues confronting Husserl's phenomenology. It introduces the whole of Edmund Husserl's thought, demonstrating his influence on philosophy of mind and language, on ontology and epistemology, as well as ethical theory, and on philosophy of logic, mathematics, and science. Starting with an overview of Husserl's life and works, and his place in twentieth-century philosophy and in Western philosophy as a whole, Smith introduces Husserl's conception of phenomenology, explaining Husserl's innovative theories of intentionality, objectivity, subjectivity, and intersubjectivity. In subsequent chapters Smith covers Husserl's logic, metaphysics, realism and transcendental idealism, epistemology, and (meta)ethics. Finally, the author assesses the significance and implications of Husserl's work for contemporary philosophy of mind and cognitive science. Also included is a timeline, glossary, and extensive suggestions for further reading, making Husserl, second edition, essential reading for anyone interested in phenomenology, twentieth-century philosophy, and the continuing influence of this eminent philosopher.

A Guide to the Project Management Body of Knowledge (Pmbok(r) Guide-Sixth Edition / Agile Practice Guide Bundle (Italian) Dec 30 2021 To support the broadening spectrum of project delivery approaches, PMI is offering A Guide to the Project Management Body of Knowledge (PMBOK(R) Guide) - Sixth Edition as a bundle with its latest, the Agile Practice Guide. The PMBOK(R) Guide - Sixth Edition now contains detailed information about agile; while the Agile Practice Guide, created in partnership with Agile Alliance(R), serves as a bridge to connect waterfall and agile. Together they are a powerful tool for project managers. The PMBOK(R) Guide - Sixth Edition - PMI's flagship publication has been updated to reflect the latest good practices in project management. New to the Sixth Edition, each knowledge area will contain a section entitled Approaches for Agile, Iterative and Adaptive Environments, describing how these practices integrate in project settings. It will also contain more emphasis on strategic and business knowledge--including discussion of project management business documents--and information on the PMI Talent Triangle(TM) and the essential skills for success in today's market. Agile Practice Guide has been developed as a resource to understand, evaluate, and use agile and hybrid agile approaches. This practice guide provides guidance on when, where, and how to apply agile approaches and provides practical tools for practitioners and organizations wanting to increase agility. This practice guide is aligned with other PMI standards, including A Guide to the Project Management Body of Knowledge (PMBOK(R) Guide) - Sixth Edition, and was developed as the result of collaboration between the Project Management Institute and the Agile Alliance.

Causation in Decision, Belief Change, and Statistics Nov 04 2019 The papers collected here are, with three exceptions, those presented at a conference on probability and causation held at the University of California at Irvine on July 15-19, 1985. The exceptions are that David Freedman and Abner Shimony were not able to contribute the papers that they presented to this volume, and that Clark Glymour who was not able to attend the conference did contribute a paper. We would like to thank the National Science Foundation and the School of Humanities of the University of California at Irvine for generous support. WILLIAM HARPER University of Western Ontario BRIAN SKYRMS University of California at Irvine Vll INTRODUCTION PART I: DECISIONS AND GAMES Causal notions have recently corne to figure prominently in discussions about rational decision making. Indeed, a relatively influential new approach to theorizing about rational choice has come to be called "causal decision theory". 1 Decision problems such as Newcombe's Problem and some versions of the Prisoner's Dilemma where an act counts as evidence for a desired state even though the agent knows his choice of that act cannot causally influence whether or not the state obtains have motivated causal decision theorists.

Teaching Cybersecurity Jun 23 2021 "Let's be realistic here. Ordinary K-12 educators don't know what "cybersecurity" is and could probably care less about incorporating it into their lesson plans. Yet, teaching cybersecurity is a critical national priority. So, this book aims to cut through the usual roadblocks of confusing technical jargon and industry stovepipes and give you, the classroom teacher, a unified understanding of what must be taught. That advice is based on a single authoritative definition of the field. In 2017, the three societies that write the standards for computing, software engineering, and information systems came together to define a single model of the field of cybersecurity. It is based on eight building blocks. That definition is presented here. However, we also understand that secondary school teachers are not experts in arcane subjects like software, component, human, or societal security. Therefore, this book explains cybersecurity through a simple story rather than diving into execution details. Tom, a high school teacher, and Lucy, a middle school teacher, are tasked by their district to develop a cybersecurity course for students in their respective schools. They are aided in this by "The Doc," an odd fellow but an expert in the field. Together they work their way through the content of each topic area, helping each other to understand what the student at each level in the educational process has to learn. The explanations are simple, easy to understand, and geared toward the teaching aspect rather than the actual performance of cybersecurity work. Each chapter is a self-contained explanation of the cybersecurity content in that area geared to teaching both middle and high school audiences. The eight component areas are standalone in that they can be taught separately. But the real value lies in the comprehensive but easy-to-understand picture that the reader will get of a complicated field"--

Toposes and Local Set Theories Feb 17 2021 This text introduces topos theory, a development in category theory that unites important but seemingly diverse notions from algebraic geometry, set theory, and intuitionistic logic. Topics include local set theories, fundamental properties of toposes, sheaves, local-valued sets, and natural and real numbers in local set theories. 1988 edition.

Professional Discretion in Welfare Services Dec 18 2020 Discretion has re-emerged as an issue of central importance for welfare professionals over the last two decades in the face of an intensification of management culture across the public sector. This book presents an innovative framework for the analysis of discretion, offering three accounts of the managerial role - the domination model, the street level model and the author's alternative discursive perspective. These different regimes of discretion are examined through a case study within a social services department, comparing and contrasting social work discretion in an Older Persons Team and a Mental Health Team. This innovative, theoretical and empirical analysis will be of great interest to postgraduate students and researchers in social work and related disciplines including social policy, public

administration and organizational studies, as well as professionals in social work, health and education.

People Management and Performance Jul 01 2019 Do human resource management practices actually work? This timely and engaging volume examines the links between people management practices and organizational performance. Focusing on the implementation and impact of HR strategies, the book puts forward a model, which draws attention to: The importance of the culture and values of the organization The needs of professional knowledge workers The links between human resources and performance People Management and Performance takes a critical view of how and why HR practices have had a positive impact on a range of organizations and also considers the implications for theory and practice. Incorporating case studies from well known organizations, such as Nationwide and Selfridges, this book will be of interest to graduate students of HRM and business and management, as well as practitioners working in the field.

Enlightenment to Enlightenment Apr 09 2020 This book is a thorough and critical, comparative analysis of the logic of modern scientific thought and of traditional teachings generally referred to as mythological and mystical. Different rationalities with different domains of interest and legitimacy exist, which should not be confused and cannot be unified in any theory of "Ultimate Reality." Atlan suggests they must coexist in practice, although each of them presents itself as an exclusive and all-encompassing truth. The book introduces teachings from Jewish talmudic, midrashic, and kabbalist sources and text from Zen and Taoism to exemplify the kind of rationality or controlled irrationality at work in such traditional thinking.

The Nature of Things May 23 2021 Originally published in 1973. In this systematic treatise, Anthony Quinton examines the concept of substance, a philosophical refinement of the everyday notion of a thing. Four distinct, but not unconnected, problems about substance are identified: what accounts for the individuality of a thing; what confers identity on a thing; what is the relation between a thing and its appearances; and what kind of thing is fundamental, in the sense that its existence is logically independent of that of any other kind of thing? In Part 1, the first two problems are discussed, while in Part 2, the third and fourth are considered. Part 3 examines four kinds of thing that have been commonly held to be in some way non-material: abstract entities; the un-observable entities of scientific theory; minds and their states; and, finally, values. The author argues that theoretical entities and mental states are, in fact, material. He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value.

Global Library and Information Science Oct 04 2019 This book presents international librarianship and library science through insightful and well written chapters contributed by experts and scholars from six regions of the world. The role of public, academic, special, school libraries, as well as library and information science education are presented from the early development to the present time. Its lively, readable approach will help the reader to understand librarianship in Africa, Asia, Australia and New Zealand, Europe, Latin America and the Caribbean, the Middle East, and North America. Edited by Ismail Abdullahi, Professor of Global Library and Information Science, this book is a must-read by library science students and teachers, librarians, and anyone interested in Global Librarianship.

Ecosystem-Based Management for the Oceans Feb 06 2020 Conventional management approaches cannot meet the challenges faced by ocean and coastal ecosystems today. Consequently, national and international bodies have called for a shift toward more comprehensive ecosystem-based marine management. Synthesizing a vast amount of current knowledge, Ecosystem-Based Management for the Oceans is a comprehensive guide to utilizing this promising new approach. At its core, ecosystem-based management (EBM) is about acknowledging connections. Instead of focusing on the impacts of single activities on the delivery

of individual ecosystem services, EBM focuses on the array of services that we receive from marine systems, the interactive and cumulative effects of multiple human activities on these coupled ecological and social systems, and the importance of working towards common goals across sectors. Ecosystem-Based Management for the Oceans provides a conceptual framework for students and professionals who want to understand and utilize this powerful approach. And it employs case studies that draw on the experiences of EBM practitioners to demonstrate how EBM principles can be applied to real-world problems. The book emphasizes the importance of understanding the factors that contribute to social and ecological resilience —the extent to which a system can maintain its structure, function, and identity in the face of disturbance. Utilizing the resilience framework, professionals can better predict how systems will respond to a variety of disturbances, as well as to a range of management alternatives. Ecosystem-Based Management for the Oceans presents the latest science of resilience, while it provides tools for the design and implementation of responsive EBM solutions.

Creativity and Academic Activism Sep 02 2019 This work explores in detail how innovative academic activism can transform our everyday workplaces in contexts of considerable adversity. Personal essays by prominent scholars provide critical reflections on their institution-building triumphs and setbacks across a range of cultural institutions. Often adopting narrative approaches, the contributors examine how effective programmes and activities are built in varying local and national contexts within a common global regime of university management policy. Here they share experiences based on developing new undergraduate degrees, setting up research centers and postgraduate schools, editing field-shaping book series and journals, establishing international artist-in-residence programs and founding social activist networks. This book also investigates the impact of managerialism, marketization and globalization on university cultures, asking what critical cultural scholarship can do in such increasingly adversarial conditions. Experiments in Asian universities are emphasized as exemplary of what can or could be achieved in other contexts of globalized university policy. Contributors include Tony Bennett, Stephen Ching-Kiu Chan, Kuan-Hsing Chen, Douglas Crimp, Dai Jinhua, John Nguyet Erni, Josephine Ho, Koichi Iwabuchi, Tejaswini Niranjana, Wang Xiaoming, and Audrey Yue.
