Irresistible Learning Jan 02 2020 This book will strengthen your research practice and help build a culture of research across your school. Whether you are a class teacher or school leader, you will be guided to use the power of research to strengthen practice in yourself and others. The author offers a practical guide on how to engage in meaningful research that will have a deep and lasting impact on you and your organisation. You will be taken on a journey through a Research Cycle that will build your confidence and purpose as a researcher; deepening professional relationships and improving outcomes for all. You will then be introduced to a range of systems that construct a culture of research in your school, building a climate where the voice of every member of staff is deeply valued and has the potential to influence the strategic development of the organisation. If you are interested in research in schools, this book is for you.

Principles of Research Design and Drug Literature Evaluation Dec 25 2021 Principles of Research Design and Drug Literature Evaluation is a unique resource that provides a balanced approach covering critical elements of clinical research, biostatistical principles, and scientific literature evaluation techniques for evidence-based medicine. This accessible text provides comprehensive course content that meets and exceeds the curriculum standards set by the Accreditation Council for Pharmacy Education (ACPE). Written by expert authors specializing in pharmacy practice and research, this valuable text will provide pharmacy students and practitioners with a thorough understanding of the principles and practices of drug literature evaluation with a strong grounding in research and biostatistical principles. Principles of Research Design and Drug Literature Evaluation is an ideal foundation for professional pharmacy students and a key resource for pharmacy residents, research fellows, practitioners, and clinical researchers. FEATURES * Chapter Pedagogy: Learning Objectives, Review Questions, References, and Online Resources * Instructor Resources: PowerPoint Presentations, Test Bank, and an Answer Key * Student Resources: a Navigate Companion Website, including Crossword Puzzles, Interactive Flash Cards, Interactive Glossary, Matching Questions, and Web Links From the Foreword: "This book was designed to provide and encourage practitioner's development and use of critical drug information evaluation skills through a deeper understanding of the foundational principles of study design and statistical methods. Because guidance on how a study's limited findings should not be used is rare, practitioners must understand and evaluate for themselves the veracity and implications of the inherently limited primary literature findings they use as sources of drug information to make evidence-based decisions together with their patients. The editors organized the book into three supporting sections to meet their pedagogical goals and address practitioners' needs in translating research into practice. Thanks to the editors, authors, and content of this book, you can now be more prepared than ever before for translating research into practice." L. Douglas Ried, PhD, FAPhA Editor-in-Chief Emeritus, Journal of the American Pharmacists Association Professor and Associate Dean for Academic Affairs, College of Pharmacy, University of Texas at Tyler, Tyler, Texas

Book Club Journal also includes advice to help you manage the meeting, from navigating group dynamics to hosting your book group digitally, plus tips on making time for reading when you're busy and - if all else fails - how to participate even if you haven't finished the book. With timeless quotes on the joy of reading peppered throughout, this makes a gorgeous gift, whether for someone else or just for yourself.

Research for the Radiation Therapist Aug 28 2019 This book addresses a wide range of topics, from the principles of evidence-based practice to the process and dissemination of research to unique considerations such as clinical trials, patenting, and health services research. The case for evidence-based practice and a collaborative research culture is made first, followed by a series of chapters walking the reader through the research process by way of the scientific method. One of the more unique aspects of the scope of this book is the inclusion of chapters relating to the dissemination of knowledge, manuscript publication, and how to build an academic research program. Each

chapter focuses on introducing the reader to foundational principles, methodology, and terminology, and highlight case studies of radiation therapist research or experience that is relevant to provide contextual examples and inspiration to the reader.

Johns Hopkins Nursing Evidence-based Practice Dec 13 2020 Practice based on evidence requires a fundamental change in the way that nurse leaders and staff think about practice and the practice environment. Evidence-based practice, or EBP, promotes improved interventions, care, and patient outcomes. Translating evidence-based findings into practice can be challenging. Using practical and clearly defined approaches, Johns Hopkins Nursing evidence-based Practice: Implementation and Translation provides a road map for instituting best practices.

The Zoological Record Aug 09 2020 Indexes the world's zoological and animal science literature, covering all research from biochemistry to veterinary medicine. The database provides a collection of references from over 4,500 international serial publications, plus books, meetings, reviews and other non-serial literature from over 100 countries. It is the oldest continuing database of animal biology, indexing literature published from 1864 to the present. Zoological Record has long been recognized as the "unofficial register" for taxonomy and systematics, but other topics in animal biology are also covered.
