Writing and Designing Manuals and Warnings, Fifth Edition 27 2022 Technology is changing the way we do business, the way we communicate with each other and the way we learn. This new edition is intended to help technical writers, graphic artists, engineers, and others who are charged with producing product documentation in the rapidly changing technological world. While preserving the basic guidelines for developing manuals and warnings presented in the previous edition, this new edition offers new material as well, including a much-expanded section on hazard analysis. Features Provides more explicit guidance on conducting hazard analysis, including methods and documentation Offers in-depth discussion of digital platforms, including video, animations, and even virtual reality, to provide users with operating instructions and safety information Incorporates current research into effective cross-cultural communication—essential in today's global marketplace Explains new US and international standards for warning labels and product instructions Presents expanded material on user analysis, including addressing generational differences in experience and preferred learning styles Writing and Designing Manuals and Warnings, Fifth Edition explores how emerging technologies are changing the world of product documentation from videos to virtual reality and all points in between.

Operator's Organizational, Direct Support and General Support Maintenance Manual (including Repair Parts and Supplemental Maintenance and Repair Parts Instructions) for New 5-Gallon Bucket Book 22 2019

Why just reuse a bucket when you can reinvent it? The New 5-Gallon Bucket Book updates a quirky classic with 30+ new ways to take those old buckets and put them to use. Five-gallon buckets are ubiquitous and cheap (or even free). They are right up there with some of man's best inventions, like the wheel and sliced bread. Sure, they can be useful on their own, holding stuff or transporting stuff from place to place. But that's no fun. Put them to use around the house, garden, or farm instead! With common tools and the instructions in this book, you'll find 60+ ideas and projects to make today. Connect with your inner engineer as you: Make something for around the home, like a shoe rack, trash compactor, water filter, or mousetrap. Become more self-sufficient, with a waterer, egg incubator, nesting box, or bee feeder. Have some fun with an air cannon, beanbag toss, drum set, or washtub bass. Get creative by dressing your kid in a bucket costume for Halloween, making a boat anchor, or a set of music speakers. Grow more in the garden with a sweet potato starter, rolling composter, Japanese beetle trap, vermiculture bin, or walking watering can. As you can see, there's no shortage of ways to put these humble and hard-working mainstays to work for you. Prime and keep them out of landfills. Simple step-by-step instructions, as well as parts lists and images of the completed projects, make sure you will have fun with the results of your work.
