Social and Personal Ethics Oct 25 2022 SOCIAL AND PERSONAL ETHICS provides students with a sound introduction to ethical theory and contemporary moral issues through engaging readings on today's most hotly debated topics. Among other topics, coverage includes environmental ethics and animal rights, the limits of personal liberty, war and the struggle against terrorism, marriage and sexual morality, the death penalty, gun control, and abortion and euthanasia. The volume begins with two introductory essays written for beginning students by the editor, William H. Shaw, on the nature of morality and competing normative theories. These are followed by five other essays on ethical theory by classical and contemporary authors. The book's next 12 sections explore a wide-range of real-world ethical issues. In all, the book is composed of 53 articles (11 of which are new to this edition). To ensure that the text is as accessible as it is relevant, Shaw has edited every article with an eye toward readability, provided introductions and study questions before the essays, as well as review and discussion questions after them, and highlighted key passages to help students focus on important points and concepts.

Greenfield's Neuropathology Eighth Edition 2-Volume Set Sep 12 2021 Greenfield's Neuropathology, the worlds leading neuropathology reference, provides an authoritative, comprehensive account of the pathological findings in neurological disease, their biological basis and their clinical manifestations. This account is underpinned throughout by a clear description of the molecular and cellular processes and reactions that are relevant to the development, and normal and abnormal functioning of, the nervous system. While this scientific content is of paramount importance, however, care has been taken to ensure that the information is presented in a way that is accessible to readers working within a range of disciplines in the clinical neurosciences, and that also places the neuropathological findings within the context of a broader diagnostic process. The new eighth edition incorporates much new information, new illustrations and many new authors, while retaining the depth, breadth and quality of content so praised in previous editions. Each chapter opens with an introductory section designed to offer an integrated approach to diagnosis, taking account of clinical manifestations, neuroradiological and laboratory findings as well as the neuropathological and molecular genetic features of the diseases being considered. Strong emphasis has been placed on facilitating the retrieval of neuropathological information by non-neuropathologists grappling with differential diagnoses or seeking information on broad categories of neurological disease, and boxes and tables are used to present important symptoms and signs, patterns of disease and other features for ease of reference. High quality line and photographic illustrations, the majority in full colour, are all available on a companion CD, to complete the offering.

Offering a wealth of evidence, including rare photos, documents, and interviews, Marrs, a veteran Texas journalist, reveals the telltale signs of the conspiracy: early government manipulation of the famous Zapruder film, falsification of evidence, the intimidation of witnesses after the assassination, the theft of Oswald's identity during the countdown to the tragedy, and much more. Meticulously researched and brimming with new information, Crossfire is sure to remain the most comprehensive account of this epochal American crime.

The Legal Consequences of Limited Statehood Apr 26 2020 This book analyzes Palestine's acceptance as a State in multilateral frameworks and its legal consequences. Using Palestine as a case study, this book argues that participation in a State-reserved regime is not determined by the traditional requisites of statehood. UNESCO membership unveils the acceptance of Palestine as a State for the limited purpose of the organization, without any immediate or implicit implications for the statehood of Palestine. Palestine's accessions to various multilateral treaties demonstrate this argument as do its instruments of accession being accepted by the depositaries of both the United Nations Secretary-General and national Governments without requiring any clarification of the statehood question. This book also provides the first in-depth study of the legal relationship of the rights and duties of Palestine with different groups of State Parties; the recent dispute settlement brought by Palestine against the United States and Israel; and theoretical and practical challenges for Palestine in its acceptance as a State in multilateral frameworks. The book will be of interest to scholars and students of international law, legal theory, state law, and Middle East studies.

Affective Justice Jul 10 2021 Since its inception in 2001, the International Criminal Court (ICC) has been met with resistance by various African states and their leaders, who see the court as a new iteration of colonial violence and control. In *Affective Justice* Kamari Maxine Clarke explores the African Union's pushback against the ICC in order to theorize affect's role in shaping forms of justice in the contemporary period. Drawing on fieldwork in The Hague, the African Union in Addis Ababa, sites of postelection violence in Kenya, and Boko Haram's circuits in Northern Nigeria, Clarke formulates the concept of affective justice—an emotional response to competing interpretations of justice—to trace how affect becomes manifest in judicial practices. By detailing the effects of the ICC's all-African indictments, she outlines how affective responses to these call into question the "objectivity" of the ICC's mission to protect those victimized by violence and prosecute perpetrators of those crimes. In analyzing the effects of such cases, Clarke provides a fuller theorization of how people articulate what justice is and the mechanisms through which they do so.

A Manual for Writers of Research Papers, Theses, and Dissertations, Eighth Edition Oct 21 2019 A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing. Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her *Manual for Writers* continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth edition, *A Manual for Writers of Research Papers, Theses, and Dissertations* has been fully revised to meet the needs of today's writers and researchers. The *Manual* retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation recommendations have been revised throughout to reflect the sixteenth edition of *The Chicago Manual of Style*. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources

available, A Manual for Writers remains the essential resource for students and their teachers.
