**FV430 Series** Aug 03 2022 During the Second World War the British infantry found itself lacking suitable transport to cope with the fast moving German Blitzkrieg tactics. Various stopgap measures were introduced with mixed success but, with the

postwar nuclear biological and chemical threat, it was imperative that a robust solution was found. The FV300 and FV400 Cambridge carriers paved the way for the introduction of the AFV430 series in the 1960s at the height of the Cold War. Initially a basic armored personnel carrier, the series grew to cover a multitude of roles: command, recovery, mortar, Swingfire, and remote mine clearing to name but a selection. Over 50 years later variants are still in service. This classic Images of War book not only describes in words and images the AFV430 series but traces the development of infantry carriers for the British Army.

*Bobcat Fifty Years* Jul 02 2022 Marking the 50th anniversary of an icon of American industry, this book celebrates a half-century of Bobcat with brilliant images of these quintessentially American machines at work, including historical photographs and diagrams, alongside the full story of the only compact machines that have ever mattered. Often imitated but never equaled, the Bobcat skid-steer loader was born when some hardy souls in the Northern Plains needed a new way to get work done. The pictures in these pages show how the Bobcat loader has been moving American industry ever since, joined over the years by Bobcat excavators and trenchers, utility trucks and more. Bobcat Fifty Years chronicles the changes and innovations that have kept the company at the forefront of the nation's compact machinery makers--from the invention of the Bob-Tach quick-change attachment system to the introduction of the Big Bob, the Mini-Bob, and the M-700, the first hydrostatic loader of its size. Here, again and again, is evidence of why Fortune Magazine named the Bobcat one of "America's best"--one of the 100 American-
