On Behalf of the Mystical Fool Mar 01 2022 Jung's explanation of the religious tendency of the psyche addresses many sides of the contemporary debate on religion and the role that it has in individual and social life. This book discusses the emergence of a new mythic

consciousness and details ways in which this consciousness supersedes traditional concepts of religion to provide a spirituality of more universal inclusion. On Behalf of the Mystical Fool examines Jung's critique of traditional western religion, demonstrating the negative consequences of religious and political collective unconsciousness, and their consequent social irresponsibility in today's culture. The book concludes by suggesting that a new religiosity and spirituality is currently emerging in the West based on the individual's access to the sense of ultimacy residual in the psyche, and seeking expression in a myth of a much wider compass. This book will be of interest to scholars and students at all levels who are engaged in the expanding field of Jungian studies. It will also be key reading for anyone interested in the theoretical and therapeutic connections between the psyche and religious experience.

The Self-Teaching Process in Higher Education

Aug 06 2022 Originally published in 1976 The Self-Teaching Process in Higher Education looks at the major changes that took place in the structure of university education. The book looks at how more emphasis was placed on students to take responsibility for their own progress by becoming self-directed individuals. Traditional methods of university education and some alternative approaches are considered in light of course needs of both students and teachers. Self-teaching is then examined in the overall context of the learning process. The book looks at three case studies of the development and use of self-teaching systems, one for chemical bonding, one for electrical circuits and a third for audio-visual communication.

Reconstruction of the Public Sphere in the Socially Mediated Age

Jan 19 2021 The aim of this book is to establish a basis for resolving the various issues facing modern society by exploring the field of Computational Social Science, which fuses the social and natural sciences. Today, society is threatened by problems concerning the environment, population growth, hunger and epidemics, all of which could lead to the extinction of humankind. However, attempting to resolve these issues is extremely difficult, because of the complex, intertwined factors involved, and because these issues are not just matters related to nature and the environment but also to society. In this book, we investigate this aporia of the social sciences with the help of big data (which has gained considerable attention in recent years) and techniques such as agent-based simulation. Our aim is to resolve the complex system problems characteristic of the present age. In this regard, the book focuses on specific issues such as the reconstruction of public character in our social-media-saturated modern lifestyle, the current state of social capital, and the resultant social changes.

Jun 04 2022 I'm constantly telling you the best way to learn is by practicing questions, so I've made you a book full of practice questions. Multiple choice questions to reflect the style of exam questions, activities to complete, equations for you to balance, compounds for you to work out the formula for, lots of things that you need to recall and practice long answer exam style questions. This book is not designed as a text book or revision guide, but as a workbook. There are lots of good (and bad) expensive and free revision guides out there, on my YouTube channel and other great websites. So there is no point in me adding to the masses. All the teaching, all the new content, is available for free on my YouTube channel, this book is for you to practice and learn. The best way to approach this is to watch the teaching video and make notes, or after class try a section and check the answers. Any corrections that are needed after the book is published will be listed on my website, www.primrosekitten.com these will be corrected in the next version of the book. Answers are provided for the sections where you need to work out the answers for yourself, not the sections where you are just filling things in from a video or website. Advice Online Jul 05 2022 Advice Online presents a comprehensive study of advice-giving in one particular American Internet advice column, referred to as 'Lucy Answers'. The discursive practice investigated is part of a professional and educational health program managed by an American university. The study provides insights into the linguistic realization of both asking for and giving advice in a written form and thus adds to the literature on advice columns as a specific text genre, on advice in health care contexts, and on Internet communication. The book offers a comprehensive literature review of advice in

health encounters and other contexts, and uses this knowledge as a basis for comparison. Advice Online demonstrates how qualitative and quantitative research methods can be successfully combined to arrive at a comprehensive analysis of a discursive practice. It provides essential information on advice-giving for researchers, academics and students in the fields of (Internet) communication, media studies, pragmatics, social psychology and counseling. Health educators who work for advice columns or use similar forms of communication will also benefit from the insights gained in this study.
