Symbolizing and Communicating in Mathematics Classrooms Jul 20 2021 This volume grew out of a symposium on discourse, tools, and instructional design at Vanderbilt University in 1995 that brought together a small international group to grapple with issues of communicating, symbolizing, modeling, and mathematizing, particularly as these issues relate to learning in the classroom. The participants invited to develop chapters for this book--all internationally recognized scholars in their respective fields--were selected to represent a wide range of theoretical perspectives including mathematics education, cognitive science, sociocultural theory, and discourse theory. The work is distinguished by the caliber of the contributors, the significance of the topics addressed in the current era of reform in mathematics education, and the diversity of perspectives taken to a common set of themes and issues. The book is intended for those who are seeking to expand their understanding of the complexity of learning in order to enhance the learning experiences students have in schools, primarily researchers, instructional designers, and graduate students in mathematics education, as well as those in other fields including science education, instructional design in general, discourse theory, and semiotics.

Coach the Person, Not the Problem Nov 11 2020 From a founding member of the coaching movement comes a detailed guide to mastering one of a coach's toughest skills: thoughtfully reflecting clients' words and expressions back to them so they see themselves and their world through new eyes. "Coaches rely far too much on asking open-ended questions," says Marcia Reynolds. But questions only seek answers--inquiry provides insight. When, instead of just questions, clients hear their thoughts, opinions, and beliefs spoken by someone else, it prompts them to critically consider how their thinking affects their goals. Reynolds cites the latest brain science to show why reflective inquiry works and provides techniques, tips, and structures for creating breakthrough conversations. This book will free coaches from the cult of asking the magical question by offering five essential practices of reflective inquiry: focus on the person, not the problem; summarize what is heard and expressed; identify underlying beliefs and assumptions; unwrap the desired outcome; and articulate insights and commitments. Using these practices, combined with a respectful and caring presence, helps create a space where clients feel safe, seen, and valued for who they are. Coaches become change agents who actively recharge the human spirit. And clients naturally dive deeper and develop personalized solutions that may surprise even the coach.

A 3D Visualization Teaching-Learning Trajectory for Elementary Grades Children Oct 30 2019 This monograph describes the development and use of a 3D visualization teaching-learning trajectory for elementary age learners. Using design research principles, the authors developed this trajectory using the NCTM recommendations and the Spatial Operational Capacity (SOC) theoretical framework to guide lesson development. The SOC framework utilizes actual 3D models, 2D and abstract representations of the actual models, and, a dynamic computer interface, the Geocadabra Construction Box, which integrates these representations dynamically in real time. The work begins with describing the theoretical SOC frameworks that guided the study, the inquiry-based learning focus, the research method used, and informal pre-program interviews with participant children. The next chapter describes introductory activities used to orient the children to the 3D objects that they used throughout the program. The book then focuses on the development of abstract top-view numeric plan representations leading to representations of rectangular prisms, followed by front-side-top view representations. The last chapter shows how numeracy was integrated into the program to support the demanding official mathematics curriculum.

Reinventing Organizations May 30 2022 Bahnbrechend. Inspirierend. Eines der faszinierendsten Bücher zur Organisationsentwicklung des letzten Jahrzehnts. Dies ist ein sehr wichtiges Buch, bedeutsam in vielerlei Hinsicht: Sowohl angesichts der bahnbrechenden Forschungsergebnisse, Einsichten, Ratschläge und Empfehlungen, die es enthält, als auch aufgrund der genauso wichtigen Fragen und Herausforderungen, auf die es hinweist.“ Ken Wilber aus dem Nachwort „Die programmatische Aufforderung ‚Reinventing Organizations‘ mündet in einem Organisationsmodell, das Strukturen wie Praktiken nach neuartigen, evolutionär-integralen Prinzipien ausrichtet. Im Ergebnis steht die Erkenntnis, dass das Leben und Arbeiten in Organisationen, ebenso wie deren Leistungsbeiträge für die Gesellschaft, radikal zum Positiven verändert werden

können. Aber hierzu muss nicht zuletzt die Führung eine fortgeschrittene Entwicklungsebene erreichen.“ Prof. Dr. Jürgen Weibler, Autor des Standardwerkes „Personalführung“ „Das Buch gibt Hoffnung und ganz konkrete Hilfe zur Lösung der Probleme, die wir an der Schwelle von der Postmoderne zu einem neuen Zeitalter erleben, in denen die traditionellen oder modernen Organisationsformen den Anforderungen und Bedürfnissen der Menschen nicht mehr gerecht werden.“ Eine Leserin auf Amazon.com Frederic Laloux hat mit *Reinventing Organizations* das Grundlagenbuch für die integrale Organisationsentwicklung verfasst. Die Breite sowie Tiefe seiner Analyse und Beschreibung – ganzheitlich, selbstorganisierend und sinnerfüllend operierender Unternehmen – ist einzigartig. Das erste Kapitel des Buches gibt einen Überblick über die historische Entwicklung von Organisationsparadigmen, bevor im zweiten Kapitel Strukturen, die Praxis und die Kultur von Organisationen, die ein erfüllendes und selbstbestimmtes Handeln der Menschen ermöglichen, anhand von ausgewählten Beispielen vorgestellt werden. Auf die Bedingungen, Hindernisse sowie Herausforderungen bei der Entwicklung dieser evolutionären Organisationen wird in Kapitel 3 eingegangen. Hier entwirft Frederic Laloux einen Leitfaden für den Weg hin zu einer ganzheitlich orientierten und sinnstiftenden Organisation. Frederic Laloux ist auch aufgrund dieses Buches ein mittlerweile gefragter Berater und Coach für Führungskräfte, die nach fundamental neuen Wegen der Organisation eines Unternehmens suchen.
