But the fact that these drives also have their own very special peculiarities is another matter. Franz Kayser is a specialist in petrol engines as model aircraft drives and knows their

strengths, weaknesses and all the challenges associated with them. In his column "Hier riecht's nach Sprit" ("It smells like fuel here") in the trade magazine FMT, he regularly addresses the special features of these engines and reveals tips and tricks for conversion and operation. This book is based on the experience of this column and provides the fan of petrol engines - and those who want to become one - with the basics and comprehensive information. "From practice, for practice" is the motto of this book, so that the petrol engine not only fascinates, but also runs smoothly and reliably. From the content: • A look under the skin, general engine
