**Clique Here: A Wish Novel** Jan 03 2020 From middle-grade darling Anna Staniszewski comes the story of a girl who might just have being popular down to a science. Lily loves science and hanging out with her best friend, Katie. But after a really embarrassing incident, she jumps at the chance to switch schools. She's ready to start over. With the scientific process, anything is possible! After a summer spent coming up with theories and prepping for the switch, Lily starts her new school as Blake, a popular girl with a cool name, ready to climb the social ladder. But every hypothesis has its flaws, and Blake will have to adjust her experiment as she adjusts to her new classmates. And when Katie suddenly shows up in Blake's world, things get messy. Who's got the winning formula: Blake or Lily?

The 7 Core Teacher Resource Pack contains a wealth of resources to support and extend the work covered in the 7 Core pupil book and Teacher Planning Pack.

**A School Without Sanctions Mar 17 2021** 'I believe this book will change the conversation in schools on children's behaviour.' - Dr Luna Centifanti A School Without Sanctions offers an innovative approach to behaviour management in schools, prioritising compassion and behaviour modification over punishment. Drawing on their award-winning methods, Steven Baker and Mick Simpson explain why challenging behaviour occurs and provide a toolbox of non-confrontational approaches that will benefit the whole school community. When Steven and Mick set out to transform their school's approach to behaviour, it changed everything. With the help of Dr Alice Jones Bartoli at Goldsmiths, they developed a sanction-free approach in their special school for boys with social, emotional and mental health (SEMH) difficulties. Far from descending into anarchy, lessons began to improve and student-staff relationships flourished. The school is now rated outstanding in all areas, and more importantly, student outcomes have been remarkable. Steven and Mick apply this experience, as well as their work in pupil referral units and young offender institutions, to explore their strategies for managing behaviour without the need for zero tolerance, discussing exclusions, trauma, motivation and engagement along the way. Rooted in neuroscience and evolutionary psychology, this book will revolutionise the way you think about behaviour management, help boost student mental health and academic achievement, and protect teacher wellbeing.

**It's Not about Childhood Obesity Dec 14 2020** This guide is a handy resource for anyone struggling with obesity—especially children and teens. Dr. Olga Vaca Durr offers actionable advice for teens and children who are fast approaching obesity but who want to learn how to turn their lives around and live a healthy lifestyle instead. Providing help for eating healthy and for getting

physically active to meet the challenge of living a healthy life, Vaca Durr also explores statistics illustrating the severity of the problem of childhood obesity today, as well as detailed charts and graphs to support her research. It's Not about Childhood Obesity includes specifics on a variety of topics: • Physical activity and fitness • Statistics, data, and research on childhood obesity • Potential effects of childhood obesity It also presents advice for developing a plan to combat childhood obesity and creating a "healthy for life" lifestyle. It's Not about Childhood Obesity seeks to enable everyone to better understand this issue and the challenge that it presents today. By focusing on the effects of childhood obesity insures that any child can achieve a long and healthy life through physical fitness and activity and by adopting a diet of healthy foods.

**Forging Connections in Early Mathematics Teaching and Learning** Sep 30 2019 This edited book promotes thinking, dialogue, research and theorisation on multiple ways of making connections in mathematics teaching and learning in early childhood education. The book addresses some key challenges in research, policy and practice in early childhood mathematics education. It examines diverse ways for learning experiences to connect young children to mathematics, and the importance of forging connections between mathematics and young children's lives as key elements in their engagement with mathematics. Each chapter provides research or theoretical provocations and pedagogical implications for connecting children's lived experiences and ways of learning in mathematics teaching. The chapters are drawn from a range of international authors who raise important ideas within the overall context of current research and consider the theoretical and practical implications of their research. As such, the book advances current thinking on mathematics teaching and learning for children in the early years from birth to eight years with an emphasis on children aged birth to 5 years. It considers the purpose and value in connecting mathematics teaching and learning to children's lives, and provides provocations for both educators and researchers on the many under-researched and under-represented aspects of early years mathematics teaching and learning.

**Key Maths** Jun 27 2019 Developed for the AQA Specification, revised for the new National Curriculum and the new GCSE specifications.
