User's Guide to Powder Coating, 4th Edition

Jan 17 2021 For nearly 20 years, 'Users Guide to Powder Coating' has been the leading hands-on guide to power coating technology. Now in its 4th edition, the book addresses recent developments which have contributed to powder coating's ever-increasing favorability over liquid coating. Since the publication of the last edition, this process has been adapted to a wider range of applications, notably for high-temperature and temperature-sensitive products. Equipment has been greatly improved, achieving faster color change, increasing transfer efficiency, and reducing overall powder usage. Environmental requirements have prompted many companies to switch to powder coating. 'Users Guide to Powder Coating, Fourth Edition' combines information on the latest breakthroughs in the industry (notable ultraviolet-curable materials for plastic and wood products, and improved systems) and tried-and-true guidelines from the previous edition (including factors like material selection, design considerations, surface preparation, quality control and testing, trouble shooting and safety, and more), so you can achieve superior finishes with efficiency.

Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices skyrocketed. Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.
