Social Gerontology Sep 12 2021 This textbook provides a survey of the field of social gerontology, taking a multi-disciplinary approach to the social aspects of aging and/or working with older adults. The authors demonstrate how age-related changes in the biological, functional, and psychological domains can influence the older person's interactions with his/her social and physical environment. They offer a view that presents aging positively, portraying concepts of active aging and resiliency, and defining "productive aging" by elaborating on the numerous ways elders contribute to society and their families. Based on the latest research findings, it offers understanding to critical issues of aging, attending to differences by age and cohort, gender, ethnic minority status, sexual orientation, and socio-economic status.

Mastering Endo-Laparoscopic and Thoracoscopic Surgery Aug 19 2019 This is an open access book. The book focuses mainly on the surgical technique, OR setup, equipments and devices necessary in minimally invasive surgery (MIS). It serves as a compendium of endolaparoscopic surgical procedures. It is an official publication of the Endoscopic and Laparoscopic Surgeons of Asia (ELSA). The book includes various sections covering basic skills set, devices, equipments, OR setup, procedures by area. Each chapter cover introduction, indications and contraindications, pre-operative patient's assessment and preparation, OT setup (instrumentation required, patient's position, etc.), step by step description of surgical procedures, management of complications, post-operative care. It includes original illustrations for better understanding and visualization of specific procedures. The book serves as a practical guide for surgical residents, surgical trainees, surgical fellows, junior surgeons, surgical consultants and anyone interested in MIS. It covers most of the basic and advanced laparoscopic and thoracoscopic surgery procedures meeting the curriculum and examination requirements of the residents.

Plunkett's E-Commerce & Internet Business Almanac 2009 Oct 13 2021 Market research guide to e-commerce and internet business a tool for strategic planning, competitive intelligence, employment searches or financial research. Contains trends, statistical tables, and an industry glossary. Includes one page profiles of e-commerce and internet business firms - includes addresses, phone numbers, executive names.
Krause's Food & the Nutrition Care Process, Iranian edition E-Book Jul 22 2022 Krause's Food & the Nutrition Care Process, Iranian edition
Krause's Food & the Nutrition Care Process - E-Book Sep 24 2022 A trusted classic for over 50 years, Krause's Food and the Nutrition Care Process, 14th Edition presents the most cutting-edge and up-to-date dietetics content available in this ever-changing field. Nicknamed the "nutrition bible", students and practitioners alike turn to its current, comprehensive content, engaging pedagogy and design, and logical presentation of information. This new edition includes the 2015 Dietary Guidelines for Americans, more visuals, and highlighted Clinical Case Studies, Clinical Insights, and Clinical Applications boxes that help translate scientific knowledge into practical patient care. Written by nearly 50 nationally recognized writers, researchers, and practitioners, it covers nutrition assessment and intervention, the nutritional needs of individuals in

different stages of the life cycle, nutrition for health and fitness, and medical nutrition therapy. Authored by clinical specialists, ensuring in-depth coverage with many practical and evidence-based recommendations. Sample Nutrition Diagnosis boxes present a problem, its etiology, and its signs and symptoms before concluding with a sample nutrition diagnosis, providing both students and practitioners with real-life scenarios they may encounter in practice. UNIQUE! Pathophysiology algorithms present the cause, pathophysiology, and medical nutrition management for a variety of disorders and conditions to help you provide optimal nutritional care. Chapters on nutrition in each of the life cycle phases, include: Nutrition in Pregnancy and Lactation Nutrition in Infancy Nutrition in Childhood Nutrition in Adolescence Nutrition in the Adult Years Nutrition in Aging Focus On boxes provide thought-provoking information on key concepts for well-rounded study and further discussion within the classroom. New Directions boxes point you toward additional research on emerging areas in nutrition therapy. Clinical Insight boxes expand on clinical information, highlight areas that may go unnoticed, and contain clinical resources for students and practitioners. Chapters on the nutritional care of the low-birth-weight and premature infant feature information on how to support their health, growth, and development. Useful websites direct you to online resources that relate to chapter topics. Key terms are defined at the beginning of each chapter and bolded within the text where they are discussed in more detail.

EBOOK: Reconceptualising Evaluation in Higher Education: The Practice Turn May 20 2022 A considerable amount of money is invested in an ongoing basis on large scale projects to enhance the quality of teaching and learning within the higher education sector. Examples from the UK include the Teaching Quality Enhancement Fund and the creation of CELTS - Centres for Excellence in Learning and Teaching. Similar initiatives can be found in most other Westernized countries. These projects (and other, smaller institutional projects) require evaluation, but the higher education sector has not conceptualized such evaluation work and therefore the opportunity to understand the value of such projects is frequently missed. Reconceptualising Evaluative Practices in HE aims to aid understanding, drawing on a set of evaluative practices from the UK and internationally to foster understanding, which will be of genuine value and relevance to higher education over an indefinite period of time.

Research Anthology on Usage and Development of Open Source Software Apr 26 2020 The quick growth of computer technology and development of software caused it to be in a constant state of change and advancement. This advancement in software development meant that there would be many types of software developed in order to excel in usability and efficiency. Among these different types of software was open source software, one that grants permission for users to use, study, change, and distribute it freely. Due to its availability, open source software has quickly become a valuable asset to the world of computer technology and across various disciplines including education, business, and library science. The Research Anthology on Usage and Development of Open Source Software presents comprehensive research on the design and development of open source software as well as the ways in which it is used. The text discusses in depth the way in which this computer software has been made into a collaborative effort for the advancement of software technology. Discussing topics such as ISO standards, big data, fault prediction, open collaboration, and software development, this anthology is essential for computer engineers, software developers, IT specialists and consultants, instructors, librarians, managers, executives, professionals, academicians, researchers, and students.

Annual Report of the Commissioner of Patents Jun 09 2021 Prior to 1862, when the Department of Agriculture was established, the report on agriculture was prepared and published by the Commissioner of Patents, and forms volume or part of volume, of his annual reports, the first being that of 1840. Cf. Checklist of public documents ... Washington, 1895, p. 148.

Harnessing the Internet of Everything (IoE) for Accelerated Innovation Opportunities May 28 2020 As innovators continue to explore and create new developments within the fields of artificial intelligence and computer science, subfields such as machine learning and the internet of things (IoT) have emerged. Now, the internet of everything (IoE), foreseen as a cohesive and intelligent connection of people, processes, data, and things, is theorized to make internet connections more valuable by converting information into wise actions that create unprecedented capabilities, richer experiences, and economic opportunities to all players in the market. Harnessing the Internet of Everything (IoE) for Accelerated Innovation Opportunities discusses the theoretical, design, evaluation, implementation, and use of innovative technologies within the fields of IoE, machine learning, and IoT. Featuring research on topics such as low-power electronics, mobile technology, and artificial intelligence, this book is ideally designed for computer engineers, software developers, investigators, advanced-level students, professors, and professionals seeking coverage on the various contemporary theories, technologies, and tools in IoE engineering.
