nurse enrolled in an RN-to-BSN program, this text guides nurses through an interactive critical thinking process to become effective and confident nurse leaders. All nurses involved with direct patient care already rely on similar strategies to oversee patient safety, make care decisions, and integrate plan of care in collaboration with patients and families. This text expands upon that knowledge and provides a firm base to reach the next steps in academia and practice, enabling the BSN-prepared nurse to tackle serious issues in care delivery with a high level of self-

awareness and skill. Leadership and Management Competence in Nursing Practice relies on a keen understanding of what experienced nurses already bring to the classroom. This text provides a core framework and useful skills and strategies to successfully lead nursing and healthcare forward. Clear, concise chapters cover leadership skills and personal attributes of leaders with minimal repetition of material covered in associate's degree programs. Content builds on the framework of AACN Essentials of Baccalaureate Education, IOM Competencies, and

QSEN KSAs. Each chapter presents case scenarios to promote critical thinking and decision-making. Self-assessment tools featured throughout the text enable nurses to evaluate their current strengths, areas for growth, and learning needs. Key Features: Provides information needed for the associate's degree nurse to advance to the level of professionally prepared baccalaureate degree nurse Chapters contain critical thinking exercises, vignettes, and case scenarios targeted to the RN-to-BSN audience Self-assessment tools included in most chapters to help the

reader determine where they are now on the topic and to what point they need to advance to obtain competence and confidence in the professional nursing role

Provides information and skills needed by nurses in a variety of healthcare settings Includes an instructor's manual and PowerPoint slides

addresses recent changes impacting healthcare and many other topics including information on the increased need for primary care providers, how full practice authority has been implemented in different states, the need for an enhanced RN role in ambulatory care, and ongoing changes to the Affordable Care Act. This edition describes the distinct role of nurses impacting policies on the front lines of healthcare. Current issues with detailed examples of how nurses can exert influence at local, state, national, and global levels at each step of the policymaking process are

presented. This second edition emphasizes collaboration within healthcare institutions, professional organizations, and government for the development of policies from bedside to boardroom. Using descriptive cases, the book delves into the growing role of nurses in elected and appointed office. The book clarifies the process of identifying issues that need a policy solution. A timely contribution focuses on evaluating policy sources, such as "Fake News." It stresses how evidence must be used to strengthen policy initiatives. Woven throughout are essential

themes basic to healthcare: ethics, leadership, safety, care access, and quality of care. New to the Second Edition: Revised chapters featuring inspirational, motivational, and practical stories representing different steps of the policy process A new chapter, "Valuing Global Realities for Health Policy," emphasizing issues that unite nurses globally and the role of nurses as global citizens Expanded content on steps of policy analysis and evaluating evidence to support policy An appraisal and evaluation of converged media, including "Fake News" Guidance on working ~~with the~~

Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the

different functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking

questions. Separate chapters on community health initiatives thoroughly describe different approaches to promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. NEW! ### **The Great War and Scottish Nurses' Diaries**

Mar 31 2022 This book analyses the representations of the different instances of war in the letters and diaries of the nurses and doctors of the Scottish Women's Hospitals who worked in Romania during the Great War. These nurses detailed their experiences into journals through literary diegesis that included minute observations on their work, surroundings, and different developments of the

front, as well as their own interpretations of, and impressions on, their work and the war's destructive character.

Generally, the approaches to the Great War by women who witnessed and lived it have either been gender-oriented or, simply, seen as *petit histoire(s)*. This research represents a complementary addition to the existing literature, through its focus on the experience of the women on the fighting front, looking at it from the double perspective of autobiographical writing and war testimony.
