success in your career.

Operational Expert System Applications in Canada May 11 2020 This book is part of a new series on operational expert systems worldwide. Expert systems are now widely used in different parts of the world for various applications. The past four years have witnessed a steady growth in the development and deployment of expert systems in Canada. Research in this field has also gained considerable momentum during the past few years. However, the field of expert systems is still young in Canada. This book contains 13 chapters contributed by 31 experts from both universities and industries across Canada covering a wide range of applications related to electric power and circuit boards, health and medicine, the legal field, transportation and decision making.

Responsive Design Workflow Sep 26 2021 Forget fixed-width Photoshop comps, bloated client requirements, and overproduced wireframes. Yesterday's web design deliverables fail to take into account the demands of responsive solutions. Design workflow hasn't really changed, but best practices have. This book shows you how to adapt to the new paradigm and create sites for today's web. Some of the strategies you'll learn include: how to better manage client expectations and development requirements a practical approach for designing in the browser documentation methods that outperform static Photoshop comps a method for visualizing the points where responsive designs change After absorbing the lessons in this book, you'll leave behind old-school workflows and start working in ways that are uniquely suited to today's multi-platform web.

Guide for Consultant Contracting Feb 06 2020 The use of engineering consultants by state transportation agencies continues to be important in providing the appropriate solutions to transportation needs. This publication replaces the Guide for Contracting, Selecting and Managing Consultants in Preconstruction Engineering, published by AASHTO in 1996. In order to assess current practices, questionnaires were developed for both state and consultant practitioners. The responses showed significant growth in the volume of work done by consultants and in the range of services provided by consultants. The results of these surveys, along with the collective experience and expertise of the technical committee membership, were used to restructure much of the guide and to update and expand the discussion of current practices for the effective use of consultants.

Urban Street Stormwater Guide Jan 07 2020 The Urban Street Stormwater Guide begins from the principle that street design can support--or degrade--the urban area's overall environmental health. By incorporating Green Stormwater Infrastructure (GSI) into the right-of-way, cities can manage stormwater and reap the public health, environmental, and aesthetic benefits of street trees, planters, and greenery in the public realm. Building on the successful NACTO urban street guides, the Urban Street Stormwater Guide provides the best practices for the design of GSI along transportation corridors. The state-of-the-art solutions in this guide will assist urban planners and designers, transportation engineers, city officials, ecologists, public works officials, and others interested in the role of the built urban landscape in protecting the climate, water quality, and natural environment.

Ensuring National Biosecurity Aug 02 2019 Ensuring National Biosecurity: Institutional Biosafety Committees reviews the various responsibilities and associated challenges Institutional Biosafety Committees (IBCs) face and proposes changes that may help improve this system and increase national biosecurity and worker safety. In recent years IBCs in academic and other institutions have been tasked with increasing levels of responsibility, overseeing work with recombinant genetic material and hazardous agents. IBC members often lack the training to effectively ensure that the work performed is truly safe for scientists and the general community, and so increasingly rely upon the expertise of the researchers themselves. With the proposed US dual-use research policies soon to be implemented, this strain may increase. This book provides readers with the necessary information to be able to enhance national biosecurity within the US, EU, Australia, New Zealand, Japan and more. Ensuring National Biosecurity is an invaluable reference for biosafety professionals or for researchers who need to understand the regulatory landscape that impacts their research. Examines and assesses the current state of Institutional Biosafety Committees (IBCs) Collates contributions from world-renowned experts in fields as diverse as research compliance, law and astrobiology Reflects an international perspective on regulatory biosecurity and biosafety

Environmental Protection Agency Graphic Standards System Mar 01 2022 In 1970, President

Richard Nixon created the Environmental Protection Agency (EPA) to confront environmental pollution and protect the health of the American people. One of the EPA's top priorities was consolidating numerous state offices to more efficiently carry out its goal of "working for a cleaner, healthier environment for the American people." But there was one area in which the EPA--like many government agencies of the time--was terribly inefficient: their graphic design and communications department. Millions of dollars were being wasted annually due to nonstandardized formats, inefficient processes and almost everything being designed from scratch. In 1977 the EPA began working with the legendary New York design firm Chermayeff & Geismar (now Chermayeff & Geismar & Haviv, or CGH), responsible for some of the most recognizable visual identities in the world, such as Chase Bank, PBS, National Geographic, the Smithsonian Institution, Mobil Oil and NBC. Partners Ivan Chermayeff, Tom Geismar and Steff Geissbuhler set about tackling this problem. The result was the 1977 US Environmental Protection Agency Graphic Standards System. Forty years later, Jesse Reed & Hamish Smyth--creators of the NYCTA and NASA Graphics Standards Manual reissues--have partnered with CGH and AIGA, the US's oldest and largest professional organization for design, to publish this classic graphic standards EPA manual as a hardcover volume. Each page is reproduced at the same size as the original three-ring binder pages, using the same vibrant Pantone inks with a total of 14 colors.
