IJER Vol 7-N2 Jul 03 2022 The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer-reviewed scholarly publication that combines authors' voices without regard for the political affiliations perspectives, or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes, but is not limited to, inquiry based and opinion pieces on developments in such areas as policy, administration, curriculum, instruction, law, and research. IJER should thus be of interest to professional educators with decision-making roles and policymakers at all levels turn since it provides a broad-based conversation between and among policymakers, practitioners, and academicians about reform goals, objectives, and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U.S. and the world.

[The Blue-Green Algae](#) Feb 27 2022 The Blue-Green Algae attempts to assemble a unified picture of blue-green algae as living organisms. It describes the organism's general features of form and structure, cellular organization, cell biology, gas vacuoles, and movements. The book addresses the culture, nutrition, growth, photosynthesis, chemosynthesis, heterotrophy, respiration, nitrogen metabolism, differentiation, reproduction, and life cycles of the blue-green algae. The organisms' freshwater and terrestrial ecology, pathogens, symbiosis, evolution, and phylogeny are also explained. These organisms form a substantial fraction of the biomass in several important types of habitat. Consequently, it is desirable to understand their activities if natural resources are to be conserved and used to best advantage. This book will be useful to students and research workers in this field of interest.

Landmark Cases in Public International Law Feb 15 2021 The past two hundred years have seen the transformation of public international law from a rule-based extrusion of diplomacy into a fully-fledged legal system. Landmark Cases in Public International Law examines decisions that have contributed to the development of international law into an integrated whole, whilst also creating specialised sub-systems that stand alone as units of analysis. The significance of these decisions is not taken for granted, with contributors critically interrogating the cases to determine if their reputation as 'landmarks' is deserved. Emphasis is also placed on seeing each case as a diplomatic artefact, highlighting that international law, while unquestionably a legal system, remains reliant on the practice and consent of states as the prime movers of development. The cases selected cover a broad range of subject areas including state immunity, human rights, the environment, trade and investment, international organisations, international courts and tribunals, the laws of war, international crimes, and the interface between international and municipal legal systems. A wide array of international and domestic courts are also considered, from the International Court of Justice to the European Court of Human Rights, World Trade Organization Appellate Body, US Supreme Court and other adjudicative bodies. The result is a three-dimensional picture of international law: what it was, what it is, and what it might yet become.

[Advancing Development](#) Apr 07 2020 This book reflects on current thinking in development economics and on what may happen over the next two decades. As well as studying development economics in retrospect, the volume explores the current debates and challenges and looks forward at the problems that affect the global capacity to achieve the Millennium Development Goals.

[In India and East Africa](#) [E-Indiya nase East Africa](#) Oct 02 2019 A politician's journey to bring home Mahatma Gandhi's teachings home to South Africa in the wake of WWII In November 1949, Davidson Don Tengo (D.D.T.) Jabavu, the South African politician, Methodist lay preacher and retired professor of African languages and Latin at Fort Hare University in the Eastern Cape, set out on a four-month trip to attend the World Pacifist

Meeting in India. The conference brought together delegates from over thirty countries to reflect on how Mahatma Gandhi's life and teachings could inform pacifist work in the post-World War II era. Jabavu wrote an isiXhosa account of his journey up the east coast of Africa and to different parts of India which was first published in 1951 by Lovedale Press. His narrative contains wide-ranging reflections on the fauna and flora of the changing landscape, on intriguing social interactions during his travels, and on the conference itself, where he considered what lessons Gandhian principles might yield for oppressed South Africans engaged in struggles for freedom and dignity. He incorporates accounts of chance meetings with important figures of post-independence India and of the anti-colonial struggle in East Africa, as well as with members of the American civil rights movement. His commentary on non-violent resistance, and on the dangers of nationalism when coupled with militarism and racism, enriches the existing archive of intellectual and political exchange between Africa and India from a black South African perspective. This new edition includes Jabavu's travelogue in the original isiXhosa, with an English translation by the late anthropologist Cecil Wele Manona. Tina Steiner's introductory chapter examines the networks of international solidarity and friendship that Jabavu helped to strengthen in the course of his travels. A chapter by Mhlobo W. Jadezweni, whose updating of the original isiXhosa orthography has made Jabavu's text accessible to new generations of readers, considers the richness of Jabavu's isiXhosa style as a contribution to the archive of great African-language literature. Catherine Higgs provides biographical sketches of D.D.T. Jabavu and Cecil Wele Manona which situate this travelogue within the broader context of their lives. Evan M. Mwangi's Afterword is a reflection on the historical and political significance of making African-language texts available to readers across Africa.

The Routledge Handbook of Planning History Aug 12 2020 The Handbook of Planning History offers a comprehensive interdisciplinary overview of planning history since its emergence in the late 19th century, investigating the history of the discipline, its core writings, key people, institutions, vehicles, education, and practice. Combining theoretical, methodological, historical, comparative and global approaches to planning history, the Handbook explores the state of the discipline, its achievements and shortcomings and future challenges. A foundation for the discipline and a springboard for scholarly research, the Handbook of Planning History explores planning history on an international scale in forty-two chapters, providing readers the unique opportunities for comparison. The diverse contributions open up new perspectives on the many ways in which contemporary events, changing research needs, and cutting-edge methodologies shape the writing of planning history

Sustainable Agriculture Volume 2 Feb 04 2020 This book gathers review articles that analyze current agricultural issues and knowledge, then propose alternative solutions. It will therefore help all scientists, decision-makers, professors, farmers and politicians who wish to build a safe agriculture, energy and food system for future generations.

The Future of Asian Trade Deals and IP Mar 19 2021 The first part of this open access book sets out to re-examine some basic principles of trade negotiation, such as choosing the right representatives to negotiate and enhancing transparency as a cure to the public's distrust against trade talks. Moreover, it analyses how the Comprehensive and Progressive Agreement for the Trans-Pacific Partnership (CPTPP) might impact on the Regional Comprehensive Economic Partnership's (RCEP) IP chapter and examines the possible norm setters of Asian IP. It then focuses on the People's Republic of China's (PRC) trade and IP strategy against the backdrop of the power games between the PRC, India and the US. The second part of the book reflects on issues related to investor-state dispute settlement and its relationship with IP, such as how to re-calibrate the balance in international investment arbitration, and whether compulsory license of IP constitutes expropriation in India, the PRC and select ASEAN countries. The third part of the book questions and strives to improve some of the proposed IP provisions of CPTPP and RCEP and to redefine some aspects of international IP norms, such as: pre-grant patent opposition and experimental use exception; patent term extension; patent linkage and data exclusivity for the pharmaceutical sector; plant variety protection; pre-established damages for copyright infringement; and the restructuring of copyright limitations in the public interest. The open access edition of this book is available under a CC BY-NC-ND 3.0 licence on www.bloomsburycollections.com. Open access was funded by the Applied Research Centre for Intellectual Assets and the Law in Asia, School of Law, Singapore Management University.

The Interpretation of International Law by Domestic Courts Dec 04 2019 The Interpretation of International Law by Domestic Courts assesses the growing role of domestic courts in the interpretation of international law. It asks whether and if so to what extent domestic courts make use of the international rules of interpretation set forth in the Vienna Convention on the Law of Treaties. Given the expectation that rules of international law are to have a uniform interpretation and application throughout the world, the practice of domestic courts is considerably more diverse. The contributions to this book analyse three key questions: first, whether international law requires a coherent interpretive approach by domestic courts. Second, whether a common or convergent methodological outlook can be found in domestic court practice. Third, whether a common interpretive approach is desirable from a normative perspective. The book identifies a considerable tension between international law's ambition for universal and uniform application and a plurality of different approaches. This tension between unity and diversity is analysed by a group of leading international lawyers from a wide range of geographical, disciplinary and methodological approaches. Drawing on domestic practice of number of jurisdictions including, among others, Colombia, France, Japan, India, Israel, Mexico, South Africa, the United Kingdom and the United States, the book puts the interpretive practice of domestic courts in a wider context. Its chapters offer doctrinal, practical as well as theoretical perspectives on a central question for international law.

Reconciliation and the Search for a Shared Moral Landscape Jul 23 2021 This book focuses on reconciliation in Northern Ireland and South Africa. The overarching aim is to identify «formal and material conditions», or prerequisites, for reconciliation and moral community (or more precisely a «shared moral landscape»). In both countries obstacles to reconciliation can be found in the following elements of a «moral landscape»: Experiences of trauma, separation and inequalities; divergent views of the conflict and of «the other»; opposing identifications and loyalties; certain norms for interaction and contestant interpretations of values such as «peace» and «justice». This book describes how these obstacles have been addressed in: 1) Efforts, particularly by ecumenical groups, to bridge the Catholic/Protestant divide in Northern Ireland. 2) The work of, and debates surrounding, the South African Truth and Reconciliation Commission. On the basis of these dialogues in adverse circumstances, this study then suggests some prerequisites for «emancipatory conversations» - a central question in the search for a global ethics.

Soil Biochemistry May 01 2022 This book reviews some aspects of soil biochemistry, including the biochemical turnover of specific elements and organic compounds in soil; the properties and functions of soil enzymes; and the structure, distribution and pathways of metabolism of organic compounds.

The Lentil Jul 11 2020 This book provides a comprehensive review of current lentil research. It contains 26 chapters covering topics on lentil global production, supply and demand; origin, phylogeny, domestication and spread; plant morphology, anatomy and growth habit; agroecology and

adaptation; genetic resources collection, characterization, conservation and documentation; genetic enhancement for yield and yield stability; breeding for short season environments; improvement in Developed Countries; advances in molecular research; breeding and management to minimize the effects of drought and improve water use efficiency; soil nutrient management; cropping systems; biological nitrogen fixation and soil health improvement; mechanization; disease, pest and weed management; seed quality; postharvest processing and value addition; and food preparation and use. The last chapter presents field-based evidence of adoption of improved lentil cultivars from two cases: Bangladesh and Ethiopia.

Prehistoric Intensive Agriculture in the Tropics Nov 02 2019

Nitrogen Fixation in Agriculture, Forestry, Ecology, and the Environment Jan 29 2022 Sustainability has a major part to play in the global challenge of continued development of regions, countries, and continents all around the World and biological nitrogen fixation has a key role in this process. This volume begins with chapters specifically addressing crops of major global importance, such as soybeans, rice, and sugar cane. It continues with a second important focus, agroforestry, and describes the use and promise of both legume trees with their rhizobial symbionts and other nitrogen-fixing trees with their actinorhizal colonization. An over-arching theme of all chapters is the interaction of the plants and trees with microbes and this theme allows other aspects of soil microbiology, such as interactions with arbuscular mycorrhizal fungi and the impact of soil-stress factors on biological nitrogen fixation, to be addressed. Furthermore, a link to basic science occurs through the inclusion of chapters describing the biogeochemically important nitrogen cycle and its key relationships among nitrogen fixation, nitrification, and denitrification. The volume then provides an up-to-date view of the production of microbial inocula, especially those for legume crops.
