Academic & Scientific Poster Presentation Aug 04 2022 This book offers the first comprehensive guide to poster presentation at academic, scientific and professional conferences. Each chapter explores different factors that impact upon how posters function, and how they fit within today's conference practices, as well as provides guidance on how to address compilation and presentation issues with the poster medium. Drawing from fields of education, psychology, advertising and other areas, the book offers examples of how theories may be applied to practice in terms of both traditional paper and electronic poster formats. Importantly, the book offers a critical examination of how academic and scientific posters are able to achieve their potential for knowledge dissemination, networking and knowledge transfer. The many new and challenging findings provide an evidence-based approach to help both novice and experienced presenters compile effective poster presentations, and to see how poster presentations can best be used to share knowledge, facilitate networking, and promote dialogue. Additionally, educators, employers, and conference organizers may use this book to re-evaluate how conferences meet the needs of today's globally connected peer groups, and the benefit they provide at individual and group levels.

Posters for Peace Mar 31 2022 By the spring of 1970, Americans were frustrated by continuing war in Vietnam and turmoil in the inner cities. Students on American college campuses opposed the war in growing numbers and joined with other citizens in ever-larger public demonstrations against the war. Some politicians—including Ronald Reagan, Spiro Agnew, and Richard Nixon—exploited the situation to cultivate anger against students. At the University of California at Berkeley, student leaders devoted themselves, along with many sympathetic faculty, to studying the war and working for peace. A group of art students designed, produced, and freely distributed thousands of antiwar posters. Posters for Peace tells the story of those posters, bringing to life their rhetorical iconography and restoring them to their place in the history of poster art and political street art. The posters are vivid, simple, direct, ironic, and often graphically beautiful. Thomas Benson shows that the student posters from Berkeley appealed to core patriotic values and to the legitimacy of democratic deliberation in a democracy—even in a time of war.

Action ART Mar 19 2021 Action Art: Hands-On Active Art Adventures is A Collection of Over 100 Active Hands-On Art Experiences for Children 2-12, Full of Adventure, Movement, and Discovery. FOR SCHOOLS • HOMESCHOOLS • MUSEUMS• LIBRARIES • CHILDCARE • HOME Shelving: ART ACTIVITIES • EDUCATION • PARENTING Over 100 action-packed art activities bring discovery and adventurous creativity to children's art experiences that will delight and challenge kids of all ages.

Each child-tested art activity is grouped into engaging action categories including: 1.) Smacking • Squeezing • Tapping 2.) Rolling • Spinning • Swinging 3.) Blowing • Exploding • Smooshing 4.) Tools • Toys • Utensils 5.) Up • Down • All Around Full color photographs highlight all activities including painting, photography, collage and sculpture, each with helpful icons indicating levels for both children and adults. Action Art experiences are built on the knowledge that art for children is a creative process and not just a finished product. MaryAnn Kohl is famous around the world for encouraging children to experience creative art exploration best known as "process art". Action Art offers 5 chapters of exciting and adventurous creative art activities, all with surprise outcomes, including – Blowing Glitter Dancing Blottos Bubble Wrap Boot Walk Clear Color Squish

HCI International 2019 - Posters May 01 2022 The three-volume set CCIS 1032, CCIS 1033, and CCIS 1034 contains the extended abstracts of the posters presented during the 21st International Conference on Human-Computer Interaction, HCII 2019, which took place in Orlando, Florida, in July 2019.The total of 1274 papers and 209 posters included in the 35 HCII 2019 proceedings volumes was carefully reviewed and selected from 5029 submissions. The 208 papers presented in these three volumes are organized in topical sections as follows: Part I: design, development and evaluation methods and technique; multimodal Interaction; security and trust; accessibility and universal access; design and user experience case studies. Part II:interacting with games; human robot interaction; AI and machine learning in HCI; physiological measuring; object, motion and activity recognition; virtual and augmented reality; intelligent interactive environments. Part III: new trends in social media; HCI in business; learning technologies; HCI in transport and autonomous driving; HCI for health and well-being.

Prairie Birds Jul 31 2019 One of the nation's premier ornithologists documents the great diversity of prairie birds in drawings and photographs that capture their habits, habitats, migratory patterns, breeding practices, and beauty.

HCI International 2022 Posters Oct 06 2022 The four-volume set CCIS 1580, CCIS 1581, CCIS 1582, and CCIS 1583 contains the extended abstracts of the posters presented during the 24th International Conference on Human-Computer Interaction, HCII 2022, which was held virtually in June - July 2022. The total of 1276 papers and 275 posters included in the 40 HCII 2021 proceedings volumes was carefully reviewed and selected from 5583 submissions. The posters presented in these four volumes are organized in topical sections as follows: Part I: user experience design and evaluation; visual design and visualization; data, information and knowledge; interacting with AI; universal access, accessibility and design for aging. Part II: multimodal and natural interaction; perception, cognition, emotion and psychophysiological monitoring; human motion modelling and monitoring; IoT and intelligent living environments. Part III: learning technologies; HCI, cultural heritage and art; eGovernment and eBusiness; digital commerce and the customer experience; social media and the metaverse. Part IV: virtual and augmented reality; autonomous vehicles and urban mobility; product and robot design; HCI and wellbeing; HCI and cybersecurity.

HCI International 2013 - Posters' Extended Abstracts Dec 28 2021 This is the first of a two-volume set (CCIS 373 and CCIS 374) that constitutes the extended abstracts of the posters presented during the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA, in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The extended abstracts were carefully reviewed and selected for inclusion in this two-volume set. The papers included in this volume are organized in the following topical sections: HCI design approaches, methods and techniques; usability methods, techniques and studies; universal access and eInclusion; multimodal and ambient interaction; cognitive and psychological aspects of interaction; perception and interaction; ergonomic and human modelling issues; capturing gaze, biosignals and brainwaves; development environments; product design, marketing and advertisement.

In Focus Divination Aug 12 2020 Learn the basics of how to read secret signs and symbols to provide insight, inspiration, and direction about the future. This accessible and beautifully designed guide includes a frameable poster featuring popular methods of divination. Divination is the art of extracting hidden meaning from the present by using supernatural tools, or oracles, as guidance for the future. Some ancient divinatory methods may seem primitive now, such as shamans in antiquity observing animal entrails, while some methods have remained popular throughout the ages. Diviners today still use methods that draw on the environment, including reading runes or cards, floromancy (reading flowers), and even conchomancy (reading seashells). Our questions might differ from our ancestors', but we still harbor the same basic needs and keen desire to know, understand, and improve the future. To help you see and change it for the better, learn: what tools you need for each method tips to enhance any reading how best to phrase questions for the oracle systems of interpretation how to present information in a tactful, compassionate, empowering way and more There's something here for every diviner, and you can use what you already have on hand for magickal purposes. Combining elegance and expertise, this is your essential modern guide to an ancient tradition. The In Focus series applies a modern approach to teaching the classic body, mind, and spirit subjects. Authored by experts in their respective fields, these beginner's guides feature smartly designed visual material that clearly illustrates key topics within each subject. As a bonus, each book includes reference cards or a poster, held in an envelope inside the back cover, that give you a quick, go-to guide containing the most important information on the subject.

HCI International 2015 - Posters' Extended Abstracts Jan 05 2020 This is the second volume of the two-volume set (CCIS 528 and CCIS 529) that contains extended abstracts of the posters presented during the 17th International Conference on Human-Computer Interaction, HCII 2015, held in Heraklion, Crete, Greece in August 2015. The total of 1462 papers and 246 posters presented at the HCII 2015 conferences was carefully reviewed and selected from 4843 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers included in this volume are organized in the following topical sections: mobile interaction and smart devices; social media; HCI in business and innovation; learning technologies; HCI in health; assistive technologies and environments; fitness and well-being applications; location and context awareness; urban interaction; automotive and aviation; design and user studies.

The Feminist Revolution Jun 02 2022 Oprah's book club has declared The Feminist Revolution a must-read for Women's History Month. The Feminist Revolution offers an overview of women's struggle for equal rights in the late twentieth century. Beginning with the auspicious founding of the National Organization for Women in 1966, at a time when women across the world were mobilizing individually and collectively in the fight to assert their independence and establish their rights in society, the book traces a path through political campaigns, protests, the formation of women's publishing houses and groundbreaking magazines, and other events that shaped women's history. It examines women's determination to free themselves from definition by male culture, wanting not only to 'take back the night' but also to reclaim their bodies, their minds, and their cultural identity. It demonstrates as well that the feminist revolution was enacted by women from all backgrounds, of every color, and of all ages and that it took place in the home, in workplaces, and on the streets of every major town and city. This sweeping overview of the key decades in the feminist revolution also brings together for the first time many of these women's own unpublished stories, which together offer tribute to the daring, humor, and creative spirit of its participants.

Antiviral Agents Jun 29 2019 This new volume of Advances in Pharmacology explores the current state of antiviral agents. Chapters cover such topics as virus entry inhibitors, interferon-free drug combinations, and antiviral agents for HSV. With a variety of chapters and the best authors in the field, the volume is an essential resource for pharmacologists, immunologists and biochemists alike. Explores the current state of anti-viral agents Chapters cover a variety of topics such as virus entry inhibitors, interferon-free drug combinations, and antiviral agents for HSV With the best authors in the field, the volume is an essential resource for pharmacologists, immunologists and biochemists alike

Mobility Aware Technologies and Applications Jan 29 2022 It is becoming quite clear that there will be important technological advances in - bile and wireless connectivity, known as third-/fourth-generation (3G and 4G) mobile telecommunications systems. As a result we will be surrounded by ever-growing m- tidomain (technical and administrative) heterogeneous communications in both wired and wireless networks. This resulting environment deals with communication in m- tizoned networks, where people, devices, appliances and servers are connected to each other via different kinds of networks. Networks will be pervasive, ubiquitous, multis- vice, multioperatorand multiaccess. The mobility trend will also be spurred forward by the growing availability of mobile-

enabled handheld devices. Mobile systems are expected to provide mobile users with cost-effective, secure, yet ubiquitous service access anywhere and anytime. Users will then continue to enjoy the new-found freedom mobile access provides and will have increasingly high exptations of mobility-aware applications that should be capable of seamlessly supporting the mobile lifestyle. The papers in this volume discuss issues from models, platforms, and architectures for mobility-aware systems to security, mobile agent technologies, sensitive comnications, context awareness, mobile applications and management. They cover both practical experience and novel research ideas and concepts.

Tacrolimus Ointment Nov 26 2021 Therapeutic breakthroughs in medicine are usually accompanied by a wealth of data. Often they result in a change of disease treatment paradigms. Tacrolimus ointment is the first in the new class of steroid-free Topical Immunomodulators (TIMs), and as such represents the first true breakthrough since the introduction of topical steroids more than 50 years ago for the treatment of T-cell mediated inflammatory skin diseases such as atopic dermatitis. This book gives an easy-to-read overview of the discovery and the development of Tacrolimus ointment for the treatment of atopic dermatitis. Summarising the largest clinical trial program ever conducted in dermatology for a new treatment with more than 13000 patients, it offers a detailed insight into the efficacy and safety profile of Tacrolimus ointment. Based on this large body of data and extensive personal experience, the authors offer practical and hands-on guidance for the physician as to when and how to use Tacrolimus ointment in daily practice.

Letter Perfect Jun 09 2020 Letter Perfect explores the artistic facet of the style, arrangement, appearance, and recent accelerated evolution of typeset matter, primarily through the medium of posters.

Left to Right Jun 21 2021 The Picture Book takes readers on a journey through our increasingly visual culture--a journey that asks us to consider how technological change has influenced the way we think, the way we see, and the way we communicate. The trend in mass media communication is toward the visual, and even our written language is becoming more and more visually driven. Nontext elements in this book showcase the latest ideas in sending clear messages without words-- messages that can be understood universally, by everyone who can see, regardless of the language they speak.
