**Fluid Orality in the Discourse of Japanese Popular Culture** May 09 2020 This volume invites the reader into the world of pragmatic and discourse studies in Japanese popular culture. Through “character-speak”, the book analyzes quoted speech in light (graphic) novels, the effeminate onee kotoba in talk shows, narrative character in keetai (mobile phone) novels, floating whispers in manga, and fictionalized dialects in television drama series. Explorations into conversational interaction, internal monologue, rhetorical figures, intertextuality, and the semiotic mediation between verbal and visual signs reveal how speakers manipulate language in performing playful “characters” and “characteristics”. Most prominent in the discourse of Japanese popular culture is its “fluid orality”. We find the essential oral nature in and across genres of Japanese popular culture, and observe seamless transitions among styles and speech variations. This fluidity is understood as a feature of polyphonic speech initiated not by the so-called ideal singular speaker, but by a multiple and often shifting interplay of one’s speaking selves performing as various characters. Challenging traditional (Western) linguistic theories founded on the concept of the autonomous speaker, this study ventures into open and embracing pragmatic and discourse studies that inquire into the very nature of our speaking selves.

*The New Catalog of Maya Hieroglyphs, Volume Two* Oct 02 2019 This long-awaited resource complements its companion volume on Classic Period monumental inscriptions. Authors Martha J. Macri and Gabrielle Vail provide a comprehensive listing of graphemes found in the Dresden, Madrid, and Paris codices, 40 percent of which are unique to these painted manuscripts, and discuss current and past interpretations of these graphemes. The New Catalog uses an original coding system developed for the Maya Hieroglyphic Database Project. The new three-digit codes group the graphemes according to their visual, rather than functional, characteristics to allow readers to see distinctions between similar signs. Each entry contains the grapheme's New Catalog code, an image, the corresponding Thompson number, proposed syllabic and logographic values, calendrical significance, and bibliographical citations. Appendices and an index of signs from both volumes contain images of all graphemes and variants ordered by code, allowing readers to search for graphemes by visual form or by their proposed logographic and phonetic values. Together the two volumes of the New Catalog represent the most significant updating of the sign lists for the Maya script proposed in half a century. They provide a cutting-edge reference tool critical to the research of Mesoamericanists in the fields of archaeology, art history, ethnohistory, and linguistics, and a valuable resource to scholars specializing in comparative studies of writing systems and related disciplines.
