Fill 'er Up! Nov 03 2022 In this car culture of ours, what could be more American than the gas station, from the roadside pit stop in the middle of nowhere to the spit-and-polish, full service city shop? This brightly illustrated history of service stations runs the gamut from East to West, North to South, spotlighting the culture and lore of the gas-pumping garage that has kept the United States moving for a century. Whether it's the last-chance Texaco or the Sinclair dinosaur winking in the distance, the beckoning Shell, or the winged Mobil horse, it's here in all its small-town glory of compact architecture, inspired promotions, art deco pumps, and endless views of the American horizon. Author Tim Russell, one of the world's foremost collectors and historians of Petroliana, rolls out the ribbon of highway that takes us to all of those way stations of Americas motoring past.

Rapid Excavation and Tunneling Conference 2021 Proceedings Feb 11 2021 Every two years, industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference (RETC), the authoritative program for the tunneling profession, to learn about the most recent advances and breakthroughs in this unique field. The information presented helps professionals keep pace with the ever-changing and growing tunneling industry. This book includes the full text of 106 papers presented at the 2021 conference. Though the tunneling industry continues to develop both technically and contractually, one notable adaptation of the last two years has been the onset and management of COVID-19. The hallmarks of tunneling professionals include adaptability, resiliency, optimism, and management of change. These are traits that have been recently put to an entirely new challenge over the last year or so. We have truly witnessed why what we do is deemed "essential" infrastructure. The COVID-19 pandemic has impacted each of us, personally and professionally, and while times have been hard, we are fortunate to work in a field that is able to meet the challenge and thrive thereafter. Congratulations are in order to everyone in our industry for keeping the planning and development of projects moving forward and for maintaining safe and productive worksites in these challenging times.

How to Design a Successful Petrol Station Nov 30 2019 In the new millennium, will the architecture & design of today's filling stations become as talked about as those landmarks of other ages -- the great power stations, the deco cinemas from the golden age of film or the warehouses of our glorious manufacturing past?

Nuclear Engineering Handbook Oct 22 2021 Building upon the success of the first edition, the Nuclear Engineering Handbook, Second Edition, provides a comprehensive, up-to-date overview of nuclear power engineering. Consisting of chapters written by leading experts, this volume spans a wide range of topics in the areas of nuclear power reactor design and operation, nuclear fuel cycles, and radiation detection. Plant safety issues are addressed, and the economics of nuclear power generation in the 21st century are presented. The Second Edition also includes full coverage of Generation IV reactor designs, and new information on MRS technologies, small modular reactors, and fast reactors.

[The Architects' Handbook](#) Sep 01 2022 The Architects' Handbook provides a comprehensive range of visual and technical information covering the great majority of building types likely to be encountered by architects, designers, building surveyors and others involved in the construction industry. It is organised by building type and concentrates very much on practical examples. Including over 300 case studies, the Handbook is organised by building type and concentrates very much on practical examples. It includes: · a brief introduction to the key design considerations for each building type · numerous plans, sections and elevations for the building examples · references to key technical standards and design guidance · a comprehensive bibliography for most building types The book also includes sections on designing for accessibility, drawing practice, and metric and imperial conversion tables. 21st Century Security and CPTED Mar 03 2020 The concept of Crime Prevention Through Environmental Design (CPTED) has undergone dramatic changes over the last several decades since C. Ray Jeffery coined the term in the early 1970s, and Tim Crowe wrote the first CPTED applications book. The second edition of 21st Century Security and CPTED includes the latest theory, knowledge, and practice of CPTED as it relates to the current security threats facing the modern world: theft, violent crime, terrorism, gang activity, and school and workplace violence. This significantly expanded edition includes the latest coverage of proper lighting, building design—both the interior and exterior—physical security barriers, the usage of fencing, bollards, natural surveillance, landscaping, and landscape design. Such design concepts and security elements can be applied to address a wide variety of threats including crime prevention, blast mitigation, and CBRNE threat protection. Authored by one of the U.S.'s renowned security experts—and a premiere architect and criminologist—the book is the most comprehensive examination of CPTED and CPTED principles available. This edition includes a complete update of all chapters in addition to five new chapters, over 700 figure illustrations and photos, numerous tables and checklists, and a 20-page color plate section. This latest edition: Features five new chapters including green and sustainable buildings, infrastructure protection, and premises liability Presents step-by-step guidelines and real-world applications of CPTED concepts, principles and processes—from risk assessment to construction and post-occupancy evaluation Outlines national building security codes and standards Examines architectural surety from the perspective of risk analysis and premises liability Demonstrates CPTED implementation in high-security environments, such as hospitals, parks, ATMs, schools, and public and private sector buildings A practical resource for architects, urban planners and designers, security managers, law enforcement, CPTED practitioners, building and property managers, homeland security professionals, and students, 21st Century Security and CPTED, Second Edition continues to serve as the most complete and up-to-date reference available on next-generation CPTED practices today.

[Fill 'er Up](#) Apr 15 2021 Step back to the day when a visit to the gas station meant service with a smile, a wash of the windshield, and the cheerful question, "Fill 'er up?" Since their unremarkable beginnings as cheap shacks and curbside pumps at the dawn of the automobile age, gas stations have taken many forms and worn many guises: castles, cottages and teepees, Art Deco and Streamline Moderne, clad with wood, stucco, or gleaming porcelain in seemingly infinite variety. The companion volume to the Wisconsin Public Television documentary of the same name, *Fill 'er Up: The Glory Days of Wisconsin Gas Stations* visits 60 Wisconsin gas stations that are still standing today and chronicles the history of these humble yet ubiquitous buildings. The book tells the larger story of the gas station's place in automobile culture and its evolution in tandem with American history, as well as the stories of the individuals influenced by the gas stations in their lives. *Fill 'er Up* provides a glimpse into the glory days of gas stations, when full service and free oil changes were the rule and the local station was a gathering place for neighbors. More importantly, *Fill 'er Up* links the past and the present, showing why gas stations should be preserved and envisioning what place these historic structures can have in the 21st century and beyond.
