**Business Torts: A Fifty-State Guide, 2021 Edition** Mar 05 2020 Business Torts: A Fifty State Guide, 2021 Edition provides the most recent statutory and case law developments on business torts laws for each of the fifty states and the District of Columbia. Practitioner-oriented, and written by leading state experts, each chapter summarizes the variants and developments particular to a specific state jurisdiction. You will find detailed coverage of each state's standards regarding: misappropriation of trade secrets; tortious interference with contracts; fraud and misrepresentation; trade libel and commercial disparagement; breach of fiduciary duty; officers and directors liability; conversion; unfair competition, fraudulent transfer; economic loss; and statutes of limitation. The 2021 Edition incorporates recent changes in the law of the various states, including: The Nebraska Supreme Court has recognized the tort of trade libel and commercial disparagement in a long-awaited landmark case. The Missouri legislator amended the Missouri's Merchandising Practices Act to require a consumer bringing a claim under that act to establish that they acted as a reasonable consumer would in light of all circumstances and that the business practice alleged to be unlawful would cause a reasonable person to enter into the transaction that resulted in damages. The Florida Ninth Judicial Circuit has reopened its "Business Court", a division of the Court which

handles exclusively business matters. The Business Court was closed in 2017 due to budget constraints. The Hawaii Supreme Court held that a plaintiff may claim equitable tolling for fraudulent concealment. State Laws Included: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming. Note: Online subscriptions are for three-month periods. Previous Edition: Business Torts: A Fifty State Guide, 2020 Edition, ISBN 9781543806908

*Data Center Handbook* Aug 29 2019 Provides the fundamentals, technologies, and best practices in designing, constructing and managing mission critical, energy efficient data centers Organizations in need of high-speed connectivity and nonstop systems operations depend upon data centers for a range of deployment solutions. A data center is a facility used to house computer systems and associated components, such as telecommunications and storage systems. It generally includes multiple power sources, redundant data communications connections, environmental controls (e.g., air conditioning, fire suppression) and security devices. With contributions from an international list of experts, The Data Center Handbook instructs readers to: Prepare strategic plan that includes location plan, site selection, roadmap and capacity planning Design and build "green" data centers, with mission critical and energy-efficient infrastructure Apply best practices to reduce energy consumption and carbon emissions Apply IT technologies such as cloud and virtualization Manage data centers in order to sustain operations with minimum costs Prepare and practice disaster recovery and business continuity plan The book imparts essential knowledge needed to implement data center design and construction, apply IT technologies, and continually improve data center operations.

*Global Markets, Domestic Institutions* Feb 02 2020 Markets for capital, products, and managerial talent are expanding rapidly across national borders, yet domestic laws and practices have never had greater impact

on corporate structures and cross-border deals. Investors pursuing high returns and diversification, entrepreneurs seeking capital, and managers endeavoring to restructure troubled enterprises now routinely face transaction counter-parties who operate within different legal and political systems, and who rank social priorities quite differently. This dynamic tension between global markets and domestic institutions fuels the debate on corporate governance reform now raging in virtually every region of the world. It also frames the intellectual agenda of the distinguished contributors to this volume, who examine such issues as the possible convergence of corporate governance practices around the world, national variations in the quality of corporate law, and the fiduciary responsibilities corporate managers around the world owe to their shareholders. Among the book's many insights is the contention that "globalization" and "global markets" are misleading terms, because they mask the local quality of much of the activity occurring within those rubrics. Case studies focus on France, Germany, Italy, Japan, Korea, Taiwan, and the transition economies of Eastern Europe.

*Motorola Solutions Inc Patent Landscape Analysis - January 1, 1994 to December 31, 2013* Jul 01 2022 The following analysis illustrates the underlying trends and relationships of U.S. issued patents of the subject company. The analysis employs two frequently used patent classification methods: US Patent Classification (UPC) and International Patent Classification (IPC). Aside from assisting patent examiners in determining the field of search for newly submitted patent applications, the two classification methods play a pivotal role in the characterization and analysis of technologies contained in collections of patent data. The analysis also includes the company's most prolific inventors, top cited patents as well as foreign filings by technology area.

**Lernplattformen für das virtuelle Lernen** Mar 17 2021 Das Buch von R. Schulmeister kombiniert die aktuelle Forschung zur Evaluation von Lernplattformen mit didaktischen Reflexionen zu deren Einsatz in der virtuellen Lehre und eignet sich so auch als praktischer Leitfaden. Der erste Teil berichtet über eine umfassende Bestandsaufnahme von Lernplattformen. Besonderes Gewicht wird auf die Kriterien und Methoden gelegt, nach denen Lernplattformen bewertet werden. Ausführlich dargestellt werden Ergebnisse der Usability-Studie, in der fünf Lernplattformen durch 31 Projekte einem Praxistest unterzogen wurden. Der zweite Teil erläutert Aspekte des didaktischen Designs in komplexen Lernsystemen: Wie kann

man didaktische Szenarien unterscheiden? Welche Gesichtspunkte sind bei der Struktur von Lektionen zu beachten? Wie kann man dynamische Seiten durch Metadaten kontrollieren? Wie wichtig ist die Interaktivität von Lernobjekten, für die eine Taxonomie vorgestellt wird.

*Carbon Capture and Storage* Nov 12 2020 Carbon capture and storage (CCS) refers to a set of technologies and methods for the mitigation, remediation, and storage of industrial CO2 emissions, the most imminent and virile of the greenhouse gases (GHG). The book addresses the methods and technologies currently being applied, developed, and most in need of further research. The book: • Discusses methods of carbon capture in industrial settings • Presents biological and geological approaches to carbon sequestration • Introduces ionic liquids as a method of carbon capture • Introduces new approaches to capturing CO2 from ambient air

**CRC Handbook of Local Area Network Software** Jan 15 2021 Local Area Networks (LANs) play a larger role in our lives today than ever before. For example, LANs provide us with the capability to realize automated banking services, with instant credit checking and numerous other diverse access and manipulation services. Users and developers of LAN products must understand the architecture of the hardware and software mechanisms to effectively design and use such systems. Most gains in LAN productivity will come from future software developments in systems management and applications. This book provides an introduction to the technology associated with Local Area Networks, emphasizing software aspects which have been secondary considerations to hardware in most existing texts. The book also provides a review of the technology needed to realize full service software products, such as computer-aided design and manufacturing systems, large publication systems, and integrated data service networks, and includes an exhaustive review of the products available today.
