Unbending Gender Jun 27 2019 In *Unbending Gender*, Joan Williams takes a hard look at the state of feminism in America. Concerned by what she finds--young women who flatly refuse to identify themselves as feminists and working-class and minority women who feel the movement hasn't addressed the issues that dominate their daily lives--she outlines a new vision of feminism that calls for workplaces focused on the needs of families and, in divorce cases, recognition of the value of family work and its impact on women's earning power. Williams shows that workplaces are designed around men's bodies and life patterns in ways that discriminate against women, and that the work/family system that results is terrible for men, worse for women, and worst of all for children. She proposes a set of practical policies and legal initiatives to reorganize the two realms of work in employment and households--so that men and women can lead healthier and more productive personal and work lives. Williams introduces a new 'reconstructive' feminism that places class, race, and gender conflicts among women at center stage. Her solution is an inclusive, family-friendly feminism that supports both mothers and fathers as caregivers and as workers.

Looking for Betty MacDonald Dec 26 2021 Betty Bard MacDonald (1907-1958), the best-selling author of *The Egg and I* and the classic *Mrs. Piggle-Wiggle* children's books, burst onto the literary scene shortly after the end of World War II. Readers embraced her memoir of her years as a young bride operating a chicken ranch on Washington's Olympic Peninsula, and *The Egg and I* sold its first million copies in less than a year. The public was drawn to MacDonald's vivacity, her offbeat humor, and her irreverent take on life. In 1947, the book was made into a movie starring Fred MacMurray and Claudette Colbert, and spawned a series of films featuring MacDonald's Ma and Pa Kettle characters. MacDonald followed up the success of *The Egg and I* with the creation of Mrs. Piggle-Wiggle, a magical woman who cures children of their bad habits, and with three additional memoirs: *The Plague and I* (chronicling her time in a tuberculosis sanitarium just outside Seattle), *Anybody Can Do Anything* (recounting her madcap attempts to find

work during the Great Depression), and *Onions in the Stew* (about her life raising two teenage daughters on Vashon Island). Author Paula Becker was granted full access to Betty MacDonald's archives, including materials never before seen by any researcher. Looking for Betty MacDonald, a biography of this endearing Northwest storyteller, reveals the story behind the memoirs and the difference between the real Betty MacDonald and her literary persona. The Invisible Toolbox May 07 2020 How one activity can lead to lifelong benefits for your child: "Parents, teachers, and all who love children will be inspired." —Amy Dickinson, New York Times bestselling author of *Strangers Tend to Tell Me Things* Longtime elementary school teacher Kim Jocelyn Dickson believes every child begins kindergarten with a lunchbox in one hand and an "invisible toolbox" in the other. In this book, she shares with parents the single most important thing they can do to foster their child's future learning potential and nurture the parent-child bond that is the foundation for a child's motivation to learn. Drawing on both neuroscientific research and her own experience as an educator, she concludes that the simple act of reading aloud has a far-reaching impact that few of us fully understand—and our recent, nearly universal saturation in technology has further clouded its importance. In *The Invisible Toolbox*, parents, educators, and early literacy advocates will discover: Ten priceless tools that fill their child's toolbox when they read aloud to their child Tools parents can give themselves to foster these gifts in their children Practical tips for how and what to read aloud to children through their developmental stages Dos and don'ts and recommended resources that round out all the practical tools a parent will need to prepare their child for kindergarten and beyond How parents can build their own toolboxes so they can help their children build theirs

Growing Readers Oct 31 2019 Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four "Getting Ready" sections that suggest

some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in *Growing Readers* create the kind of primary classrooms where that happens.

Living Organized Nov 12 2020 Develop strategies for mess-free living! Includes 100 little-known housekeeping tips, inspiring stories from the trenches, and advice for coping with a messy spouse or child.

Marjorie Main Mar 17 2021 She was a slum mother, witty housekeeper, nosy neighbor, meddling maid, town gossip, and most memorably, Ma Kettle. Marjorie Main is best remembered for her portrayal of the farm mother of 15 children and wife of shiftless Pa Kettle. The characters were introduced in the 1945 film *The Egg and I*, and were such a hit that eight films followed. At an age when most actresses' careers are waning, Main's star was just beginning to rise. In real life, Main was as down to earth as characters she played. Her attire on the set and around her house were the same: a simple cotton house dress or jeans. She preferred riding the bus because she enjoyed interacting with regular people—the inspiration for her characters. This book chronicles Main's childhood on an Indiana farm

and the inspirations that led her to the stage. After a distinguished theater career and minor film roles, at age 50 she was offered a long-term contract with premier studio MGM. Details of her acting career and personal life covered here include her marriage to a scholarly widower 26 years her senior, and her work with actor Percy Kilbride, who was the antithesis of his character, the slothful Pa Kettle. A detailed filmography includes cast and credit lists and trivia about each of Main's 85 films.

It is hoped that by sharing classroom experiences, the reader will be entertained, enlightened, and educated. The ideas presented are written for all educators: veteran, novice, substitute and student teachers, parents who homeschool, college and university professors, as well as for anyone who has a child in his or her care. The guide offers the fruit of my experiences, gleaned from a lifetime in the classroom. Writing this book has been a labor of love, and it is my

sincere hope that all educators reading this book will find some fresh insight into the wonderful profession of teaching. *Pencils Down!* will take you on a journey whose itinerary begins in elementary school and spans more than four decades. I have taken that journey at the head of the class. Many an author has written a book on education without ever having stepped into a real classroom. I have stepped into many classrooms, many times, over many years, and now feel qualified to write my first book. Having successfully survived as a teacher forty-five years in the public and private sectors of both the New York and Nevada school systems prompted me to write this book, a book packed with lessons that work, school humor, enrichment activities, and sage advice ready to be used by anyone who desires to instill a love of learning in a child. You may wish to do many of the lessons with your students. Most of the text deals with activities based on beloved children's books. I have selected more than fifty children's books I most enjoyed reading and teaching my students. Although some of these books never achieved Newbery Medal award status, each book teaches something of life's lessons, and each is a gem. My first priority was selecting excellent children's books. I have selected a broad and diverse collection of children's books with the hope that by using these books daily with all elementary school children, each child can learn to love books and appreciate the extended benefits of lifelong literacy. To give you a true flavor of what is covered, a summary of each part follows. Welcome to *Pencils Down!* Part One: School Humor You are reading this either because you are contemplating a career in teaching or are curious to find out whether a veteran teacher can still be sane after spending forty-five years in the classroom. Part One presents the humorous side to an otherwise serious profession. You will get a glimpse of nineteenth and early twentieth century rules for teachers and peruse a copy of the contract teachers were made to sign. Both will make you wonder why anyone would consider a career in education. You will find out what teachers make and be privy to the public's low opinion of teachers' salaries. If you survive the reality show for educators, you may continue reading the book. School anecdotal incidents, accrued from many years in the classroom, will be shared. You will learn why God created the teacher and will be introduced to the new school policy. A test designed for preschoolers will challenge you. Answers from kindergartners and first graders as to why we read and write will be sure to surprise and amuse you. Actual student test answers and parental notes are included, both good for a chuckle. The difference between an educator and a teacher will be clarified. Today's schools, vs. schools in the 50's and 60's, will make you wish you were teaching in a simpler era and make you wonder if schools are still teaching math. An Australian school's answering machine will make you smile, as will the eleven things you did not and will not learn in school. Part Two: Getting to Know You "Getting to know you, Getting to know all about you.
