Homeworking Women Jul 19

2019 An up-to-date overview of all types of home-based work is provided in this volume, which makes an important contribution to sociological and policy debates on

homeworking. The authors argue that homeworking replicates wider divisions in the labour force and that its potential for improving women's employment opportunities is therefore limited. Using original research, they outline the

advantages and disadvantages, the pay and conditions, and the family situations for contemporary women homeworkers. Gender, class, racism and ethnicity are shown to be key factors in constructing the homeworking labour force. The authors acknowledge the shared position that homeworkers occupy as women, as well as the differences experienced by clerical, manufacturing and professional homeworkers, and question whether new technology in itself can be the way forward to a better paid, less onerous form of homeworking.

Special Collection Libraries is the first such book intended specifically to address security in special collection libraries.

Containing nineteen chapters, the book covers such topics as background checks, reading room and general building design, technical processing, characteristics and methods of thieves, materials recovery after a theft, and security systems. While other topics are touched upon, the key focus of this volume is on the prevention of theft of rare materials. The work is supplemented by several appendices, one of which gives brief biographies of recent thieves and another of which publishes Allen's important

Blumberg Survey, which she undertook after that thief's conviction. The text is supported by illustrations, a detailed index, and an extensive bibliography. The work, compiled and edited by Everett C. Wilkie, Jr., contains contributions from Anne Marie Lane, Jeffrey Marshall, Alvan Bregman, Margaret Tenney, Elaine Shiner, Richard W. Oram, Ann Hartley, Susan M. Allen, and Daniel J. Slive, all members of the ACRL Rare Books & Manuscripts Section (RBMS) and experts in rare materials and the security of these materials within special collections. This work is essential reading for all those concerned with special
