Ready for Takeoff? Jun 02 2022 This book identifies the premises and prerequisites of the low-cost carriers (LCC) model, and assesses whether it could be successful in less-developed countries, in particular in Sub-Saharan Africa. Specific attention is given to the impact of LCCs on traffic stimulation through lower fares, competition, and fare levels in the market.

Biocomputing 2013 - Proceedings Of The Pacific Symposium Aug 04 2022 The Pacific Symposium on Biocomputing (PSB) 2013 is an international, multidisciplinary conference for the presentation and discussion of current

research in the theory and application of computational methods in problems of biological significance. Presentations are rigorously peer reviewed and are published in an archival proceedings volume. PSB 2013 will be held on January 3 - 7, 2013 in Kohala Coast, Hawaii. Tutorials and workshops will be offered prior to the start of the conference. PSB 2013 will bring together top researchers from the US, the Asian Pacific nations, and around the world to exchange research results and address open issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization,

modeling, and other computational methods, as applied to biological problems, with emphasis on applications in data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. For that reason, it is the only meeting whose sessions are defined dynamically each year in response to specific proposals. PSB sessions are organized by leaders of research in biocomputing's "hot topics." In this way, the meeting provides an early forum for serious examination of emerging methods and approaches in this rapidly changing field.

LexisNexis Practice Guide on Florida Civil Procedure: Trial and Post-Trial Apr 07 2020

Experience the new standard in Florida practice guides. The LexisNexis Practice Guide on Florida Civil Procedure: Trial and Post-Trial is part of a 5-volume series that gives you complete step-by-step guidance on civil litigation practice and procedure in Florida and quickly points you

institutions and infrastructure necessary to secure and provide human rights for their citizens. The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie's Guiding Principles. Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice. This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse. This book was previously published as a special issue of the International Journal of Human Rights.

Microbial Xylanolytic Enzymes Sep 24 2021

Microbial Xylanolytic Enzymes describes the enzyme structure and its interaction with plant cell walls, the properties and production of different enzymes and their applications, and the knowledge gathered on the hydrolysis mechanism of hemicellulose. The knowledge gathered about the hydrolysis mechanism of the hemicelluloses, especially xylans, has greatly promoted the rapid application of these enzymes in new areas. In recent years, there has been a spurt of interest in xylan degrading enzymes due to their applications in several industrial processes, including paper and pulp industries, food and feed industries, biofuel industry, textile industry, chemical and pharmaceutical industry, brewing industry, and more. Xylan is the principal type of hemicellulose. An enzymatic

complex is responsible for the hydrolysis of xylan, but the main enzymes involved are enzymes produced by fungi, bacteria, yeast, algae, protozoans, and more. Gives up-to-date authoritative information and cites pertinent research on the synergistic action of xylanolytic enzymes Includes studies on xylanase regulation and synergistic action between multiple forms of xylanase Covers, in great depth, all aspects of Xylanolytic enzymes Includes detailed descriptions on Xylanolytic enzymes as a supplement in animal feed, for the manufacture of bread, food and drinks, textile industry, pulp and paper industry, biofuel industry and production of pharmaceuticals and important chemicals and waste management, etc.

Challenges future trends in the commercial production and application of xylanases

Games User Research Dec 16 2020

"Fundamentally, making games is designing with others, everyone contributing from different angles towards the best possible product.

Conclusively, Garcia-Ruiz has chosen a collection of chapters that demonstrates several different aspects of working in gaming and working with others that stands to raise the level of expertise in the field." —Veronica Zammitto, Senior Lead Games User Research, Electronic Arts, Inc., from the Foreword Usability is about making a product easy to use while meeting the requirements of target users. Applied to video games, this means making the game accessible and enjoyable to the player. Video games with high usability are generally played efficiently and frequently while enjoying higher sales volumes. The case studies in this book present the latest interdisciplinary research and applications of games user research in determining and developing usability to improve the video game user experience at the human-computer interface level. Some of the areas examined include practical and ethical concerns in conducting usability testing with children, audio experiences in games, tangible

and graphical game interfaces, controller testing, and business models in mobile gaming. Games User Research: A Case Study Approach provides a highly useful resource for researchers, practitioners, lecturers, and students in developing and applying methods for testing player usability as well as for conducting games user research. It gives the necessary theoretical and practical background for designing and conducting a test for usability with an eye toward modifying software interfaces to improve human-computer interaction between the player and the game.

Human Resource Management 4.0 May 21 2021 Dieses Buch nimmt die Leser:innen mit auf eine Reise durch das unwegsame Gelände der Digitalisierung. Professionelles HRM muss die damit einhergehenden Veränderungen mit klugen Entscheidungen initiieren und begleiten, um zusammen mit anderen Unternehmensbereichen den wirtschaftlichen Erfolg zu sichern. Der Autor folgt dabei den

praktischen Erfahrungen und wählt einen interdisziplinären Zugriff aus den Perspektiven der Betriebswirtschaft, der Soziologie, der Psychologie und Sozialpsychologie sowie der Neurowissenschaften, der Informatik, der Arbeitswissenschaft und letztlich der Unternehmensethik. Zukunftsorientiert berücksichtigt er v.a. die künstliche Intelligenz sowie die Bio- und Nanotechnologie hinsichtlich der Deckung des Bedarfs an Personalressourcen durch die Generation Y und die Generation Z. Das Buch umfasst empirische Befunde, Fallbeispiele, wichtige Begriffsdefinitionen und ein Glossar.

Crisis Narratives, Institutional Change, and the Transformation of the Japanese State Jun 21 2021 Looking at Japan, traces crisis narratives across three decades and ten policy fields, with the aim of disentangling discursively manufactured crises from actual policy failures. Mired in national crises since the early 1990s, Japan has had to respond to a rapid population

decline; the Asian and global financial crises; the 2011 triple disaster of earthquake, tsunami, and the Fukushima nuclear meltdown; the COVID-19 pandemic; China's economic rise; threats from North Korea; and massive public debt. In *Crisis Narratives, Institutional Change, and the Transformation of the Japanese State*, established specialists in a variety of areas use a coherent set of methodologies, aligning their sociological, public policy, and political science and international relations perspectives, to account for discrepancies between official rhetoric and policy practice and actual perceptions of decline and crisis in contemporary Japan. Each chapter focuses on a distinct policy field to gauge the effectiveness and the implications of political responses through an analysis of how crises are narrated and used to justify policy interventions. Transcending boundaries between issue areas and domestic and international politics, these essays paint a dynamic picture of the contested

but changing nature of social, economic, and, ultimately political institutions as they constitute the transforming Japanese state. Sebastian Maslow is Senior Lecturer in International Relations at Sendai Shirayuri Women's College in Japan. He is the coeditor (with Ra Mason and Paul O'Shea) of Risk State: Japan's Foreign Policy in an Age of Uncertainty. Christian Wirth is Research Fellow at the German Institute for Global and Area Studies (GIGA) and Adjunct Research Fellow at the Griffith University Asia Institute. He is the author of Danger, Development and Legitimacy in East Asian Maritime Politics: Securing the Seas, Securing the State.

Principles of Extreme Mechanics (XM) in Design for Reliability (DfR) Nov 02 2019 This book addresses issues pertinent to mechanics and stress generation, especially in recent advanced cases of technology developments, spanning from micrometer interconnects in solar photovoltaics (PV), next-gen energy storage

*Online Library Igcse Xtreme Papers
2013 Combined Read Pdf Free*

devices to multilayers of nano-scale composites enabling novel stretchable/flexible conductor technologies. In these cases, the mechanics of materials have been pushed to the extreme edges of human knowledge to enable cutting-edge, unprecedented functionalities and technological innovations. Synchrotron X-ray diffraction, in situ small-scale mechanical testing combined with physics-based computational modeling/simulation, has been widely used approaches to probe these mechanics of the materials at their extreme limits due to their recently discovered distinct advantages. The techniques discussed in this manuscript are highlights specially curated from the broad body of work recently reported in the literature, especially ones that the author had led the pursuits at the frontier himself. Extreme stress generation in these advanced material leads to often new failure modes, and hence, the reliability of the final product is directly affected. From the recent topics and various

advanced case studies covered in this book, the reader gets an updated knowledge of how new mechanics can and has been applied in Design-for-Reliability (DfR) for some of the latest technological innovations known in our modern world. Further, this also helps in building better designs, which may avoid the pitfalls of the current practiced trends.

Unconventional Oil and Gas Resources Mar 07 2020 As the shale revolution continues in North America, unconventional resource markets are emerging on every continent. In the next eight to ten years, more than 100,000 wells and one- to two-million hydraulic fracturing stages could be executed, resulting in close to one trillion dollars in industry spending. This growth has prompted professionals experienced in conventional oil and gas exploitation and development to acquire practical knowledge of the unconventional realm. *Unconventional Oil and Gas Resources: Exploitation and Development* provides a comprehensive

advance your music career you must arm yourself with steadfast determination, unending passion, and the most accurate music business knowledge available. For more than 38 years, Songwriter's Market has provided songwriters and performing artists with the most complete and up-to-date information needed to place songs with music publishers, find record companies and producers, obtain representation with managers, and more. This comprehensive guide gives you the tools and first-hand knowledge you need to launch your songwriting career right now! In the 2015 edition, you'll also gain access to:

- A new foreword by hit songwriter and best-selling author Jason Blume
- New interviews with music publishers, Grammy Award-winning producers, and major music industry leaders
- Articles about how to create and mix a professional demo at home, how to get the most out of music conferences, and much more
- Hundreds of songwriting placement opportunities
- Listings for

current global energy dilemma and examines how it is playing out across the major regions and countries of the world. The book begins by charting the development of the current global energy system - exploring its key characteristics with a focus upon energy security and the relationship between energy, economic development and climate change. The next four chapters offer in-depth analyses of four distinct global energy dilemmas in different parts of the world: the challenge of sustaining affluence and decarbonising energy services in the high-energy economies of the developed world; the legacies of the centrally planned economy and the consequences of liberalisation in the post-socialist world; growing energy demand and emissions growth associated with the emerging regions; and finally, the quest to provide universal access to modern energy services in the developing world in a manner that is both economically and environmentally sustainable. Identifying the governance structures and policy

options available to tackle the global energy dilemma, the book concludes that only an integrated approach - sensitive to regional issues - can reconcile the interests and needs of those facing differing energy challenges across the world today.

machine (ELM) is a single layer feed-forward neural network like learning system, whose connections from the input layer to the hidden layer are randomly generated, while the connections from the hidden layer to the output layer are learned through linear learning methods. The outstanding merits of extreme learning machine (ELM) are its fast learning speed, trivial human intervene and high scalability. This book contains some selected papers from the International Conference on Extreme Learning Machine 2013, which was held in Beijing China, October 15-17, 2013. This conference aims to bring together the researchers and practitioners of extreme learning machine from a variety of fields including artificial intelligence, biomedical engineering and bioinformatics, system modelling and control, and signal and image processing, to promote research and discussions of "learning without iterative tuning". This book covers algorithms and applications of ELM. It

for enhancing manufacturing systems' economic sustainability and prolonging their life to produce more than one product generation are treated. Enablers of change in manufacturing systems, production volume and capability, scalability and managing the volatility of markets, competition among global enterprises and the increasing complexity of products, manufacturing systems and management strategies are discussed. Industry challenges and future directions for research and development needed to help both practitioners and academicians are presented. About the Editor Prof. Dr.-Ing. Michael F. Zaeh, born in 1963, has been and is Professor for and Manufacturing Technology since 2002 and, together with Prof. Dr.-Ing. Gunther Reinhart, Head of the Institute for Machine Tools and Industrial Management (iwb) at the Technische Universitaet Muenchen (TUM). After studying general mechanical engineering, he was doctoral candidate under Prof. Dr.-Ing. Joachim Milberg

at TUM from 1990 until 1993 and received his doctorate in 1993. From 1994 to 1995, he was department leader under Prof. Dr.-Ing. Gunther Reinhart. From 1996 to 2002, he worked for a machine tool manufacturer in several positions, most recently as a member of the extended management. Prof. Dr.-Ing. Michael F. Zaeh is an associated member of the CIRP and member of acatech, WGP and WLP. His current researches include among others Joining and Cutting Technologies like Laser Cutting and Welding as well as Friction Stir Welding, Structural Behaviour and Energy Efficiency of Machine Tools and Manufacturing Processes like Additive Manufacturing.

Extreme Cakeovers Oct 26 2021 Wanted: Must love candy, cookies, frosting, and fun. No experience required! Make over any purchased sheet cake or frozen pound cake into a stunning creation that looks like it came from a fancy bakery—no special skills or equipment necessary! Even if you've never tried to decorate

a cake before, with a good supply of candies and other store-bought treats and the detailed instructions in *Extreme Cakeovers*, you'll be able to accomplish forty unique designs. You can:

- Fashion robot hands from chocolate-covered doughnuts
- Make Fruit Roll-ups blossom into a bouquet of red roses
- Roll Rice Krispies Treats and Swedish Fish into realistic sushi
- String a pretty strand of gumball pearls
- Create a train smokestack from an ice cream cone and marshmallow

Including tips and designs to please everyone from five to one hundred, *Extreme Cakeovers* is a whimsical guide to crafting cakes that will be the centerpiece of any occasion, from kids' birthdays to Halloween, Father's Day to Valentine's Day, engagement parties to retirement gatherings.

international status. Coinciding with the twenty year anniversary of Nigeria's return to democratic rule, this volume considers the state of democracy in Nigeria and examines its successes and challenges with a view towards offering possible solutions for the country's future development. The first half of the volume addresses domestic politics, focusing on current issues such as the 2019 elections, Nigerian federalism, media, state-civil society relations, and Boko Haram terrorism. The second half looks at Nigeria's relations with its African neighbors, discussing the relationships between Nigeria and South Africa, Egypt, Ghana, and Cameroon, among others. Engaging the full spectrum of the politics of a rising African power, this volume will be of interest to students and researchers of comparative politics, international relations, foreign policy, African studies, regional politics, peace, security, conflict, and development studies, as well as African policymakers.

zuständigen Kommissar noch von Madame Dubonnet, der Besitzerin des Hotels, davon abbringen, genau dieses Zimmer zu beziehen ... 1908 erschien die weltberühmte Erzählung „Die Spinne“, die Hanns Heinz Ewers im nordfranzösischen Bois de Cise schrieb. Sie gilt heute als Klassiker der Gruselliteratur. „Die Spinne“ wurde sofort zu einem Sensationserfolg: Die Zeitungen, in denen die Geschichte zum ersten Mal erschien, erhielten viele Hundert Zuschriften, die eine Erklärung für die seltsamen Phänomene verlangten, die in der Handlung geschildert wurden. Übersetzungen erschienen auf Englisch, Französisch, Russisch, Polnisch, Schwedisch, Tschechisch, Ungarisch und in anderen Sprachen, außerdem wurde „Die Spinne“ mehrfach fürs Fernsehen verfilmt und wiederholt als Hörspiel bearbeitet, zuletzt 2011 unter dem Titel „Clarimonde“ für Deutschlandradio Kultur.

Upgrade Culture and Technological Change

Jun 09 2020 This book explores the origin and

future of "upgrade culture," a collection of cultural habits and orientations based on the assumption that new technologies will rapidly, perpetually, and inevitably emerge. By analyzing discourses of technological change and the practices of marketing workers inside the consumer technology industry between the early 1980s and the late 2010s, the book describes the genesis, maintenance, and future of upgrade culture. Based on archival and popular sources, first-hand interviews with a range of industry professionals, and participant observations at industry-only events, the book attends to issues both intimate to the culture of marketing work and structural to the organization of the consumer technology industry. This book will have a broad appeal to social/cultural theorists of technology, marketing, and consumerism, as well as to scholars in business history, communication, cultural studies, media studies, sociology, and anthropology.

Advanced Ceramic Coatings and Materials for

Extreme Environments III, Volume 34, Issue 3

Feb 15 2021 Ceramic Engineering and Science Proceedings Volume 34, Issue 3 - Advanced Ceramic Coatings and Materials for Extreme Environments III A collection of 12 papers from The American Ceramic Society's 37th International Conference on Advanced Ceramics and Composites, held in Daytona Beach, Florida, January 27-February 1, 2013. This issue includes papers presented in the Advanced Ceramic Coatings and Systems and Next Generation Technologies for Innovative Surface Coatings symposia.

Place Event Marketing in the Asia Pacific Region

Sep 12 2020 This book explores the fascinating phenomenon of place event marketing in the Asia Pacific region. It examines procedures in the promotion and branding of places that use events to shape their identities. It considers how events are used in forming a branded image of a place and disseminate information about it. This innovative book offers theoretical insights of the

opportunities and challenges related to place event marketing. With contributions from leading thinkers in the field, chapters also draw on empirical examples to showcase a variety of events across the Asia Pacific, such as MICE, sporting events, festivals, and religious and cultural celebrations. The book explores the importance of such events for the socio-economic development of urban regions. Today, the Asia Pacific is one of the world's fastest developing regions and its rising economic power is accompanied by the growing importance of the tourism and event sector. The book is a unique study relating to a very exceptional region of the world. The role of events in tourism development and the rise of the region's soft power is presented through carefully selected examples of cities from different countries. The book concludes with commentary on the future directions for research in this area. Written in an accessible style, this book will be of great interest to

students, scholars, and practitioners working in events studies, urban studies, tourism, place branding and promotion, business and management studies, geography, sociology, and sport and leisure studies.

The Routledge Companion to Environmental Ethics

Oct 14 2020 Written for a wide range of readers in environmental science, philosophy, and policy-oriented programs The Routledge Companion to Environmental Ethics is a landmark, comprehensive reference work in this interdisciplinary field. Not merely a review of theoretical approaches to the ethics of the environment, the Companion focuses on specific environmental problems and other concrete issues. Its 65 chapters, all appearing in print here for the first time, have been organized into the following eleven parts: I. Animals II. Land III. Water IV. Climate V. Energy and Extraction VI. Cities VII. Agriculture VIII. Environmental Transformation IX. Policy Frameworks and Response Measures X. Regulatory Tools XI.

Advocacy and Activism The volume not only explains the nuances of important core philosophical positions, but also cuts new pathways for the integration of important ethical and policy issues into environmental philosophy. It will be of immense help to undergraduate students and other readers coming up to the field for the first time, but also serve as a valuable resource for more advanced students as well as researchers who need a trusted resource that also offers fresh, policy-centered approaches.

Wade and Forsyth's Administrative Law Dec 04 2019 Wade and Forsyth's Administrative Law has been a cornerstone text since publication of the first edition in 1961. It provides a comprehensive and perceptive account of the principles of judicial review and the administrative arrangements of the United Kingdom. For over sixty years, this text has been trusted by students and is extensively cited by courts throughout the common law world. The

Fans and Videogames Jul 03 2022 This anthology addresses videogames long history of fandom, and fans' important role in game history and preservation. In order to better understand and theorize video games and game playing, it is necessary to study the activities of gamers themselves. Gamers are active creators in generating meaning; they are creators of media texts they share with other fans (mods, walkthroughs, machinima, etc); and they have

played a central role in curating and preserving games through activities such as their collective work on: emulation, creating online archives and the forensic archaeology of code. This volume brings together essays that explore game fandom from diverse perspectives that examine the complex processes at work in the phenomenon of game fandom and its practices. Contributors aim to historicize game fandom, recognize fan contributions to game history, and critically assess the role of fans in ensuring that game culture endures through the development of archives.
