**The Human Mechanics** Mar 29 2022 Many facets of living fauna on earth are different and look incomparable between themselves. And this just a beginning.

*Trade Secret Theft, Industrial Espionage, and the China Threat* Aug 22 2021 Although every country seeks out information on other nations, China is the leading threat when it comes to the theft of intellectual assets, including inventions, patents, and R&D secrets. Trade Secret Theft, Industrial Espionage, and the China Threat provides an overview of economic espionage as practiced by a range of nations from around the world—focusing on the mass scale in which information is being taken for China's growth and development. Supplying a current look at espionage, the book details the specific types of information China has targeted for its collection efforts in the past. It explains what China does to prepare for its massive collection efforts and describes what has been learned about China's efforts during various Congressional hearings, with expert advice and details from both the FBI and other government agencies. This book is the product of hundreds of hours of research, with material, both primary and secondary, reviewed, studied, and gleaned from numerous sources, including White House documentation and various government agencies. Within the text, you will learn the rationale and techniques used to obtain information in the past. You will see a bit of history over centuries where espionage has played a role in the economy of various countries and view some cases that have come to light when individuals were caught. The book supplies an understanding of how the economy of a nation can prosper or suffer, depending on whether that nation is protecting its intellectual property, or whether it is stealing such property for its own use. The text concludes by outlining specific measures that corporations and their employees can practice to protect their information and assets, both at home and abroad.

*Case Studies in Social Entrepreneurship* Sep 22 2021 This book is an essential resource for the increasing number of facilitators who wish to help students learn about the promise and pitfalls of social enterprise. The oikos-Ashoka case competition for social entrepreneurship was conceived in 2007 as a way to help find great material and case studies in this emerging field. This fourth collection of oikos case studies is based on the winning cases from the 2010 to 2014 annual case competitions. These cases have been highly praised because they provide excellent learning opportunities, tell engaging stories, deal with recent situations, include quotations from key actors, are thought-provoking and controversial, require decision-making and provide clear take-aways. This new volume of social entrepreneurship case studies highlights cases from around the globe authored by teachers from around the globe. The selected cases span many industries and geographic contexts; nevertheless, they are connected by a shared ambition: to highlight the power of entrepreneurship to solve social problems. The cases are clustered in three different sections: Socially oriented Enterprise Cases – Health and Fair trade, Ecologically oriented social enterprises, and Corporate Social Entrepreneurship. Case Studies in Social Entrepreneurship will be an essential purchase for educators and is likely to be a widely used as a course textbook at all levels of management education. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book.

**Wikipedia @ 20** Dec 26 2021 Wikipedia's first twenty years: how what began as an experiment in collaboration became the world's most popular reference work. We have been looking things up in Wikipedia for twenty years. What began almost by accident—a wiki attached to an nascent online encyclopedia—has become the world's most popular reference work. Regarded at first as the scholarly equivalent of a Big Mac, Wikipedia is now known for its reliable sourcing and as a bastion of (mostly) reasoned interaction. How has Wikipedia, built on a model of radical collaboration, remained true to its original mission of “free access to the sum of all human knowledge” when other tech phenomena have devolved into advertising platforms? In this book, scholars, activists, and volunteers reflect on Wikipedia's first twenty years, revealing connections across disciplines and borders, languages and data, the professional and personal. The contributors consider Wikipedia's history, the richness of the connections that underpin it, and its founding vision. Their essays look at, among other things, the shift from bewilderment to respect in press coverage of Wikipedia; Wikipedia as “the most important laboratory for social scientific and computing research in history”; and the acknowledgment that “free access” includes not just access to the material but freedom to contribute—that the summation of all human knowledge is biased by who documents it. Contributors Phoebe Ayers, Omer Benjakob, Yochai Benkler, William Beutler, Siko Bouterse, Rebecca Thorndike-Breeze, Amy Carleton, Robert Cummings, LiAnna L. **The Kurdish Spring** Jul 29 2019 Kurds are the largest stateless people in the world. An estimated thirty-two million Kurds live in "Kurdistan," which includes parts of Turkey, Iraq, Syria, and Iran today's "hot spots" in the Middle East. The Kurdish Spring explores the subjugation of Kurds by Arab, Ottoman, and Persian powers for almost a century, and explains why Kurds are now evolving from a victimized people to a coherent political community. David L. Phillips describes Kurdish rebellions and arbitrary divisions in the last century, chronicling the nadir of Kurdish experience in the 1980s. He discusses draconian measures implemented by Iraq, including use of chemical weapons, Turkey's restrictions on political and cultural rights, denial of citizenship and punishment for expressing Kurdish identity in Syria, and repressive rule in Iran. Phillips forecasts the collapse and fragmentation of Iraq. He argues that US strategic and security interests are advanced through cooperation with Kurds, as a bulwark against ISIS and Islamic extremism. This work will encourage the public to look critically at the post-colonial period, recognizing the injustice and impracticality of states that were created by Great Powers, and offering a new perspective on sovereignty and statehood.

**Education 2.0** Jul 09 2020 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray. Meanwhile, employment prospects for high school and college graduates are fading, and the public is losing faith in its schools. The education paradigm inherited from the Industrial Era is in crisis. In the last decade, however, the Internet and new Web 2.0 technologies have placed the entirety of human knowledge in the hands of everyone. What will our educational institutions make of this unprecedented flood of Web-based learning resources? How can schools be transformed to accommodate the new possibilities for personal and social learning? Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book. Drawing on new organizational models grounded in complexity theory, Waks maps out an inspiring new paradigm for education in the Internet age, and connects all the dots in constructing detailed models for new schools—now transformed into "open learning centers." Finally, Waks details action steps readers can take to speed this transformative process along in their own locations.

**Thanksgiving Day – Religious to Secular** May 31 2022 In what now seems to be the ancient past, many of the early Europeans who risked their lives to settle the lands of the Americas were dependent on God and openly thankful for His blessings. The celebration of a day or season of Thanksgiving was a religious observance accompanied by worship, prayer, a hearty meal and a community attitude of thankfulness. In modern times the day or season of Thanksgiving that started in the colonies as a religious observance has transitioned over time to a primarily secular long weekend spent with family and friends while over-eating,

watching football and shopping like crazy. This book traces the history of how the celebration of Thanksgiving in the United States of America has changed from the time of the Pilgrims in 1621 to the Presidency of Barack Hussein Obama in 2012.

*Power Hungry* Oct 12 2020 The promise of "green jobs" and a "clean energy future" has roused the masses. But as Robert Bryce makes clear in this provocative book, that vision needs a major re-vision. We cannot -- and will not -- quit using carbon-based fuels at any time in the near future for a simple reason: they provide the horsepower that we crave. The hard reality is that oil, coal, and natural gas are here to stay. Fueling our society requires more than sentiment and rhetoric; we need to make good decisions and smart investments based on facts. In *Power Hungry*, Bryce provides a supertanker-load of footnoted facts while shepherding readers through basic physics and math. And with the help of a panoply of vivid graphics and tables, he crushes a phalanx of energy myths, showing why renewables are not green, carbon capture and sequestration won't work, and even -- surprise! -- that the U.S. is leading the world in energy efficiency. He also charts the amazing growth of the fuels of the future: natural gas and nuclear. *Power Hungry* delivers a clear-eyed view of what America has "in the tank," and what's needed to transform the gargantuan global energy sector.

**The Royal Navy and the British Atlantic World, c. 1750–1820** Apr 17 2021 This book foregrounds the role of the Royal Navy in creating the British Atlantic in the eighteenth century. It outlines the closely entwined connections between the nurturing of naval supremacy, the politics of commercial protection, and the development of national and imperial identities – crucial factors in the consolidation and transformation of the British Atlantic empire. The collection brings together scholars working on aspects of the Royal Navy and the British Atlantic in order to gain a better understanding of the ways that the Navy protected, facilitated, and shaped the British-Atlantic empire in the era of war, revolution, counter-revolution, and upheaval between the beginning of the Seven Years War and the end of the conflict with Napoleonic France. Contributions question the limits – conceptually and geographically – of that Atlantic world, suggesting that, by considering the Royal Navy and the British Atlantic together, we can gain greater insights into Britain's maritime history.

*Phoenix Rising* Jun 19 2021 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source? Are there genuine alternative power sources? Are they the answer to a growing crisis? Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.

*The Internet Is Not the Answer* Nov 24 2021 The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times–bestselling author

**Awkward Intelligence** Sep 30 2019 An expert offers a guide to where we should use artificial intelligence—and where we should not. Before we know it, artificial intelligence (AI) will work its way into every corner of our lives, making decisions about, with, and for us. Is this a good thing? There's a tendency to think that machines can be more "objective" than humans—can make better decisions about job applicants, for example, or risk assessments. In *Awkward Intelligence*, AI expert Katharina Zweig offers readers the inside story, explaining how many levers computer and data scientists must pull for AI's supposedly objective decision making. She presents the good and the bad: AI is good at processing vast quantities of data that humans cannot—but it's bad at making judgments about people. AI is accurate at sifting through billions of websites to offer up the best results for our search queries and it has beaten reigning champions in games of chess and Go. But, drawing on her own research, Zweig shows how inaccurate AI is, for example, at predicting whether someone with a previous conviction will become a repeat offender. It's no better than simple guesswork, and yet it's used to determine people's futures. Zweig introduces readers to the basics of AI and presents a toolkit for designing AI systems. She explains algorithms, big data, and computer intelligence, and how they relate to one another. Finally, she explores the ethics of AI and how we can shape the process. With *Awkward Intelligence*, Zweig equips us to confront the biggest question concerning AI: where we should use it—and where we should not.

**Losers And Winners On The Unknown Road To An Unpredictable Destiny** Feb 13 2021 This is a book that will help both winners and losers. Winners and Losers will teach something to virtually 100% of everyone who reads it. The same percentage should find it entertaining. The book discusses many life-changing events that often greet us as we travel the unknown road. The road may be short or long. No one knows the length of his/her road. However, the one thing that is certain is that everyone travels the unknown road that ends with an unpredictable destiny. On the road you may meet thugs, hoodlums, rogues, rapists, murderers, dead-beat dads and other undesirables. You may also meet good Samaritans, philanthropists, near-perfect people and other pleasant people on the unknown road to an unpredictable destiny. Death of family members and friends may wreck your life while on the road. Sickness and disease may show up unannounced and hang around briefly or set up residence until death takes their place. Everyone is a racist, sexist, and possesses characteristics of ageism. If anyone denies this, then he/she is also a liar because there are degrees of racism falling between 1% and 99%. No one is 0% racist or 100% racist. Think about it.

**Engaging Students through Campus Libraries: High-Impact Learning Models** Mar 05 2020 This collection of collaborative, high-impact learning experiences in information literacy teaches librarians how to engage students in hands-on, experiential learning. The Association of American Colleges and Universities (AAC&U) has identified 11 practices that are highly impactful to student learning to designate as high-impact educational practices (HIP). These practices engage students deeply in a meaningful, connected way to their work. Librarians teach and support student learning in many ways that assist these AAC&U practices, such as information literacy instruction for capstone, writing, and first-year seminars and research support for collaborative assignments and projects. *Engaging Students through Campus Libraries* calls attention to work in information literacy that goes beyond a traditional librarian role; it features librarians and faculty partners who engage in projects that highlight salient, experiential facets of the AAC&U practices in order to teach information literacy. In this book, librarians will learn high-impact, experiential learning models for working with students. They will understand how to think about and describe how AAC&U best practices are currently embodied in their organizations. They will also imagine future learning experiences for students with HIPs in mind, resulting in information literacy that is integrated into disciplinary work in a vital and transformative way. Demonstrates the varied and exciting possibilities for engaged, integrated information literacy instruction Includes details about planning and preparation so that readers can replicate, scale, or adapt practices in other library environments Offers librarians practical models for pursuing their own partnerships in other disciplines Includes narrative accounts of completed projects and programs involving students from a range of majors and academic departments

**Getting Organized in the Google Era** Oct 24 2021 Whether it's a faulty memory, a tendency to multitask, or difficulty managing our time, every one of us has limitations conspiring to keep us from being organized. But, as organizational guru and former Google CIO Douglas C. Merrill points out, it isn't our fault. Our brains simply aren't designed to deal with the pressures and competing demands on our attention in today's fast-paced, information-saturated, digital world. What's more, he says, many of the ways in which our society is structured are outdated, imposing additional chaos that makes us feel stressed, scattered, and disorganized. But it doesn't have to be this way. Luckily, we have a myriad of amazing new digital tools and technologies at our fingertips to help us manage the strains on our brains and on our lives; the trick is knowing when and how to use them. This is why Merrill, who helped spearhead Google's effort to "organize the world's information," offers a wealth of tips and strategies for how to use these new tools to become more organized, efficient, and successful than ever. But if you're looking for traditional, rigid, one-size-fits-all strategies for organization, this isn't the book for you. Instead, Merrill draws on his intimate knowledge of how the brain works to help us develop fresh, innovative, and flexible systems of organization tailored to our individual goals, constraints, and lifestyles. From how to harness the amazing power of search, to how to get the most out of cloud computing, to techniques for filtering through the enormous avalanche of information that assaults us at every turn, to tips for minimizing distractions and better integrating work and life, *Getting Organized in the Google Era* is chock-full of practical, invaluable, and often counterintuitive advice for anyone who wants to be more organized and productive—and less stressed—in our 21st-century world.

**The Teaching Revolution** Sep 03 2022 Imagine the school of the future! *The Teaching Revolution* provides a futuristic and provocative discussion on the combining of three major instructional innovations—RTI, technology, and differentiation. Drawing on the growing 21st-century skills movement, the text engagingly weaves these three areas with a vision for school transformation that includes: Utilizing mobile technologies, web-based instruction, and social media RTI that benefits all students and whole schools in their improvement efforts Project-based learning focused on answering real-world questions *The Teaching Revolution* will dare you to dream and guide you through the process of transforming education to become all that you can imagine.

**Reconfigurable Computing** Dec 02 2019 As the complexity of modern embedded systems increases, it becomes less practical to design monolithic processing platforms. As a result, reconfigurable computing is being adopted widely for more flexible design. *Reconfigurable Computers* offer the spatial parallelism and fine-grained customizability of application-specific circuits with the postfabrication programmability of software. To make the most of this unique combination of performance and flexibility, designers need to be aware of both hardware and software issues. FPGA users must think not only about the gates needed to perform a computation but also about the software flow that supports the design process. The goal of this book is to help designers become comfortable with these issues, and thus be able to exploit the vast opportunities possible with reconfigurable logic.

**Color Trends and Selection for Product Design** Jan 15 2021 *Color Trends and Selection for Product Design: Every Color Sells a Story* speaks to the needs of the manufacturing level where colorants are developed, helping manufacturers to understand where their colors will sell and for what period of time these products will be viable. It covers issues such as stability, color measurement, and new methods of incorporation, which are critical in the development of new colorants. The book helps product designers more effectively reach their target audiences by helping them understand more about how colors are chosen for particular markets and how certain colors will perform in designs, including how to evaluate color under different lighting conditions and in, or on, different materials. Knowing how colors will perform in each material and how they will be seen on a store shelf or show room floor is vital. The book gives an important insight into future trends, including new design methods for creating color prototypes and regulatory requirements. The color designer needs to better understand the world of the color formulator, and the formulator conversely needs to understand the needs of the designer, so this book is written for both. Provides an expert assessment of future trends in color, helping color manufacturers to understand how their customers and brand owners select colors Covers the critical issues of stability, color measurement, and new methods of incorporation, helping engineers evaluate color performance in different designs, materials, and lighting

conditions Helps readers stay ahead of the competition with discussions of important regulations and trends in 'green' colors and product design

*Writing the Revolution* Oct 04 2022 A close reading of Wikipedia's article on the Egyptian Revolution reveals the complexity inherent in establishing the facts of events as they occur and are relayed to audiences near and far. Wikipedia bills itself as an encyclopedia built on neutrality, authority, and crowd-sourced consensus. Platforms like Google and digital assistants like Siri distribute Wikipedia's facts widely, further burnishing its veneer of impartiality. But as Heather Ford demonstrates in *Writing the Revolution*, the facts that appear on Wikipedia are often the result of protracted power struggles over how data are created and used, how history is written and by whom, and the very definition of facts in a digital age. In *Writing the Revolution*, Ford looks critically at how the Wikipedia article about the 2011 Egyptian Revolution evolved over the course of a decade, both shaping and being shaped by the Revolution as it happened. When data are published in real time, they are subject to an intense battle over their meaning across multiple fronts. Ford answers key questions about how Wikipedia's so-called consensus is arrived at; who has the power to write dominant histories and which knowledges are actively rejected; how these battles play out across the chains of circulation in which data travel; and whether history is now written by algorithms.

*The Revolution Will Not Be Downloaded* Jun 27 2019 This book responds to the often damaging assumption that everyone is online and is using online resources within the specified parameters of employers, government and national laws. It examines who is using particular online platforms, and the costs they have on citizenship and democracy through that social profile.

*Last Run of the Whisperer* Nov 12 2020 "Last Run of the Whisperer" is a historical fiction novel based upon the Revolutionary War records of William Waterman of Norwich, Connecticut colony. The author has taken the information that William Waterman has provided to us through his own account of his service in the American Revolution, when he petitioned the United States Congress in 1832, for a pension for said service. The author has taken the information provided by William Waterman and completed extensive research on the battles and areas of service that our hero served in, embellishing and expounded upon this information, to develop an exciting and accurate historical story surrounding our hero, William Waterman. William Waterman himself, in his petition to the United States Congress identifies one severe wound received in said service, at the battle of White Plain, in the colony of New York, above New York City. This wound by itself could have cost our hero his life. That he survived this wound and the numerous other battles and action that he undoubtedly saw was extraordinary. Although William Waterman lists a number of battles and theatres of war he saw service in, he does not describe the details of these battles. The author takes his literary liberty, upon researching these battles and events to interject our hero into the battles. That William Waterman is involved in each and every one of these battles or theatres of war in based upon William Waterman's own account. Upon his completion of service in the Continental army, William Waterman listed his next service as a privateer, that is as a licensed pirate. The author has taken the liberty to believe that William Waterman engaged as a privateer in the cause of the upstart Americans and prayed upon British shipping, as he makes no mention of serving the British in his petition to the United States Congress, and infact lists his service as a privateer in his petition for his pension, indicating that all of his papers and records of his service in the Continental army were lost when the ship he was engaged on as a privateer was sunk, leading to his subsequent imprisonment by the British on the prison ship "Jersey". Our hero, William Waterman also does not identify the name of the ship on which he was engaged as a privateer. Again the author takes his literary liberty to name the privateer ship, and thus we have the "Last Run of the Whisperer". During the course of our adventure, William Waterman loses his boyhood friend to the cause of the American Revolution, learns that his father is fighting against him on the side of the British, loses his first love to another man while he is imprisoned, and eventually finds the girl he is to marry while hiding from the British. *Americans Knocking at Freedom's Door* Apr 29 2022 Americans pursue life and liberty through their religious freedom, economic well-being, and self-governance that includes a basic understanding of the constitutional principles provided by our founding fathers. Hopefully, our pursuit of life and liberty also includes a curiosity to explore our rich and diverse history. *Americans Knocking at Freedom's Door* is a uniquely American heritage of religious freedoms and government of and by the people. The author, Bernie Lee Yoder Smith-DeBoe, presents a conversational discussion and a historical exploration of our Christian roots. This book begins with Noah's ark and continues with the ancient tribes, the Middle Ages, religious wars, American DNA, and why the early settlers came to America. Our knowledge of American history generally includes our founding fathers, the Civil War, and more contemporary wars; however, this tells us very little about our early settlers, their challenges, and their background as people of religious faith. This book offers some historical background and stories about those who established and helped the United States to grow and flourish. It reminds us that we are Americans. We stand together as Americans, and we need to come together as Americans.

*Die Beatles 1968* May 19 2021 Der Vorsatz "Wir alle wollen die Welt verändern!" des Songs "Revolution" aus dem Weißen Album der Beatles war eine zentrale Parole im legendären Jahr 1968 und typisch für das kulturelle Klima dieser bewegten Zeit. Die damals produzierte Doppel-LP mit ihren vielen Facetten, ihren magischen Momenten und musikalischen Meisterwerken, ihren Widersprüchen, Kontrasten und Brüchen gilt als ein Schlüsselwerk der Protestgeneration. Kaum ein anderer Meilenstein der Rock-Geschichte vermag das Lebensgefühl jener Tage so prägnant und authentisch zum Ausdruck zu bringen, wie eben das Weiße Album der Beatles. Der Autor Volker Rebell, Beatles-Fan seit dem ersten "Yeah, Yeah, Yeah", versuchte in den Sechzigern seinen Idolen als Sänger und Gitarrist nachzueifern. Mit der verwegenen Ambition, ein deutscher Lennon zu werden, scheiterte er damals kläglich. So wechselte er in das Lager der Kritiker und hat sich seit 1970 einen exzellenten Ruf als Musikjournalist und Rundfunkmoderator erworben.

**Convinced?** Mar 17 2021 What is the complete essence of this book? The Cosmic Harmony of Science, Scripture, and Reason. Can it be indubitably proven that God absolutely exists? Can it really be shown how science actually confirms creation by God? Given that some say not even God can create something out of nothing, exactly how did God create everything in the universe? Just how can the Holy Bible be reliable and the divine Word of God when it is challenged with so much controversy? Can it be irrefutably verified that Jesus was for real, really rose from the dead, and is the Son of God? Did the Great Flood of Noah and his Ark really happen? How? Everybody wants to see proof. Atheists and skeptics often demand it. A total of twenty-one of the most often asked and difficult questions challenging Christianity are answered by coauthors C. J. Rysen, (author of the Christian apocalyptic thriller, a novel, *In the Course of Three Hours* (www.inthecourseofthreehours.com)), and Dan Manternach, a public speaker and leader in the Christian Group, Ministry to Men (www.ministrytomen.net). Both men have collaborated to provide irrefutable answers and explanations in a simple, easy-to-understand, straightforward way, providing new, unexpected, and intriguing perspectives to which you likely may have never given any thought. Many of these will be surprising and often startling to anyone--whether skeptic, agnostic, or atheist. The book is also intended to be a reference source for the layperson, as well as those with formal theological or philosophical education. Although this book is intended to address these questions for the benefit of the "nonbeliever," it also is intended to prepare the believer to help answer such questions and solidify their faith. If one is intellectually honest with oneself, the explanations in this book should be overwhelmingly compelling and absolutely convincing. If they are not, one must ask the question, "Why?"
