Government Budgeting and Expenditure Management Apr 30 2020 The government budget should be the financial mirror of society's choices. Yet most people view budgeting as the epitome of eye-glazing subjects, rarely explained in a way that is understandable to the non-specialist and too often presented without adequate consideration of a country's governance and institutional capacity. Government Budgeting and Expenditure Management fills a gap in the literature to redress these failings and does so in comparative international perspective. This book provides a comprehensive but pithy and easy-to-understand treatment of public financial management, taking into account a variety of special issues including budgeting in post-conflict situations, at subnational government levels, for military/security expenditures, and in countries with large extractive revenues. Distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity, each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues, using concrete examples and illustrations from around the globe. Government Budgeting and Expenditure Management is ideally suited as the primary text for advanced undergraduate or graduate courses in government budgeting or public financial management, or as a supplementary text for courses in public finance, public economics, economic development, public administration or comparative politics. With its attention to practical implementation aspects, the book will also be of direct interest to practitioners, policy-makers, and government employee training organizations.

Economic and Business Analysis Nov 25 2019 As we enter the 21st century, most students are familiar with microcomputers. They are adept in visually-oriented playing and learning, as evidenced by prevalent video games, music videos, and DVD movies. This book appeals to the modern day undergraduate and graduate students by using microcomputers, through innovative uses of spreadsheets and built-in spreadsheets equations and formulae. This microcomputer skill-intensive book covers major topics in both economic analysis and business analysis. Students will learn how to build complex spreadsheet layouts and perform high-level calculations and analysis intuitively in a non-threatening environment. To encourage students' active learning and critical thinking, they will be given hands-on practice by creating tables and graphs presented in the text and homework, and by changing the parameters to find the effects of the change instantly. At the same time, by acquainting themselves with the popular spreadsheet program, they will acquire more advanced job skills directly.

The Economics of the Mind Aug 15 2021 Psychology must be taken into greater account in making the assumptions underlying economic theory congruent with how people actually make choices guiding behavior, according to this move away from the neoclassical paradigm. Rizzello (economics, U. of Torino, Italy) analyzes the debate raging since the 1930s over the role of knowledge between the Walrasian 'objective' approach and Austrian School exponents such as Hayek, who acknowledged the partly unconscious nature of decision-making. The author then traces the development of neo-institutionalism, experimental economics, and evolutionary economics exemplified by the new theory of the firm; and discusses implications of the neurobiological approach. First published as L'Economia Della Mente (1997). Annotation copyrighted by Book News, Inc., Portland, OR

Introduction to International Economics Aug 27 2022 Introduction to International Economics by Dominick Salvatore offers a clear presentation of today's global economy while explaining the workings of the world economy, the major benefits it provides to both people and nations, and the most serious challenges it faces. The text is filled with more than 85 current and relevant case studies and business examples, represented in every chapter. By using real-world data, Salvatore makes international economics applicable to all. Salvatore introduces the four principles of international economics that are essential to understanding, evaluating, and solving the important issues facing the United States and the world today. These principles-addressing topics from deep poverty in developing countries to the globalization of capital markets- are discussed in a simple but comprehensive way. The text also provides the most up-to-date and clear exposition of international economics principles.

East-West Economic Relations in the 1990s Jan 08 2021 This volume contains a number of analyses of the present global situation and provides a reasoned preview of likely macro-economic developments during the next decade in the relations between East and West. It is based on the 1988 11th Workshop on East-West European Economic Interaction.

International Economics Oct 29 2022 International Economics by Dominick Salvatore presents a comprehensive, up-to-date, and clear exposition of the theory and principles of international economics. Salvatore presents concepts that are essential for understanding, evaluating, and suggesting solutions to the important international economic problems and issues facing the United States and the rest of the world today and that they are likely to face in the coming years. Neither overly complex nor too simplistic, International Economics helps readers see the immediate relevance of the material and contains an unparalleled number of real-world applications and examples. This text is an unbound, three hole punched version.

Internationale Wirtschaft May 12 2021 Die 8. Auflage dieses Klassikers der Außenwirtschaftslehre vom Wirtschaftsnobelpreisträger 2008 erscheint in einer Zeit, in der die Entwicklung der Weltwirtschaft die nationale Politik und die politischen Debatten stärker beeinflusst als je zuvor. Die Globalisierung hat alle Bereiche erfasst. Sinkende Transport- und Kommunikationskosten, weltweite Vereinbarungen über den Abbau staatlicher Handelsbeschränkungen und die Auslagerung von Produktionsprozessen in andere Länder haben zu einer ständigen Zunahme des grenzüberschreitenden Handels mit Waren und Dienstleistungen geführt. Die Fragestellungen, mit denen sich die Theoretiker der Außenwirtschaft seit mehr als zweihundert Jahren auseinandersetzen, haben sich dabei nicht grundlegend verändert. Worin bestehen die Vorzüge des Freihandels gegenüber dem Protektionismus? Wo liegen die Ursachen für Außenhandelsüberschüsse oder -defizite und wie werden sie aufgelöst? Worauf sind Banken- und Währungskrisen in offenen Volkswirtschaften zurückzuführen und wie sollte der Staat auf solche Erschütterungen reagieren? Paul Krugman und Maurice Obstfeld stellen die wichtigsten theoretischen Modelle der internationalen Handels- und Finanzbeziehungen vor und unterziehen die Wirtschaftsentwicklung der letzten Jahre einer kritischen Prüfung. Dabei betrachten die Autoren alle Aspekte der Handels- und Währungspolitik stets durch die objektive Brille des Wirtschaftswissenschaftlers. Dem Leser werden somit keine dogmatischen Ausführungen zugemutet, sondern er gewinnt einen unverstellten Einblick in die Möglichkeiten und Grenzen der internationalen Wirtschaftspolitik. Economics and the Mind Jan 28 2020 Economics is often defined as the science of choice or human action. But choice and action are essentially mental phenomena, an aspect rarely mentioned in the economics discourse. Choice, while not always a conscious or rational process, is held to involve beliefs, desires, intentions and arguably even free will. Actions are often opposed to mere bodily movements, with the former being in some sense only understandable in reference to mental processes while the latter are understandable in entirely non-mental, physical terms. While philosophers have long concerned themselves with the connections between these concepts, economists have tended to steer clear of what might appear to be an a priori debate. At the same time, philosophers working on these important notions have tended to not dirty their hands with the empirical, real-world applications in which economists are specialized. This volume fills these gaps by bringing economists and philosophers of mind together to explore the intersection of their disciplines.

Classical Economics, Keynes and Money Jul 02 2020 Classical Economics, Keynes and Money casts new light on an approach to economic theory and policy that combines the modern classical theory of prices and income distribution with a Keynesian analysis of money and finance. Structured in four parts, the work considers issues within classical economics, monetary economics, Keynesian and post-Keynesian Economics, rationality and economic methodology. These themes are all central to the work of Carlo Panico, and the chapters both reflect on and build on his key contributions to the field. This collection is of interest to advanced students and researchers in the history of economic thought, monetary theory, financial economics and heterodox economics.

International Business Jul 22 2019 'International Business' covers international business issues from a multinational perspective. Each chapter features the reverse perspective case that provides material for discussion and/or case analysis from a global perspective not necessarily that of the US.

International Business Aug 23 2019 Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc, Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics

Classical Economics Today Jun 13 2021 *Classical Economics Today: Essays in Honor of Alessandro Roncaglia* is a collection of essays that pays tribute to Alessandro Roncaglia whose research is based on Schumpeter's dictum that good economics must encompass history, economic theory and statistics, and therefore does not generally take the form of elegant formal models that are applicable to all and everything. In this direction, Roncaglia is inspired by the Classical economists of the past and becomes a model for present-day Classical economists. A perceptible family air imbues the essays: all the contributors are friends of Roncaglia and see his personality and his interests as a common point of reference.

The Economics of Joan Robinson Feb 27 2020 Joan Robinson is widely regarded as the greatest female economist and the most important figure in the post-Keynesian tradition. In this volume a distinguished, international team of scholars analyses her extraordinary wide ranging contribution to economics. Various contributions address: * her work on the economics of the short period and her critique of Pigou * her contribution to the development of the Keynesian tradition at Cambridge * her response to Marx and Sraffa * her analysis of growth, development and dynamics * her comments on technical innovation and capital theory * her preference for 'history' rather than equilibrium as a basis for methodology. Her published work spanned six decades, and the volume includes a bibliography of her work including some 450 items which will be a major resource for students of the development of modern economic analysis.

The Open Economy Macromodel: Past, Present and Future Aug 03 2020 The impetus for the conference that was the basis for this volume emanated from the influence of two brilliant minds-Egon Sohmen and Adam Klug, who both died at an early age, leaving their families and the professions of economics and economic history with major voids. In the course of research on the origins of Open Economy Macroeconomics, the significant contributions of Egon Sohmen came to the fore. After correspondence with some of those involved in the early development of the Open Economy Macromodel, we turned to Adam Klug for his views on the matter-as he had dealt with the history of intertemporal trade models in his Ph. D. thesis. And it was Adam who suggested the idea of a conference bringing together economists and economic historians. At this point we want to acknowledge the very generous grant from the Egon Sohmen Foundation and the active participation of Dr. Helmut Sohmen and Mrs. Renee Sohmen at the conference. We also want to thank Prof. Sir Aaron Klug, Nobel Laureate, and the Klug family for their support and the financial contribution of the Adam Klug Memorial Lecture Fund at Ben Gurion University. Other institutions that contributed to the conference were the Gianni Foundation; Bank of Israel; University of North Carolina; Department of Economics, Faculty of Social Science and Aharon Meir Center for Banking, Bar Ilan University; Department of Economics and Faculty of Social Science, Ben-Gurion University of the Negev.

Aid, Trade and Development Mar 10 2021 This enlightening book offers a comprehensive historical analysis of the main development challenges of the last half century and the international community's response through aid and trade. Much has happened: the oil crises of the 1970s, the debt crises of the 1980s, the break-up of the Soviet Union in the 1990s, the Millennium Development Goals, the onslaught of Globalization and the rise of its opponents since the financial crisis of the 2000s. Through it all, development has spread and global poverty declined. The volume assesses the contributions and coherence of developing and developed country policies and the role played by global institutions entrusted with responsibilities to enhance trade and support development. The volume concludes with a focus on the prospects for the future and the changes needed to make globalization more equitable. With 50 years of professional experience in the World Bank, the WTO and bilateral aid agencies, Michalopoulos brings an insider's perspective on the workings of these institutions and what needs to be done to make them more effective and responsive to changing global needs.
