Proceedings of the 3rd International Symposium of Information and Internet Technology (SYMINTech 2018) Oct 14 2020 This book gathers the proceedings of a symposium on the role of Internet technologies and how they can transform and improve people's lives. The Internet is essentially a massive database where all types of information can be shared and transmitted. This can be done passively in the form of non-interactive websites and blogs; or it can be done actively in the form of file sharing and document up- and downloading. Thanks to these technologies, a wealth of information is now available to anyone who can access the Internet. Moreover, Internet technologies are constantly improving: growing faster, offering more diverse information, and supporting processes that would have been impossible in the past. As a result, they have changed, and will continue to change, the way that the world does business and how people interact in their day-to-day lives. In conclusion, the symposium and these proceedings provide a valuable opportunity for leading researchers, engineers and professionals around the globe to discuss the latest advances that are helping the world move forward. They also facilitate the exchange of new ideas in the fields of communication technology to create a dialogue between these groups concerning the latest innovations, trends and concerns, practical challenges and potential solutions in the field of Internet technologies.

At a later age we can still learn a new foreign language. Three new methods to acquire Absolute Pitch and Relative Pitch, supported by software feedback, are presented in this book. The first method, the Singing Funnel method, lets you acquire Absolute Pitch like a foreign language. The second method, the Octave Anchor Pithes method helps you to orientate yourself in the pitch realm. The last method, the Interval Overtone method, improves your interval hearing.

One Square Inch of Silence Nov 14 2020 In the visionary tradition of Rachel Carson's *Silent Spring*, *One Square Inch of Silence* alerts us to beauty that we take for granted and sounds an urgent environmental alarm. Natural silence is our nation's fastest-disappearing resource, warns Emmy-winning acoustic ecologist Gordon Hempton, who has made it his mission to record and preserve it in all its variety—before these soul-soothing terrestrial soundscapes vanish completely in the ever-rising din of man-made noise. Recalling the great works on nature written by John Muir, John McPhee, and Peter Matthiessen, this beautifully written narrative, co-authored with John Grossmann, is also a quintessentially American story—a road trip across the continent from west to east in a 1964 VW bus. But no one has crossed America like this. Armed with his recording equipment and a decibel-measuring sound-level meter, Hempton bends an inquisitive and loving ear to the varied natural voices of the American landscape—bugling elk, trilling thrushes, and drumming, endangered prairie chickens. He is an equally patient and perceptive listener when talking with people he meets on his journey about the importance of quiet in their lives. By the time he reaches his destination, Washington, D.C., where he meets with federal officials to press his case for natural silence preservation, Hempton has produced a historic and unforgettable sonic record of America. With the incisiveness of Jack Kerouac's observations on the road and the stirring wisdom of Robert Pirsig repairing an aging vehicle and his life, *One Square Inch of Silence* provides a moving call to action. More than simply a book, it is an actual place, too, located in one of America's last naturally quiet places, in Olympic National Park in Washington State.
