Membership in Service Clubs Dec 16 2020 Membership in Service Clubs provides the first rigorous assessment of the activities of Rotary, a global service organization founded in 1905 that implements projects and helps build goodwill and peace throughout the world.

Protest, Property and the Commons May 01 2022 *Protest, Property and the Commons* focuses on the alternative property narratives of 'social centres', or political squats, and how the spaces and their communities create their own – resistant – form of law. Drawing on critical legal theory, legal pluralism, legal geography, poststructuralism and new materialism, the book considers how protest movements both use state law and create new, more informal, legalities in order to forge a practice of resistance. Invaluable for anyone working within the area of informal property in land, commons, protest and adverse possession, this book offers a ground-breaking account of the integral role of time, space and performance in the instituting processes of law and resistance.

Financialising City Statecraft and Infrastructure Feb 15 2021 *Financialising City Statecraft and Infrastructure* addresses the struggles of national and local states to fund, finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and spatially uneven mixing of managerial, entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city-region risk undermining national 'rebalancing' efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation, risk-taking and prospective venturing with co-ordination, planning and regulation.

The Primary Curriculum Jan 29 2022 In order to be a successful primary teacher you need a clear understanding of good teaching practice across the subjects that make up the primary curriculum. This second edition has been fully updated to include key points from the 2014 National Curriculum in England, balancing a clear discussion of the principles behind high quality teaching with the requirements of current policy. An emphasis on creative approaches supports you in developing inspiring cross-curricular practice in your classroom. New to this edition: Links to the 2014 National Curriculum in England in every chapter Case studies in every chapter provide useful examples of creative teaching in each curriculum subject Expanded coverage on assessment and planning This is essential reading for students on primary initial teacher education courses, including university-based (PGCE, PGDE, BA QTS, BEd), school-based (SCITT, School Direct, Teach First) and employment-based routes into teaching.

Yearbook of International Humanitarian Law, Volume 20, 2017 Jul 11 2020 The main theme of this volume of the Yearbook of International Humanitarian Law is the development and interpretation of international humanitarian law (IHL). It is elaborated upon in several chapters that examine the role of non-state armed groups in the development and interpretation of IHL, the impact of international criminal law on the development of IHL, the

notion of external non-international armed conflicts, and the regulation of prolonged occupation under international law. The second theme of this volume is dedicated to targeting in armed conflicts. Specific topics include precautions in attack in urban and siege warfare, the targeting of the Islamic State's religious personnel in Iraq and Syria, and the targeting of illicit crop through aerial spraying in Colombia. Besides the chapters that address both themes, this volume also contains a Year in Review describing the most important events and legal developments that took place in 2017. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

Making Open Development Inclusive Apr 07 2020 Drawing on ten years of empirical work and research, analyses of how open development has played out in practice. A decade ago, a significant trend toward openness emerged in international development. "Open development" can describe initiatives as disparate as open government, open health data, open science, open education, and open innovation. The theory was that open systems related to data, science, and innovation would enable more inclusive processes of human development. This volume, drawing on ten years of empirical work and research, analyzes how open development has played out in practice.

Mentoring Geography Teachers in the Secondary School Nov 07 2022 Mentoring Geography Teachers in the Secondary School supports both new and experienced mentors in developing their knowledge and skills in mentoring in geography education. Within the book, chapter authors critically consider how mentoring has been conceptualised and represented in policy and academic debate, as well as examining how mentoring in geography education has been experienced and perceived in practice. Chapters in the book explore a range of perspectives, experiences and aspects of mentoring geography teachers, including: • Critical engagement with educational policy and practice • Perspectives from beginning geography teachers • Mentoring as a professional development opportunity • The value of engaging with the geography education community in teacher education • How mentoring meetings and conversations can support beginning geography teachers in their growth and development This book is a vital source of support and inspiration for all those involved in developing the next generation of geography teachers. The themes of justice, agency and voice - raised and engaged with implicitly and explicitly throughout this edited collection - are of critical importance to mentors, beginning teachers and geography education more broadly in developing and enacting a progressive vision of mentoring.

Mobilities and Foucault Jul 31 2019 Although Foucault's work has been employed and embraced enthusiastically by some 'mobilities' scholars, discussion across these two traditions to date has mostly been partial and unsystematic. Yet Foucault's work can make critical contributions, for example, to thinking about governing mobilities in contemporary societies, while conversely mobilities research opens up new perspectives on Foucault. In combination these bodies of work can illuminate issues as diverse as: the greater interdependencies between mobility systems (e.g. transport, tourism, trade, internet use); the proliferation of the undesired mobilities of viruses, of natural phenomena like fire, of (what is taken to be) criminality and other seemingly inevitable by-products of globalisation; the perceived threats to desirable forms of mobility as constituted by climate change, peak oil and energy security, and terrorism and warfare; and the increased popularity of logics of governance premised on choice, responsabilisation and the (re)coding of phenomena in economic terms under neo-liberalism. Against this background, this book brings together the first major collection of contributions from across the social sciences with a shared interest in both mobilities and Foucauldian thinking. This book was published as a special issue of Mobilities.

The Empirical and Institutional Dimensions of Smart Specialisation Nov 14 2020 Smart specialisation is the new policy approach to the development of regional innovation systems across Europe and it involves fostering innovative and entrepreneurial initiatives which are well tailored to the local context. The different technologies, skills profiles, business activities, institutions and sectors which reflect a region's economic strengths and potential are to be fostered and encouraged to diversify in ways which also exploit the region's linkages with broader global value-chains. Yet, the ideas contained in the smart specialisation agenda have until now been primarily conceptual in nature. The Empirical and Institutional Dimensions of Smart Specialisation draws together some of the leading regional economists and scientists in Europe to analyse how smart specialisation is working in practice. This book investigates different dimensions of the agenda as it is developing across parts of Europe from both quantitative and qualitative perspectives. The quantitative analysis examines the nature of the diversification processes undertaken by regions and the interplay between the chosen local regional development priorities and the wider global value-chain impacts of these choices. Meanwhile, the qualitative analysis examines the institutional opportunities and challenges facing policy makers and the key elements most likely to provide the underpinnings of a workable set of policy settings. The book is aimed both at academic researchers interested in the interface between economic geography

and regional innovation systems as well as at policy makers making public policy decisions related to regional development at the local, city, regional or national levels.

Disaster Risk Reduction for Economic Growth and Livelihood Dec 28 2021 The prevalence of natural disasters in recent years has highlighted the importance of preparing adequately for disasters and dealing efficiently with their consequences. This book addresses how countries can enhance their resilience against natural disasters and move towards economic growth and sustainable development. Covering a wide range of issues, it shows how well thought-out measures can be applied to minimize the impacts of disasters in a variety of situations. Starting with the need for coping with a rapidly changing global environment, the book goes on to demonstrate ways to strengthen awareness of the effectiveness of preventive measures, including in the reconstruction phase. The book also covers the roles played by different actors as well as tools and technologies for improved disaster risk reduction. It focuses on a variety of case studies from across Asia, Africa and Latin America, drawing out lessons that can be applied internationally. This book will be of great interest to professionals in disaster management, including national governments, donors, communities/citizens, NGOs and private sector. It will also be a highly valuable resource for students and researchers in disaster management and policy, development studies and economics.

China's Economy Mar 31 2022 This collection of critical surveys provides readers with a range of up-to-date work from leading scholars in the area, writing on some of the key issues facing China, as they survey the present and future challenges of the Chinese economy Nine papers provide detailed discussion on key aspects of the past, present and future of the Chinese economy Leaders in their relevant fields of scholarship tackle some of the critical issues facing China Contributors identify common themes, including the household registration system, urbanization, demographic transition, inequality and the sustainability of economic growth Articles provide a critical review of the literature and discuss policy implications and areas for future research

Instruments of Planning Mar 07 2020 *Instruments of Planning: Tensions and Challenges for more Equitable and Sustainable Cities* critically explores planning's instrumentality to deliver important social and environmental outcomes in neoliberal planning landscapes. Because each instrument is unique and may be tailored to its own jurisdictional needs, *Instruments of Planning* is a compendium of case studies from urban regions in Australia, Canada, the United States and Europe, providing readers with a collection that critically challenges the role and potential of planning instruments and instrumentality across a range of contexts. *Instruments of Planning* captures the political, institutional, and economic challenges that confront planning. It examines planning instruments designed to assist with strategic planning and implementation, and considers the role that technology plays in unpacking and understanding complexity in planning. Written by Rebecca Leshinsky and Crystal Legacy of RMIT University in Melbourne, Australia, this book fills the gap in planning theory about the instrumentality of planning in the neoliberal urban context. It is essential reading for students, urban researchers, policy analysts and planning practitioners.

Reconfiguration of the Global South Jan 05 2020 Since the 1980s there has been a steady shift from West to East in the international system, economically, politically and culturally. Emerging markets in Asia have moved up the value chain of industrial production processes, while the share of Western industrialized countries in global gross domestic product has declined. Countries such as China and India are asserting themselves in security matters and seeking new avenues for investment flows and development co-operation. China's expected shift from export-led growth to domestic consumption might further change patterns of trade and capital flows, and it is an open debate whether the growth dynamics of India might outstrip those of China. While the rise of China and other Asian powers has been studied extensively, much less work has been done on how Africa and Latin America position themselves in this process. What will the role be of Africa and Latin America in the 'Asian Century' and associated reconfigurations of global value chains? Will these regions be able to assert themselves and find a voice of their own? Will they manage to develop industries of their own and diversify trade relations? Will they launch new ways of regional south-south co-operation? What is the role of migrant communities and cultural exchange? Do Western and Asian approaches to these regions differ (Washington vs. Beijing consensus)? This book brings together renowned academics from Africa, Latin America, Europe and the USA, who bring refreshing perspectives on an under-researched topic, ranging from a conceptualization of the issue within new theoretical approaches, to unique case studies based on field work.

Learning to Teach Geography in the Secondary School Sep 05 2022 *Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial

teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, *Learning to Teach Geography in the Secondary school* is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of *Learning to Teach Geography in the Secondary School*... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

Global Perspectives on Contemporary Marketing Education Nov 26 2021 A successful marketing department has the power to make or break a business. Today, marketing professionals are expected to have expertise in a myriad of skills and knowledge of how to remain competitive in the global market. As companies compete for international standing, the value of marketing professionals with well-rounded experience, exposure, and education has skyrocketed. *Global Perspectives on Contemporary Marketing Education* addresses this need by considering the development and education of marketing professionals in an age of shifting markets and heightened consumer engagement. A compendium of innovations, insights, and ideas from marketing professors and professionals, this title explores the need for students to be prepared to enter the sophisticated global marketplace. This book will be invaluable to marketing or business students and educators, business professionals, and business school administrators.

Atlas of Knowledge Aug 12 2020 The power of mapping: principles for visualizing knowledge, illustrated by many stunning large-scale, full-color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge; they reveal bursts of activity, pathways of ideas, and borders that beg to be crossed. This book, from the author of *Atlas of Science*, describes the power of topical maps, providing readers with principles for visualizing knowledge and offering as examples forty large-scale and more than 100 small-scale full-color maps. Today, data literacy is becoming as important as language literacy. Well-designed visualizations can rescue us from a sea of data, helping us to make sense of information, connect ideas, and make better decisions in real time. In *Atlas of Knowledge*, leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis. Drawing on fifteen years of teaching and tool development, she introduces a theoretical framework meant to guide readers through user and task analysis; data preparation, analysis, and visualization; visualization deployment; and the interpretation of science maps. To exemplify the framework, the *Atlas* features striking and enlightening new maps from the popular "Places & Spaces: Mapping Science" exhibit that range from "Key Events in the Development of the Video Tape Recorder" to "Mobile Landscapes: Location Data from Cell Phones for Urban Analysis" to "Literary Empires: Mapping Temporal and Spatial Settings of Victorian Poetry" to "Seeing Standards: A Visualization of the Metadata Universe." She also discusses the possible effect of science maps on the practice of science.

The Unions' Response to Globalization Oct 26 2021 Globalization is commonly described in trade and cultural terms but its impact on unions and collective bargaining is seldom assessed. The few studies of unions and globalization are mostly collections of cases studies of how unions can work together or with other alliance partners to defend against the power of multinational corporations. This book goes beyond the current research by asking how unions have tried to deal with globalization and how globalization might threaten the fundamental union mission of taking wages, hours and conditions of employment out of competition. The introductory chapter defines globalization and uses the case of the Detroit Three automakers (GM, Chrysler and Ford) to show how globalization can affect employment and union size, influence and relevancy. The second chapter shows how unions deal globalization through collective bargaining regarding outsourcing, alliances, strikes and political action, including lobbying and international work standards. The final chapter argues that the unions cannot continue unchanged in this age of globalization and asks what they must do to be effective and relevant.

Teaching Geography Creatively Sep 24 2021 *Teaching Geography Creatively* was Winner of the Geographical Association Gold Award 2014 and Winner of the Geographical Association Silver Award 2017. This fully updated second edition of *Teaching Geography Creatively* is a stimulating source of guidance for busy trainee and experienced teachers. Packed full of practical approaches for bringing the teaching of geography to life, it offers a range of innovative ideas for exploring physical geography, human geography and environmental issues. Underpinned by the very latest research and theory, expert authors from schools and universities explore the inter-relationship between creativity and learning, and consider how creativity can enhance pupils' motivation, self-image

and well-being. Two brand new chapters focus on creative approaches to learning about the physical world, as well as the value of alternative learning settings. Further imaginative ideas include: games and starter activities as entry points for creative learning how to keep geography messy the outdoors and learning beyond the classroom how to teach geography using your local area the links between geography and other areas of the curriculum looking at geography, creativity and the future fun and games in geography engaging with the world through picture-books teaching about sustainability. With contemporary, cutting-edge practice at the forefront, *Teaching Geography Creatively* is an essential read for all trainee and practicing teachers, offering a variety of practical strategies to create a fun and stimulating learning environment. In the process it offers a pedagogy that respects the integrity of children as joyful and imaginative learners and which offers a vision of how geography can contribute to constructing a better and more equitable world.

Reformatted May 09 2020 The impact of digital technology on the musical economy has been profound. From its production, reproduction, distribution, and consumption, the advent of MP3 and the use of the Internet as a medium of distribution has brought about a significant transformation in the way that music is made, how it is purchased and listened to, and, significantly, how the musical economy itself is able to reproduce itself. In the late 1990s the obscure practice of 'ripping' tracks from CDs through the use of compression programmes was transformed from the illegal hobby of a few thousand computer specialists to a practice available to millions of people worldwide through the development of peer-to-peer computer networks. This continues to have important implications for the viability of the musical economy. At the same time, the production of music has become more accessible and the role of key gatekeepers in the industry—such as record companies and recording studios—has been undermined, whilst the increased accessibility of music at reduced cost via the Internet has revalorised live performance, and now generates revenues higher than recorded music. The early 21st century has provided an extraordinary case study of an industry in flux, and one that throws light on the relationship between culture and economy, between passion and calculation. This book provides a theoretically grounded account of the implications of digital technology on the musical economy, and develops the concept of the musical network to understand the transformation of this economy over space and through time.

Metropolitan Commuter Belt Tourism Sep 12 2020 With the current rise of metropolitan regions as a present location and driver of the development of rural tourism, agritourism, food tourism and nature tourism, there is a need to analyse the major economic, social, political and managerial aspects of these types of tourism which occur within the rural-urban fringe. This book establishes a current inventory and appropriate future selection of commuter belt tourism products for metropolitan areas. It also explains how public and private resources can be combined to achieve synergistic effects in tourism promotion and provides a structural analysis for the proper management of tourist organisations in metropolitan areas. Additionally, there is insight into how the development of metropolitan areas affects rural tourism and agritourism within broader social, economic and environmental relations. The issue of the growth of metropolitan areas, which is a complex and multifaceted challenge, is elaborated on with diverse examples in Poland and further afield. This is valuable reading for students, researchers and academics of tourism, as well as rural and urban studies, business management, farm management, and leisure studies.

Learning to Teach in the Primary School Aug 31 2019 Flexible, effective and creative primary school teachers require subject knowledge, an understanding of their pupils and how they learn, a range of strategies for managing behaviour and organising environments for learning, and the ability to respond to dynamic classroom situations. This third edition of *Learning to Teach in the Primary School* is fully updated with reference to the new National Curriculum, and has been revised to provide even more practical advice and guidance to trainee primary teachers. Twenty-two new authors have been involved and connections are now made to Northern Irish, Welsh and Scottish policies. In addition, five new units have been included on: making the most of your placement play and exploration in learning behaviour management special educational needs phonics. With Masters-level reflective tasks and suggestions for research-based further reading, the book provides valuable support to trainee teachers engaged in learning through school-based experience and through reading, discussion and reflections as part of a teacher education course. It provides an accessible and engaging introduction to knowledge about teaching and learning that every student teacher needs to acquire in order to gain qualified teacher status (QTS). This comprehensive textbook is essential reading for all students training to be primary school teachers, including those on undergraduate teacher training courses (BEd, BA with QTS, BSc with QTS), postgraduate teacher training courses (PGCE, SCITT) and employment-based teacher training courses (Schools Direct, Teach First), plus those studying Education Studies. This textbook is supported by a free companion website with additional resources for instructors and students and can be accessed at www.routledge.com/cw/Cremin.

DRHA2014 Proceedings / Full Papers Jun 09 2020

OECD Economic Surveys: Brazil 2013 May 21 2021 OECD's 2013 economic review of Brazil examines recent economic developments, policies and prospects. This edition's special chapters cover productivity and competitiveness of Brazilian firms and income distribution and the new middle class.

Highlighting the Importance of Big Data Management and Analysis for Various Applications Apr 19 2021

This book addresses the impacts of various types of services such as infrastructure, platforms, software, and business processes that cloud computing and Big Data have introduced into business. Featuring chapters which discuss effective and efficient approaches in dealing with the inherent complexity and increasing demands in data science, a variety of application domains are covered. Various case studies by data management and analysis experts are presented in these chapters. Covered applications include banking, social networks, bioinformatics, healthcare, transportation and criminology. *Highlighting the Importance of Big Data Management and Analysis for Various Applications* will provide the reader with an understanding of how data management and analysis are adapted to these applications. This book will appeal to researchers and professionals in the field.

Interpreter: A Journal of Mormon Scripture, Volume 14 (2015) Oct 06 2022 This is volume 14 (2015) of *Interpreter: A Journal of Mormon Scripture* published by The Interpreter Foundation. It contains articles on a variety of topics including "Sustaining the Brethren," "Who Was Sherem," "Whoso Forbiddeth to Abstain from Meats," "Where in Cincinnati Was the Third Edition of the Book of Mormon Printed?" "Celestial Visits in the Scriptures, and a Plausible Mesoamerican Tradition," "Father is a Man: The Remarkable Mention of the name Abish in Alma 19:16 and Its Narrative Context," "A Redemptive Reading of Mark 5:25-34," "Restoring the Original Text of the Book of Mormon," "The Implications of Past-Tense Syntax in the Book of Mormon," "Reflections of Urim: Hebrew Poetry Sheds Light on the Directors-Interpreters Mystery," "John L. Sorenson's Complete Legacy: Reviewing Mormon's Codex," "Lehi the Smelter: New Light on Lehi's Profession," and "Place of Crushing: The Literary Function of Heshlon in Ether 13:25-31."

Security, Clans and Tribes Feb 27 2022 Offering an introduction to clanism and tribalism in the Gulf of Aden area, Dr Lewis uses these concepts to analyse security in Yemen, Somalia, Somaliland and the broader region. This historical overview of conflict in each country, and the resulting threats of piracy and terrorism, will benefit both the casual reader and student of development.

Rural Politics in Contemporary China Dec 04 2019 This collection provides an overview of China's rural politics, bringing scholarship on agrarian politics from various social science disciplines together in one place. The twelve contributions, spanning history, anthropology, sociology, environmental studies, political science, and geography, address enduring questions in peasant studies, including the relationship between states and peasants, taxation, social movements, rural-urban linkages, land rights and struggles, gender relations, and environmental politics. Taking rural politics as the power-inflected processes and struggles that shape access and control over resources in the countryside, as well as the values, ideologies and discourses that shape those processes, the volume brings research on China into conversation with the traditions and concerns of peasant studies scholarship. It provides both an introduction to those unfamiliar with Chinese politics, as well as in-depth, new research for experts in the field. This book was published as a special issue of the *Journal of Peasant Studies*.

Innovative Approaches for Sustainable Development Jul 03 2022 This book provides recent understanding about the sustainable development in agriculture. It includes information regarding new approaches for sustainable development in agriculture, horticulture and fisheries. It examines the effect of climate change and provides information on climate smart practices. In addition, some important aspects like quality seed production, role of bioinoculants, on-farm water harvesting, non-thermal processing of food, importance of water use in organic agriculture have also been discussed. It also presents in detail plant disease aspect and their management strategies. This book aims to provide an overall understanding of all aspects related to the study of environment resources, its protection for sustainable development. To meet the growing food demand of the over nine billion people who will exist by 2050 and the expected dietary changes, agriculture will need to produce 60 percent more food globally in the same period. The goal of sustainable agriculture is to meet society's food and textile needs in the present without compromising the ability of future generations to meet their own needs. Practitioners of sustainable agriculture seek to integrate three main objectives into their work: a healthy environment, economic profitability, and social and economic equity. Every person involved in the food system growers, food processors, distributors, retailers, consumers, and waste managers can play a role in ensuring a sustainable agricultural system.

Social Geographies Mar 19 2021 Marking the renaissance of social geographies in recent years, this major textbook showcases the breadth of conceptual and empirical approaches that scholars now utilize to understand contemporary social issues through a spatial lens. The book is collectively authored by one of the largest groups of social geographers in the world. It develops a vision of social geographies that is rooted in the commitments that have characterised the sub-discipline for at least half a decade (e.g. society-space relations, justice, equality), while incorporating new approaches, theories and concerns (e.g. emotions, performance, and the more-than-human). Embracing the increasing porosity of our work with neighbouring economic, cultural, political and environmental geographies, the book provides a round-up of the state of the sub-discipline, capturing recent directions and charting new questions and challenges for theory, research and practice. It makes sense of the bewildering variety of contemporary social geographical interests, from longstanding topics (e.g. race, class and gender) to more recent

interests (e.g. sustainability, digital worlds and social change). Above all, it makes clear the relevance and contributions of social geographies not only to understanding a wide range of global and local issues, but to social change alongside communities, policy-makers and social movements. Each chapter offers an introduction to current work in social geographies, providing an overview and in-depth examples. The book has these key features that make it an essential resource for any social geography course: An accessible and engaging style that is ideal for entry level students Definitions of key terms and carefully explained concepts and ideas A range of exciting contemporary examples from a wide variety of geographical settings, including those drawn from the authors' recent research Cross-referencing between chapters to help students expand learning Illustration with photos, tables, diagrams and other material Suggestions for further reading in each chapter "Real world research" and "real world theory" textboxes providing examples of research projects and theoretical perspectives, bringing topics alive and exploring challenges on the ground

World Development Report 2020 Jan 17 2021 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. *World Development Report 2020: Trading for Development in the Age of Global Value Chains* examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

New directions in telecollaborative research and practice: selected papers from the second conference on telecollaboration in higher education Aug 24 2021 This collection of papers, consisting of 39 delegate contributions and three keynote articles from "New directions in telecollaborative research and practice: the second conference on telecollaboration in higher education" hosted by Trinity College Dublin in April 2016, offers a window on a rapidly evolving form of learning. Telecollaboration is used in many formats and contexts, but has as a defining feature the ability to unite learners from classrooms around the world in meaningful computer-mediated tasks and activities. This cross-disciplinary overview discusses telecollaboration in support of language and culture, teacher training, student mobility, and other disciplines and skills from a range of analytical perspectives. It will be of interest to anyone working in HE as an educator, researcher, educational designer, mobility officer, decision maker or administrator.

Diversified Development Aug 04 2022 This report is about the twelve countries of the former Soviet Union (Eurasia). About 85 percent of the region's economic output is in six resource-rich economies. Today, 85 percent of Eurasia's 280 million people are no longer poor. But academics who study resource-based economies debate whether these countries are cursed or blessed. And Eurasia's policymakers long for the day when their economies are less extractive and more innovative. These observations prompt questions: Are resources a blessing or a curse? If it is one of these things, what would make it into the other? How much should Eurasia try to diversify their exports and economies away from natural resources? Are there ways to make Eurasian economies both extractive and innovative? The answers: a large majority of Eurasia's people should consider themselves blessed. To make sure that this blessing does not become a curse, Eurasian economies have to become efficient—more productive, job-creating, and stable. But efficiency is not the same as diversification: there is little evidence that more concentrated economies have slower productivity growth, fewer jobs, or much more economic volatility. Governments need to worry less about the composition of exports and production and more about asset portfolios—natural resources, built capital, and economic institutions. They have much to do. Eurasia's portfolios are heavy in tangibles like oil and gas and roads and railways and light in intangibles such as the institutions for managing resource earnings, providing social services, and regulating enterprise. But tangibles are not what distinguish success from failure—investments in intangibles, early in their development, have made some resource-rich countries both extractive and innovative.

Ecological Wisdom Inspired Restoration Engineering Nov 02 2019 This book focuses on ecological wisdom inspired restoration engineering through theories, hypotheses, policies, practical understanding, and case studies. Understanding nature's processes is a prerequisite for the healthy and sustainable functioning of a habitable Earth. As such, the book provides a guide for readers seeking to understand and build sustainable, urban socio-ecological systems using restoration technologies based on wisdom. Motivated by recent rapid advances in restoration engineering, such as the role of green building materials in urban infrastructures, and developing sustainable landscapes to benefit the environment, economy and communities, it is an essential reference on the most promising innovative technologies. It discusses engineering methods and practices in the restoration of soil, water, heritage sites, and other ecosystems, as well as the development and applications of green building materials. It presents a

holistic and systematic approach that utilizes natural resources and the concept of ecological wisdom to reap sustainable environmental, economic and social benefits to fulfill the concept of living in harmony with nature. This book is a valuable resource for civil- and environmental engineering researchers as well as organizations engaged in eco-restoration practices.

Insight Turkey 2015? ?- Fall 2015 (Vol. 17, No. 4) Jun 29 2019 Last year was the year of elections in Turkey with two parliamentary elections and months-long electoral campaigns that dominated the political agenda of the country. The parliamentary elections of June 7, 2015 brought an end to the AK Party's 12-year long era of parliamentary majority and single-party government in Turkey. Nevertheless, the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon. The country was ruled by an AK Party-led interim government and the elections were repeated five months later on November 1, 2015. While close in time, the two elections were quite distant with regard to the political contexts in which they were carried out, and in their respective results. The November elections witnessed a comeback for the AK Party, which increased its votes by over 9 points with the addition of five million new votes in the ballot box.

The Political Economy and Media Coverage of the European Economic Crisis Jun 02 2022 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

Agriculture, Diversification, and Gender in Rural Africa Oct 02 2019 This book contributes to the understanding of smallholder agriculture in sub-Saharan Africa through addressing the dynamics of intensification and diversification within and outside agriculture in contexts where women have much poorer access to agrarian resources than men.

The SAGE Handbook of Curriculum, Pedagogy and Assessment Jun 21 2021 The research and debates surrounding curriculum, pedagogy and assessment are ever-growing and are of constant importance around the globe. With two volumes - containing chapters from highly respected researchers, whose work has been critical to understanding and building expertise in the field - The SAGE Handbook of Curriculum, Pedagogy and Assessment focuses on examining how curriculum is treated and developed, and its impact on pedagogy and assessment worldwide. The Handbook is organised into five thematic sections, considering: · The epistemology and methodology of curriculum · Curriculum and pedagogy · Curriculum subjects · Areas of the curriculum · Assessment and the curriculum · The curriculum and educational policy The SAGE Handbook of Curriculum, Pedagogy and Assessment's breadth and rigour will make it essential reading for researchers and postgraduate students around the world.

Global Monitoring Report 2013 Jul 23 2021 The Global Monitoring Report 2013: Rural-Urban Dynamics and the Millennium Development Goals examines rural-urban disparities in the achievement of the Millennium Development Goals (MDGs) and how urbanization, if managed well, can contribute to the attainment of these goals. The report provides information about the differences in progress toward the MDGs across geographical areas and recognizes that urban populations are better off than their rural brethren. However, unfettered urbanization can cause migrants and the urban poor to end up in slums where attainment of the MDGs lags. GMR 2013 calls for an integrated strategy to better manage the planning-connecting-financing formula of urbanization. Notwithstanding the importance of urbanization in poverty reduction and MDG attainment, rural areas remain a huge challenge--one that underscores the importance of policies that can improve rural livelihoods. The rural-urban spectrum ranges from small towns to large cities. The general experience is that poverty is lowest in the largest cities and considerably higher in smaller towns. The MDGs reflect the basic needs of all citizens, and governments should aim to meet them fully in both urban and rural areas. However, resources are scarce, so priorities must be set and trade-offs made. The report argues that the sequencing of actions be tailored to local conditions when it comes to the degree of urbanization and rural-urban differences in MDG outcomes. The world has met four global MDG targets. New estimates confirm the 2012 reports that MDG 1.a--reducing the \$1.25-a-day poverty rate (2005 purchasing power parity)--was reached in 2010, falling below half of its 1990 value. The world also met part of MDG 7.c--to halve the proportion of people without safe access to drinking water--in 2010. MDG 7.d--to improve significantly the lives of at least 100 million slum dwellers by 2020--was also achieved. Finally, the first part of MDG 3.a--to eliminate gender disparity in primary education-- was accomplished in 2010. Global progress on the full MDG 3.a (to eliminate gender disparity in primary and secondary education) is close to being on track. Global Monitoring Report

2013 was prepared jointly by the World Bank and the International Monetary Fund, with consultations and collaborations with regional development banks and other multilateral partners.

Local Social Innovation to Combat Poverty and Exclusion Feb 04 2020 Based on more than thirty case studies in eight different countries, this book explores the governance dynamics of local social innovations in the field of poverty reduction. The diverse team of contributors reflect on the trajectory of social innovation in European governance. They illustrate how different governance dynamics and welfare mixes enable or hinder poverty reduction strategies and analyse how they involve a diversity of actors, instruments and resources at different spatial scales. The contributions are based on research motivated by the standstill in the fight against poverty in Europe and the anxiety that conventional macro-social policies are insufficient to deal with the current challenges.

Young Women's Carceral Geographies Oct 14 2020 Interrogating conceptual ideas around power, punishment and abandonment with specific reference to the experience of young women, this book examines the particular challenges that young women face within the criminal justice system, and traces their journeys in, out and beyond confinement.
