Capitalist Diversity on Europe's Periphery May 11 2020 With the collapse of the Council for Mutual Economic Assistance in 1991, the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future. Capitalism, they found, was not a single set of political-economic relations. Rather, they each had to decide what sort of capitalist nation to become. In *Capitalist Diversity on Europe's Periphery*, Dorothee Bohle and Béla Greskovits trace the form that capitalism took in each country, the assets and liabilities left behind by socialism, the transformational strategies embraced by political and technocratic elites, and the influence of transnational actors and institutions. They also evaluate the impact of three regional shocks: the recession of the early 1990s, the rolling global financial crisis that started in July 1997, and the political shocks that attended EU enlargement in 2004. Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy: neoliberal, embedded neoliberal, and neocorporatist. The Baltic states followed a neoliberal prescription: low controls on capital, open markets, reduced provisions for social welfare. The larger states of central and eastern Europe (Poland, Hungary, and the Czech and Slovak republics) have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy. Slovenia has proved to be an outlier, successfully mixing competitive industries and neocorporatist social inclusion. Bohle and Greskovits also describe the political contention over such arrangements in Romania, Bulgaria, and Croatia. A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe, this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis.

Environmental Change and Human Security: Recognizing and Acting on Hazard Impacts Sep 14 2020 Environmental and Human Security: Then and Now 1 2 ALAN D. HECHT AND P. H. LIOTTA * 1 U. S. Environmental Protection Agency Office of Research and Development 2 Pell Center for International Relations and Public Policy Salve Regina University 1. Nontraditional Threats to Security The events of September 11, 2001 have sharpened the debate over the meaning of being secure. Before 9/11 there were warnings in all parts of the world that social and environmental changes were occurring. While there was prosperity in North America and Western Europe, there was also increasing recognition that local and global effects of ecosystem degradation posed a serious threat. Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher, for example, travel writer Paul Theroux concluded that development in sub-Saharan Africa had failed to improve the quality of life for 300 million people: "Africa is materially more decrepit than it was when I first knew it—hungrier, poorer, less educated, more pessimistic, more corrupt, and you can't tell the politicians from the witch-doctors" (2002). While scholars and historians will debate the causes of 9/11 for some time, one message is clear: An often dizzying array of nontraditional threats and complex vulnerabilities define security today. We must understand them, and deal with them, or suffer the consequences. Environmental security has always required attention to nontraditional threats linked closely with social and economic well-being.
