Women's Voices from the Rainforest Oct 02 2019 Women's Voices from the Rainforest explores the position of the women whose families are tearing down the rainforest. These women of Central and Latin America have been largely invisible until now, but they are at last turning their voices into action. International development policy and its top-down culture must take much of the blame for environmental and social destruction of the rainforest. Presenting the contrasting results of different methodologies, a comprehensive literature review, and the voices of the rainforest women themselves, told in life histories, the authors argue for the adoption of "grassroots" strategies, not international solutions.

[Borneo](#) Aug 31 2019 Presents the history, people, sights, and cultures of Kalimantan, or Borneo, and includes travel tips and itineraries

Rainforest Strategy Oct 14 2020 [DIV](#) Locked away in the world's rainforests are the most productive and fruitful ecosystems in the world. How they transform scarcity into abundance is what every entrepreneur and businessperson needs to know. [div](#)

Conversations In The Rainforest Jan 17 2021

[The Rainforests of West Africa](#) Dec 28 2021 Nowhere else in the world did industrialized countries leave such early marks in the rainforest as in West Africa. Past and present developments here are in one way or the other significant for rainforests on other continents as well. West Africa is a pioneer in both a good and a bad sense. This is reason enough to take a closer look at the history of moist tropical West Africa. Until recently, no one really seemed to be interested in the rainforests except for a few specialists. The world's scientific community neglected to study the incalculable riches of tropical forests, to make the public aware of them and their due importance. Although interdisciplinary research has been a popular topic for some decades now, it was not applied to just the most complex habitat on earth. Scientists from all fields studied only that which was easiest to record, seemingly blind to a myriad of details awaiting closer examination. Botanists went about establishing their herbariums and paid much too little attention to the vegetation as a whole, or to the significance of useful plants for local populations. Zoologists, too, busied themselves with collecting and describing species. Anthropologists, on the other hand, tended to overlook faunal details: in their ignorance of the animal world, they wrote of tigers and deer in Africa. And finally, foresters saw neither the forest nor the trees for the timber - and even confused rainforests with monocultures of fir trees.

The Rainforest Survivors May 21 2021 Even in our hyper-connected world, there are tribes scattered across the far reaches of the globe who still live much the same way that their ancestors did thousands of years ago. Having had minimal contact with the outside world, these peoples currently live in harmony and unison with the environment around them. But as technology grows and the human population expands, the way of life of these tribes becomes increasingly threatened with every passing day. In *The Rainforest Survivors*, veteran overseas reporter Paul Raffaele recounts his time spent with three unique jungle tribes: the peace-loving Congo Pygmies, New Guinea's tree-dwelling Korowai cannibals, and the Amazonian's ferocious Korubo. Over months spent living in these three communities, Raffaele experienced firsthand wisdom and mysterious rites forged over many millennia. Resonating with high adventure and remarkable characters, *The Rainforest Survivors* details the daily lives of these relatively unknown peoples and provides key political and environmental context, showing how outside forces are closing in on them and threatening to change forever their ways of life. Enthralling and unforgettable, this compelling book is the important portrait of indigenous peoples living the way they have for centuries.

Journey Into the Rainforest Aug 04 2022 Journey into the Rainforest is an adventurous journey through the most magical place on earth. We explore the whole of the forest, from its floor up to the canopy and beyond. Tropical rainforests are the home of millions of strange and beautiful plants and animals - these are captured here in stunning wildlife photography, accompanied by lively text. Tim Knight has lived in the rainforests of South-East Asia, working on nature conservation projects. He regularly lectures in schools, leads youth expeditions and raises funds for the conservation of rainforest wildlife.

Deep into the Amazon Jungle Aug 12 2020 Two young explorers journey with Fabien Cousteau into the depths of the Amazon Jungle to find a new species of piranha in this next colorful installment of the Fabien Cousteau Expeditions graphic novel series. Set sail with junior explorers Will and Jacklyn as they embark on a riverboat journey from Iquitos, Peru, into the Amazon Jungle with Fabien Cousteau and his crew of scientists. They are responding to rumors of a new species of giant piranha, intending to prove the piranha's existence and determine whether they are dangerous to people living nearby. But the Amazon is estimated to be home to one-third of the world's plant and animal species, so along the way the team will also encounter dolphins, vampire bats, colorful macaws, poisonous frogs, and countless other wonders that call this great rainforest home. Vibrant and dramatic illustrations accompany this riverside adventure that introduces young readers to the diverse populations that reside in the Amazon. Kids will also learn about the consequences of deforestation for our entire planet as well as the numerous ways that every person can do their share to preserve our forests, reduce waste, and help the environment.

Step into the Rainforest Sep 05 2022 Presents information about rain forests, including what they are, the difference between tropical and temperate rain forests, where each type exists, how they form, and the kinds of animals that live in them.

[A Rainforest Food Chain](#) Oct 26 2021 Introduces some of the plants and animals of the rainforest food chain, including the cacao tree, the quetzal, leafcutter ant, poison dart frog, boa constrictor, king vulture, vampire bat, and jaguar.

DK Eyewitness Books The Amazon Jul 03 2022 A unique, lavishly illustrated e-guide to the beauty and diversity of the Amazon--the rainforest and the river, its flora and fauna, and the people who live in the region. Applying the award-winning DK Eyewitness formula to the subject of the largest and most bio-diverse tract of tropical rainforest in the world, and the vast river that winds its way through it, this title profiles everything from the birds, animals, and insects that live there to the nine South American countries it extends across.

[Houses in the Rainforest](#) Feb 27 2022 "Roy Richard Grinker, writing about the relationship between Pygmies and their farmer counterparts, breaks new ground in the theory of social institutions and ethnicity." [Jan Vansina, University of Wisconsin, Madison](#)

[LOMAKO: Into The African Rain Forest](#) Jun 02 2022 Lomako tells a story from the nineties in the Congo, then Zaire, as the Mobutu regime slipped into chaos. It starts with the looting of Kinshasa and Mike's adventures helping official America, ie the CIA, get out of Dodge. Like Heart of Darkness the story then goes up stream and into the deepest forest. Mike had visited the Bonobo Chimpanzees and the American research site before. He finds the academics gone but the local community still there and carrying on as best they could. Through a good relationship with the community leader, Mike takes on a series of tasks which ultimately lead to finding a poacher incursion and live trade in Bonobo. At one point in the various forest tracks Mike is camping alone and gets a bout of malaria, delirium and all. Despite the danger and difficulties described there is no Conradian darkness. The forest and rivers are beautiful it is the people that bring the problems.

DK Super Readers Pre-Level: Into the Rainforest Nov 26 2021 Find out what lives in the rainforest! Make reading your superpower with DK's beautiful, leveled nonfiction. Use your reading superpowers to learn all about the rainforest - a high-quality, fun, nonfiction reader - carefully leveled to help children progress. Into the Rainforest is a beautifully designed reader that will take you into this extraordinary habitat to discover what calls it home. The engaging text has been carefully leveled using so that children are set up to succeed. A motivating introduction to using essential nonfiction reading skills. Children will love to find out about the unique wildlife of the rainforest.

What We Learned in the Rainforest Sep 12 2020 What We Learned in the Rainforest presents a surprising new business principle: by applying strategies and practices gleaned from nature by emulating what it once sought to conquer-business can adapt rapidly to changing market conditions and attain greater and more sustainable profits. With clear, direct language and dozens of real-world examples, Kiuchi and Shireman show how a company can become a complex living system that doesn't merely balance competing interests but truly integrates them. Examples from leading companies include: How Coca-Cola CEO Doug Daft uses diversity to drive sales How Intel founder Gordon Moore creates profit by design How Bill Coors builds businesses on the theory that "all waste is lost profit" How Shell profits as an industrial ecosystem What Weyerhaeuser and activists learned from each other How Dow earns 300% returns, and Dupont builds market share with eco-effectiveness, and more This book shows that the old model of business-the machine model that pitted business against nature-is growing obsolete. In the emerging economy, businesses excel when they emulate what they once sought to conquer. They maximize performance as they become like nature, like a complex living system. By moving beyond the industrial machine model, and applying the dynamic principles of the rainforest instead, business can learn how to create more profit than ever, and to do so more sustainably. Written by two would-be "arch enemies"-a hard-nosed CEO of a major corporation and a dedicated environmentalist-this book doesn't just balance competing interests, it integrates them into a truly revolutionary new paradigm. Kiuchi and Shireman present numerous real-world examples from leading companies-business strategies and management practices that maximize business performance by all measures: economic, social, and environmental. They illustrate the powerful business model provided by nature for driving innovation, increasing profit, spurring growth, and ensuring sustainability.

Water and the Rainforest in Malaysian Borneo Nov 14 2020 This volume synthesizes and analyzes thirty years of hydrological research in the Danum Valley Conservation Area, a lowland dipterocarp rainforest in Sabah, Malaysia. Ian Douglas explores the role of water in the rainforest ecosystem, setting out the ecological, climatological and geological context of present-day hydrological processes, soil erosion and stream sedimentation. He emphasizes the role of extreme events and natural disturbances in sediment supplies and the evolution of drainage pathways and explains the pathways of rainfall and stream sediment. Douglas then explores the impacts caused by logging, the extreme pulses of sedimentation and the effects of log removal and logging road construction, examining the effects of major storms in the 20 years after tree harvesting. Methods of minimizing logging damage to soils and streams are discussed and the effects on flora and fauna are considered.

Into the Rainforest Nov 07 2022 India and Zion, ages 10 and eight, have moved with their family to the Amazon rainforest. There parents are on an assignment to uncover the ancient ruins of a lost city, Yanopacho. The city has its secrets, and so does the surrounding jungle. Their adventure begins when they meet an unusual parrot who keeps calling out their names. Into the Rainforest is a book about friendship, courage, and what it truly means to understand one another.

A Death in the Rainforest Jul 31 2019 iPerhaps the finest and most profound account of ethnographic fieldwork and discovery that has ever entered the anthropological literature. i The Wall Street Journal i If you want to experience a profoundly different culture without the exhausting travel (to say nothing of the cost), this is an excellent choice. i The Washington Post One of Time's 32 Books You Need to Read This Summer * One of National Geographic's Best Travel Books of Summer As a young anthropologist, Don Kulick went to the tiny village of Gapun in New Guinea to document the death of the native language, Tayap. He arrived knowing that you can't study a language without understanding the daily lives of the people who speak it: how they talk to their children, how they argue, how they gossip, how they joke. Over the course of thirty years, as he returned again and again to document the vanishing language, he found himself inexorably drawn into the lives and world of the Gapuners, and implicated in their destiny. In A Death in the Rainforest, Kulick takes us inside the village as he came to know it, revealing what it is like to live in a difficult-to-get-to village of two hundred people, carved out like a cleft in the middle of a tropical rainforest. And in doing so, he also gives us a brilliant interrogation of what it means to study a culture, an illuminating look at the impact of Western culture on the farthest reaches of the globe; and, ultimately, the story of why this anthropologist realized that he had to give up his study of this language and this village.

Over and Under the Rainforest Jun 21 2021 Part of the critically acclaimed Over and Under series! Award-winning duo Kate Messner and Christopher Silas Neal take readers on a thrilling tour of one of the most diverse ecosystems on planet earth: the rainforests of Central America. Discover the wonder that lies hidden among the roots, above the winding rivers, and under the emerald leaves of the rainforest. i Features animals like the slender parrot snake to the blue morpho butterfly i Explores the canopies, where toucans and pale-billed woodpeckers chatter and call i Other animals include capuchin monkeys who swing from vines and slow-moving sloths who wait out daily thunderstorms Under the canopy of the rainforest hundreds of animals make their homes, but up in the leaves hides another world. This stunning read is perfect for kids who can't get enough of the rainforest and all the animals living in it. i Equal parts educational and beautiful, this book is perfect for parents and grandparents, as well as librarians, science teachers, and educators. i A great book for kids who love nature, rainforests, animals, and learning more about the world i Perfect for children ages 5 to 8 years old i You'll love this book if you love books like The Big Book of Bugs by Yuval Zommer, The Animal Book by Lonely Planet Kids, and A Butterfly Is Patient by Dianna Aston.

14 Fun Facts About the Rainforest Canopy Sep 24 2021 The rainforest canopy sits near the top of the rainforest. It is filled with thousands and thousands of insects, animals and plants. Yet mankind has learned very little about this important part of our ecosystem. Without rainforests to replenish the oxygen in the atmosphere, the world would become a lot more polluted. Here are some amazing things we have discovered about the rainforest. Do you know: How many layers are there in the rainforest? How high do rainforest trees grow? Do many rainforest flowers bloom during the day or at night? Are there more animals in the rainforest during the day or at night? And much more. Find out the answers to these questions and more and amaze your family and friends with these fun facts. Ages 8 and up. All measurements in American and metric. LearningIsland.com believes in the value of children practicing reading for 15 minutes every day. Our 15-Minute Books give children lots of fun, exciting choices to read, from classic stories, to mysteries, to books of knowledge. Many books are appropriate for hi-lo readers. Open the world of reading to a child by having them read for 15 minutes a day.

Journeys into the Rainforest (Terra Australis 43) Oct 06 2022 This monograph presents the results of archaeological research that takes a longitudinal approach to interpreting and understanding Aboriginal-European contact. It focuses on a small but unique area of tropical rainforest in far north Queensland's Wet Tropics Bioregion, located within the traditional lands of the Jirrbal Aboriginal people on the Evelyn Tableland. The research integrates a diverse range of data sources: archaeological evidence recovered from Aboriginal open sites occupied in the pre- to post-contact periods, historical documents of early ethnographers, settlers and explorers in the region, supplemented with Aboriginal oral history testimony. Analyses of the archaeological evidence excavated from three open sites facilitated the identification of the trajectories of culture change and continuity that this investigation focused on: Aboriginal rainforest material culture and technology, plant subsistence strategies, and rainforest settlement patterns. Analyses of the data sets demonstrate that initial use of the rainforest environment on the Evelyn Tableland occurred during the early Holocene period, with successful adaptation and a change towards more permanent Aboriginal use of the rainforest becoming established in the late Holocene period. European arrival and settlement on traditional Aboriginal land resulted in a period of historical upheaval for the Aboriginal rainforest people. Following an initial period of violent interactions and strong Aboriginal resistance from the rainforest, Jirrbal Aboriginal people continued to adapt and transform their traditional culture to accommodate for the many changes forced upon them throughout the post-contact period.

Rainforest Tourism, Conservation and Management Aug 24 2021 Globally rainforests are under threat on numerous fronts, including clearing for agriculture, harvesting for timber and urban expansion. Yet they have a crucial role in biodiversity conservation, climate change mitigation and providing other ecosystem services. Rainforests are also attractive tourist spaces and where they have been used as a tourism resource they have generated significant income for local communities. However, not all use of rainforests as a tourism resource has been sustainable. This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem is built upon. It provides a multi-disciplinary perspective, incorporating rainforest science, management and tourism issues. The book is organized into four sections commencing with 'Tourism in rainforest regions',

followed by 'Threats to rainforest tourism' and 'The development and management of rainforest experiences', and finally 'Wildlife and rainforest tourism'. Each major rainforest region is covered, including the Amazon, Central America, Africa, Australia and south-east Asia, in the context of a specific issue. For example, rainforests in Papua New Guinea are examined in the context of community-based ecotourism development, while the rainforests in Borneo are discussed in an examination of wildlife issues. Other issues covered in this manner include governance, empowerment issues for rainforest peoples and climate change.

To Know the Rainforest Nov 02 2019 In 1965, Mike Peterson, an American Peace Corps volunteer midway through his two-year service in Colombia, is heading into the rainforest with friends. Thanks to a land-reform policy, land without men for men without land, his friends intend to claim a parcel of free jungle land to homestead. Mike eagerly accepts the invitation to be a part of this life-changing experience with them. No one could have predicted just how life-changing the experience truly would be. While traveling overnight to the rainforest by chivalrous, rustic, open-air buses of the Andes, Mike and his friends are pulled into a situation they can't fully understand. They attempt to rescue a young woman from her abusive companion, a ruffian who turns out to be an employee and friend of Don Trujillo, the vengeful rancher and smuggler who controls the flow of contraband along the Urabá coast. In payment for their kindness, the homesteaders may have provoked the wrath of the unpredictable Trujillo and his gun-slinging gauchos. The mountainous forest they are heading into is a refuge for Indians, bandits, smugglers, and outlaws, as well as the many camouflaged, lethal creatures that inhabit the woods, swamps, and waterways. Mike and his friends must find the strength and courage to survive the many challenges of their new rainforest home, but the promise of love and hope keeps them going.

The Writings of "The Intellectual Ocker" Jun 29 2019 An interesting and exciting journey through four hundred fifty two pages of firstly, eighteen short stories, followed by a novel about a young boy, captured and taken as a slave, who then escaped and went on to be a great warrior and war chief. This story was set in the middle ages. Some of the short stories have aboriginal content set in the outback country of Australia, one of which was about two aboriginal women, one of whom was raped and held prisoner by five opal miners and rescued by the other, who was chasing a big red kangaroo with a giant opal between his toes. This suspense thriller is about rape, murder and revenge. The closing pages of the book consist of philosophies and poetries written by the author who demonstrates his amazing versatility as a writer.

Rainforest Restoration Manual for South-Eastern Australia Dec 16 2020 Rainforest Restoration Manual for South-Eastern Australia is the definitive guide to the recovery and restoration of Subtropical, Warm Temperate, Cool Temperate, Gallery, Dry, Dry Gully and Littoral Rainforests from south-eastern Queensland to Tasmania. All of these rainforest types were inherently rare prior to settlement, and today with depletion, feral animals, weeds and climate change, all are threatened with many listed under state and federal legislation. The manual presents detailed restoration methods in 10 easy-to-follow steps, documenting the research and trials undertaken during rainforest restoration over more than two decades. These experiments and their results will empower readers to uncover answers to many of the problems they could encounter. The manual is supported by a CD that provides important background information, with 32 appendices, a propagation manual for the region's 735 rainforest plants, an illustrated glossary and resources for teachers. Species lists and specific planting guides are provided for the 57 rainforest floristic communities that occur from the coast to the mountains between Durras Mountain in New South Wales and the Otways in Victoria. Extensively illustrated with colour photographs, this book will empower you or your group to be able to restore, manage, protect and conserve the magnificent rainforests that are in your care. The general principles and techniques described will meet the needs of students and teachers, novices, experienced practitioners, community groups and agencies alike.

The Rainforest Grew All Around Mar 07 2020 The jungle comes alive as children learn about a wide variety of animals and plants living in the Amazon rainforest, in this adaptation of the song "The green grass grew all around."

Includes "For Creative Minds" section with animal and plant adaptation facts and a recipe.

Into the Rainforest Jul 11 2020 Uses flaps to enable the reader to create different scenes of rain forest animals, plants, and people, each accompanied by matching text on facing pages.

The Rainforest Book May 01 2022 Embark on a journey through the enchanting world of the rainforest in Charlotte Milner's beautifully illustrated The Rainforest Book. Sweep aside the liana vines, hop over the giant roots of the kapok tree, and follow the sound of the howler monkey as you venture into the tropical rainforest. Find out about some of the amazing animals that live there, learn about the enormous variety of life-giving plants, and discover why the Amazon rainforest is known as the 'lungs' of our Earth. In this beautiful ebook, Charlotte Milner continues to highlight the important ecological issues faced by our planet, following on from The Bee Book, The Sea Book, and The Bat Book. Did you know that over half of our planet's wildlife live in the rainforest? And that at least 2 metres of rain falls in the rainforest every year? The world's rainforests are packed with amazing animals and plants, from the deadly poison dart frog, to the stinky rafflesia flower - there is plenty to discover! As our planet's climate crisis becomes even more critical, The Rainforest Book is the perfect way to introduce little nature-lovers to this enchanting yet threatened world. This celebration of the rainforest shows children just how important it is, and reminds them that it is up to us to care for our planet and its wildlife.

Into the Rainforest Jan 05 2020 Photographs and simple text introduce early readers to rainforests.

People of the Rainforest Mar 31 2022 In 1945, three young brothers joined and eventually led Brazil's first government-sponsored expedition into its Amazonian rainforests. After more expeditions into unknown terrain, they became South America's most famous explorers, spending the rest of their lives with the resilient tribal communities they found there. People of the Rainforest recounts the Villas Boas brothers' four thrilling and dangerous 'first contacts' with isolated indigenous people, and their lifelong mission to learn about their societies and, above all, help them adapt to modern Brazil without losing their cultural heritage, identity and pride. Author and explorer John Hemming vividly traces the unique adventures of these extraordinary brothers, who used their fame to change attitudes to native peoples and to help protect the world's surviving tropical rainforests, under threat again today.

In the Rainforest Jan 29 2022 The rainforest habitat is incredibly diverse: so diverse that scientists are discovering new species of plants and animals all the time! In this book, readers journey deep into the rainforest with many kinds of scientists and learn about what they study, their methods, and recent discoveries. Full-color photographs show researchers and their tools and technology up close, from sun-protective gear to infrared cameras. The main content also touches on important STEM curriculum content, including conservation and features of this amazing habitat.

The Rainforest Book Feb 15 2021 Embark on a journey through the enchanting world of the rainforest in Charlotte Milner's beautifully illustrated The Rainforest Book. Sweep aside the liana vines, hop over the giant roots of the kapok tree, and follow the sound of the howler monkey as you venture into the tropical rainforest. Find out about some of the amazing animals that live there, learn about the enormous variety of life-giving plants, and discover why the Amazon rainforest is known as the 'lungs' of our Earth. In this beautiful book, Charlotte Milner continues to highlight the important ecological issues faced by our planet, following on from The Bee Book, The Sea Book, and The Bat Book. Did you know that over half of our planet's wildlife live in the rainforest? And that at least 2 metres of rain falls in the rainforest every year? The world's rainforests are packed with amazing animals and plants, from the deadly poison dart frog, to the stinky rafflesia flower - there is plenty to discover! As our planet's climate crisis becomes even more critical, The Rainforest Book is the perfect way to introduce little nature-lovers to this enchanting yet threatened world. This celebration of the rainforest shows children just how important it is, and reminds them that it is up to us to care for our planet and its wildlife.

The Rainforest Ecosystem | Kids' Earth Science Book Grade 4 | Children's Environment Books Feb 04 2020 Learn all about the ecosystem of the rainforest, Earth's oldest living ecosystem. Understand the characteristics of a rainforest, where they are located and how old some of them are. Examine the plant and animal life in a rainforest, and determine why they are important. What are the threats to the rainforest and how can you help? Start reading today.

Amazing Animals of the Rainforest Mar 19 2021 Introduces the rainforests of the Earth and the animals and insects that live there, including the Bengal tiger, the chimpanzee, the anteater, and the tarantula.

Life in the Rainforest (ENHANCED eBook) Jul 23 2021 The information contained in this resource and activity book follows a learning cycle that includes: a) free exploration by the students; b) expansion of exploration through activities that allow children to test, integrate, and sort out their discoveries; and c) application of concepts through individual and group projects which provide students with the opportunity to enhance and share what they have learned. Each section includes teacher resource material, planned lessons, and expansion activities. Students will examine various items, books, and resources. The display table's contents of fruits, nuts, woods, and other rainforest items will pique students' interest. Four transparencies (print books) or PowerPoint slides (eBooks) are included to engage students in discussion and reinforce the concepts presented in the book.

Phytochemistry of Australia's Tropical Rainforest Apr 07 2020 Rare, unique and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem. Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine. Phytochemistry of Australia's Tropical Rainforest is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics, analgesics, steroids, antimalarials and more. It provides an insight into the habitat, ecology and family associations of hundreds of species and explores their future therapeutic potential, alongside phytochemical studies of the ancient plant lineages. Toxicological evaluations of important poisonous plants are also included. Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth, many of which are illustrated in this book. This comprehensive work is an essential reference for phytochemists, ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential.

Governing the Rainforest Jun 09 2020 Sustainable development is often thought of as a product that can be obtained by following a prescribed course of interventions. Rather than conceptualizing it as a sweet spot of economic, ecological, and social balance, sustainable development is an ongoing process of embroilments requiring constant negotiation of often-competing aims. Sustainable development politics yield highly uneven results among different members of society and different geographic areas. As this book argues, such imbalances mean that sustainable development processes often prioritize economic over environmental goals, perpetuating and reinforcing economic and political inequalities. Governing the Rainforest looks at development and conservation efforts in the Brazilian Amazon, where the government and corporate interests bump up against those of environmentalists and local populations. This book asks why sustainable development continues to be such a powerful and influential idea in the region, and what impact it has had on various political and economic interests and geographic areas. In other words, as Eve Z. Bratman argues, sustainable development is a political practice in itself. This book offers detailed case study analysis, including of the creation of vast conservation corridors, the construction of one of the largest hydroelectric plants in the world, and new forms of land settlement projects. Based on a decade of Bratman's ethnographic fieldwork throughout Brazil, and particularly along the Trans-Amazonian Highway, Governing the Rainforest offers a fresh take on sustainable development within a multi-level analysis of actors, discourses, and practices.

Rainforest Apr 19 2021 Rainforests have long been recognized as hotspots of biodiversity—but they are crucial for our planet in other surprising ways. Not only do these fascinating ecosystems thrive in rainy regions, they create rain themselves, and this moisture is spread around the globe. Rainforests across the world have a powerful and concrete impact, reaching as far as America's Great Plains and central Europe. In Rainforest: Dispatches from Earth's Most Vital Frontlines, a prominent conservationist provides a comprehensive view of the crucial roles rainforests serve, the state of the world's rainforests today, and the inspirational efforts underway to save them. In Rainforest, Tony Juniper draws upon decades of work in rainforest conservation. He brings readers along on his journeys, from the thriving forests of Costa Rica to Indonesia, where palm oil plantations have supplanted much of the former rainforest. Despite many ominous trends, Juniper sees hope for rainforests and those who rely upon them, thanks to developments like new international agreements, corporate deforestation policies, and movements from local and Indigenous communities. As climate change intensifies, we have already begun to see the effects of rainforest destruction on the planet at large. Rainforest provides a detailed and wide-ranging look at the health and future of these vital ecosystems. Throughout this evocative book, Juniper argues that in saving rainforests, we save ourselves, too.

Wisdom from a Rainforest Dec 04 2019 In the early sixties, Stuart Schlegel went into a remote rainforest on the Philippine island of Mindanao as an anthropologist in search of material. What he found was a group of people whose tolerant, gentle way of life would transform his own values and beliefs profoundly. Wisdom from a Rainforest is Schlegel's testament to his experience and to the Teduray people of Fige, from whom he learned such vital, lasting lessons. Schlegel's lively ethnography of the Teduray portrays how their behavior and traditions revolved around kindness and compassion for humans, animals, and the spirits sharing their worlds. Schlegel describes the Teduray's remarkable legal system and their strong story-telling tradition, their elaborate cosmology, and their ritual celebrations. At the same time, Schlegel recounts his own transformation: how his worldview as a member of an advanced, civilized society was shaken to the core by a so-called primitive people. He begins to realize how culturally determined his own values are and to see with great clarity how much the Teduray can teach him about gender equality, tolerance for difference, generosity, and cooperation. By turns funny, tender, and gripping, Wisdom from a Rainforest honors the Teduray's legacy and helps us see how much we can learn from a way of life so different from our own.

Tropical Rainforest Responses to Climatic Change May 09 2020 This updated and expanded second edition of a much lauded work provides a current overview of the impacts of climate change on tropical forests. The authors also investigate past, present and future climatic influences on the ecosystems with the highest biodiversity on the planet. Tropical Rainforest Responses to Climatic Change, Second Edition, looks at how tropical rain forest ecology is altered by climate change, rather than simply seeing how plant communities were altered. Shifting the emphasis on to ecological processes, e.g. how diversity is structured by climate and the subsequent impact on tropical forest ecology, provides the reader with a more comprehensive coverage. A major theme of the book is the interaction between humans, climate and forest ecology. The authors, all foremost experts in their fields, explore the long term occupation of tropical systems, the influence of fire and the future climatic effects of deforestation, together with anthropogenic emissions. Incorporating modelling of past and future systems paves the way for a discussion of conservation from a climatic perspective, rather than the usual plea to stop logging. This second edition provides an updated text in this rapidly evolving field. The existing chapters are revised and updated and two entirely new chapters deal with Central America and the effect of fire on wet forest systems. In the first new chapter, the paleoclimate and ecological record from Central America (Lozano, Correa, Bush) is discussed, while the other deals with the impact of fire on tropical ecosystems. It is hoped that Jonathon Overpeck, who has been centrally involved in the 2007 and 2010 IPCC reports, will provide a Foreword to the book.
