DVD, Blu-ray and Beyond Sep 08 2020 This book demonstrates, in contrast to statistics that show declining consumption of physical formats, that there has not been a mass shift towards purely digital media. Physical releases such as special editions, DVD box-sets and Blu-Rays are frequently promoted and sought out by consumers. And that past formats such as VHS, Laserdisc and HD-DVD make for sought-after collectible items. These trends are also found within particular genres and niche categories, such as documentary, education and independent film distribution. Through its case studies, this collection makes a distinctive and significant intervention in highlighting the ways in which the film industry has responded to rapidly changing markets. This volume, global in scope, will prove useful to those studying the distribution and exhibition of films, and the economics of the film industry around the world.

Painting with Light Jan 31 2020 Throw your preconceptions about light-painting out the window and prepare for a creative journey that will revolutionize your photography. Light painting is a classic photography technique that involves selectively illuminating sections of a dark subject by moving a light source (like a flashlight) over the subject during the course of a seconds- or minutes-long exposure. This results in uniquely nuanced depictions with a high level of technical artistry. As Eric Curry shows, however, today's hardware and software allow you to produce light-painting images that are anything but traditional! In this book, you'll learn, step by step, how to plan and execute incredible, nuanced images using simple gear, a whole lot of imagination, and today's powerful postproduction software. With these techniques, your imagination is the only limit to what you can create!

The contributions are centred on the question of how individual users and organisations can harness mobile devices for learning and education. The range of examples presented in this book demonstrates that mobile devices foster situated approaches to learning in and across work contexts. The book is targeted at both practitioners - trainers or managers in charge of in-company training - and researchers, who are interested in designing, implementing or evaluating work-based mobile learning.
