Teaching Reading Across the Curriculum Nov 27 2019

Social Development Jan 10 2021 "This authoritative, engaging work examines the key role of relationships in child and adolescent development, from the earliest infant-caregiver transactions to peer interactions, friendships, and romantic partnerships. Following the sequence of a typical social development course, sections cover foundational developmental science, the self and relationships, social behaviors, contexts for social development, and risk and resilience. Leading experts thoroughly review their respective areas and highlight the most compelling current issues, methods, and research directions. End-of-chapter suggested reading lists direct students and instructors to exemplary primary sources on each topic." from back cover.

Smuggling Writing Oct 26 2019 Can you sneak more writing into your already-jammed curriculum? Smuggling Writing shows how to integrate writing seamlessly into your lesson plans, with 32 written response activities that help students process information and ideas in short, powerful sessions. The authors invigorate time-tested tools and organize them into sections on Vocabulary and Concept Development, Comprehension, Discussion, and Research & Inquiry. Each strategy: Takes students through before, during, and after reading/learning Provides engaging digital applications Includes sample lessons Details connections to Common Core State Standards Smuggling Writing shows how big gains will come from "writing small" day by day.

Lab Reports and Science Books Jul 28 2022

Bringing the Common Core to Life in K-8 Classrooms Sep 17 2021 Actively engage students in their own learning. Discover strategies to promote student mastery of the Common Core State Standards for English language arts across the curriculum. Explore techniques to lead students in close reading, activate their background knowledge to prepare them for learning, and gain insight into habit formation. You'll develop the know-how to effectively structure teaching to empower all students.

Science the "write" Way Jun 14 2021 Writing skills are high on the list of real-world requirements for all students including science students. Every scientific discipline needs professionals who can ably communicate in writing. Scientists must be able to describe their proposed studies for funding considerations, track their observations and results in their own notes, describe their experimental protocols for their peers to replicate, and synthesize their work to the wider world community."
