*Reading Keys* Aug 02 2022 **READING KEYS** - the first in a three-book reading series by Laraine Flemming - offers a comprehensive introduction to reading skills and strategies, from using context clues to identifying purpose and bias. Clear, accessible explanations present reading concepts without oversimplifying the process of reading comprehension. To ensure students' understanding, reading keys or summaries follow the explanations, breaking them down into manageable chunks. Throughout each chapter, a variety of steadily more difficult exercises assess students' understanding of the material and promote improved comprehension and critical-thinking skills. This incremental approach to instruction and assessment makes it easier for beginning readers to absorb and master new information. The Fourth Edition includes new chapters on analyzing arguments and sentence relationships. In addition, there is a greater emphasis on recognizing and understanding verbal clues to meaning, new discussions on how the brain learns and remembers new information, and several new engaging readings. **Impact evaluation of research by the International Food Policy Research Institute on agricultural trade liberalization, developing countries, and WTO's Doha negotiations** Mar 05 2020 "This report assesses the impact of IFPRI's work on the agriculture negotiations in the WTO's Doha Round. It is set against the context of IFPRI's mission which emphasizes food security and the interests of poor people in low-income countries and underlines the importance of active engagement in policy communications to link research work to policy action. The report also traces briefly the evolution of IFPRI's work on international agricultural trade more generally, noting its broad disposition to market-oriented policy prescriptions while illuminating the very different impacts of agricultural trade liberalization on individual developing countries through detailed research at the national and household level." -- from Author's Abstract

*Lean Leadership on a Napkin* Apr 17 2021 This very concise and straightforward book is aimed at top executives in virtually any industry who are either new to the concept of Lean and its benefits to them or who have stalled in their transformations and are trying to resurrect their momentum. The book is written in a style that mirrors a typical interaction with an executive across a table with a knowledgeable, experienced Lean coach/consultant. Its style and substance reflect what a candid and casual conversation would sound and feel like. The book includes simple hand-drawn images (thus the title *Lean Leadership on a Napkin*) to facilitate and simplify basic concepts as if a real dialogue was occurring in an informal setting. It assumes that the executives have a little or no previous knowledge of Lean methodologies or Lean Leadership but have awakened to the possibility of their promise to grow themselves and their enterprises dramatically. Most executives have little time for extensive reading or patience with "sales" presentations. Those same leaders will therefore appreciate the simple, uncluttered, and, above all, objective summary this book provides. The book breaks down the process of transforming the organization around Lean principles into three component transformational phases or steps, namely, Introduction, Integration, and Internalization (i.e., the I-3 strategy). Each phase includes critical factors to understand, do, and share as well as deep reflection questions to help leaders decide on an appropriate path forward for themselves as leaders and for their organizations. While the Integration and Internalization steps are introduced here, the primary focus of this work is on those critical issues arising in the early, Introduction, step. A unique advantage of this book is that it braids together four critical elements of success—Lean concepts/methodology, culture change, leadership, and business performance. Essentially, the reader will obtain a broad, basic, and solid understanding and leadership foundation about Lean, the leader's unique role in transformation, and confidence to make appropriate decisions about the how and if to proceed. In addition, it will offer a path forward by providing the reader with abundant resources and consulting support for those seeking to launch a Lean transformation.

**Crisis Standards of Care** Sep 30 2019 Disasters and public health emergencies can stress health care systems to the breaking point and disrupt delivery of vital medical services. During such crises, hospitals and long-term care facilities may be without power; trained staff, ambulances, medical supplies and beds could be in short supply; and alternate care facilities may need to be used. Planning for these situations is necessary to provide the best possible health care during a crisis and, if needed, equitably allocate scarce resources. Crisis Standards of Care: A Toolkit for Indicators and Triggers examines indicators and triggers that guide the implementation of crisis standards of care and provides a discussion toolkit to help stakeholders establish indicators and triggers for their own communities. Together, indicators and triggers help guide operational decision making about providing care during public health and medical emergencies and disasters. Indicators and triggers represent the information and actions taken at specific thresholds that guide incident recognition, response, and recovery. This report discusses indicators and triggers for both a slow onset scenario, such as pandemic influenza, and a no-notice scenario, such as an earthquake. Crisis Standards of Care features discussion toolkits customized to help various stakeholders develop indicators and triggers for their own organizations, agencies, and jurisdictions. The toolkit contains scenarios, key questions, and examples of indicators, triggers, and tactics to help promote discussion. In addition to common elements designed to facilitate integrated planning, the toolkit contains chapters specifically customized for emergency management, public health, emergency medical services, hospital and acute care, and out-of-hospital care.
