**Maritime Work Law Fundamentals: Responsible Shipowners, Reliable Seafarers** Dec 15 2021

The importance of international maritime labour law - both as a component of - ternational maritime law, and in socio-political and economic terms - has been recognised by the IMO International Maritime Law Institute for a number of years. Indeed, the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization, the - ternational Labour Organization, the International Transport Workers' Federation, and the German Shipowners'

Association. It was therefore a great pleasure when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals: Responsible S-powners Reliable Seafarers. As the title suggests, a fundamental challenge of this branch of international maritime law is to achieve a balance between the interests of the two main stakeholders. Institutionally, the effort to achieve this balance dates back a number of decades with its genesis mainly found in the work of the International Labour Organization. It has to be said that whilst this effort achieved great progress, it has led to a haphazard, plethora of legal instruments.

**User-Innovation** Dec 03 2020  
Economic growth is highly dependent on technological progress and innovation, yet the sources from which these innovations originate are still largely misunderstood and untapped. Recent research has demonstrated that users, rather than manufacturers, are often a critical source of innovation in numerous fields from extreme sports to medical devices to software. This book systematically identifies the most important barriers to user-innovation and critically evaluates the democratization of innovation argument by critically assessing the main legal, economic, technological, and societal barriers to user-innovation for the first time and proposing alternative possibilities. Through original research the author reveals the dynamics of user-innovation and offers strategies for minimizing those factors that inhibit and stifle the spread of this phenomenon. From this analysis it becomes clear that user-innovation has become more difficult over time and that the problem is now of how

manufacturers can enable users to overcome the discussed barriers and simultaneously benefit from such consumer-driven activities. Arguing that licenses are not just an important technology commercialization instrument but are tools critical to generating innovations, the author explains how licenses can in certain situations be employed to help users overcome some of the barriers to user-innovation. User-Innovation: Barriers to Democratization and IP Licensing is a practical guidebook as well as a startlingly original work of scholarship that will be essential reading for years to come.
