Die häufigsten Pflegediagnosen und -interventionen in der Geriatrie und ihre wissenschaftliche Fundiertheit Jul 29 2019 Bachelorarbeit aus dem Jahr 2007 im Fachbereich Pflegewissenschaften, Note: 1,0, UMIT Private Universität für Gesundheitswissenschaften, Medizinische Informatik und Technik (Institut für

Pflegewissenschaften), 17 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Aus der Tätigkeit der Autorin in der geriatrischen Langzeitpflege als diplomierte Gesundheits- und Krankenschwester entstand die Idee zu dieser Arbeit. Das Erstellen und Überprüfen von Pflegeplanungen ist in diesem Bereich eine Hauptaufgabe des diplomierten Personals. So entstanden für die Autorin mit der Zeit einige Fragen, die sie mit Hilfe dieser Studie beantworten will. Welche Pflegediagnosen- und interventionen werden in der Institution H.G. am häufigsten geplant? Sind diese Pflegediagnosen und -interventionen wissenschaftlich fundiert? Welche Vor- und Nachteile ergeben sich aufgrund EDV-basierter Dokumentation für die Pflegeplanung? Um diese Forschungsfragen zu beantworten, wurden die je fünf am häufigsten geplanten Pflegediagnosen und -interventionen der letzten 360 Tage mit Hilfe des Computerdokumentationssystems „Transdok" gefiltert. Aufbauend auf den Ergebnissen dieser Filterung wurde eine Literaturrecherche durchgeführt und die häufigsten fünf Pflegediagnosen und die je am häufigsten dazu geplante Pflegeintervention auf Basis von sechs Pflegeplanungen der Institution H.G. mit Hilfe der gefundenen Literatur bearbeitet. Somit soll diese Arbeit häufige Fehler bei der Erstellung von Pflegeplanungen in der geriatrischen Langzeitpflege gemessen an der Pflegedokumentation H.G. aufzeigen und zur Verbesserung der Qualität derselben beitragen.

Fundamentals of Nursing E-Book Mar 17 2021 Yoost and Crawford's Fundamentals of Nursing is back for a second-edition encore! The text that made its name by focusing on simple language and active learning continues its focus on helping you truly understand, apply, and retain important nursing information and concepts. Using a warm and conversational style, this new second edition guides you towards a basic understanding of the nursing profession and then logically progresses through the nursing process and into the safe and systematic methods of applying care. Each chapter features realistic and complex case studies and critical thinking exercises woven throughout the content to help you continually apply what you've learned to actual patient care. A conceptual care mapping approach — created by Yoost and Crawford themselves — further your ability to make clinical judgments and synthesize knowledge as you develop plans of care after analyzing and clustering related patient assessment data. All of this paired with a wealth of student-friendly learning features and clinically-focused content offers up a fundamentally different — and effective — way for you to easily master the fundamentals of nursing. UNIQUE! Warm, friendly writing style slows down the pace of information to give readers time to critically think and master all fundamental concepts and skills. UNIQUE! Building block approach groups topics and concepts together thematically, in the order needed for readers to build their knowledge. UNIQUE! Objective-driven approach presents clearly defined, numbered objectives that coordinate with all content and then wrap up with Objective Summaries. UNIQUE! Active learning activities are incorporated throughout every chapter to help readers learn to apply chapter content to broader nursing concepts and realistic patient scenarios. UNIQUE! Conceptual care mapping is taught and used throughout the text in conjunction with the Conceptual Care Map Creator. UNIQUE! Emphasis on QSEN reinforces the Quality and Safety Education for Nurses competencies, including: patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, and informatics. Special feature boxes cover the areas of: diversity consideration, evidence-based practice, informatics, patient education, healthy literacy, health assessment questions, interprofessional collaboration and delegation, ethical and legal practice, home care considerations, safe practice alerts, QSEN, critical thinking exercises, and nursing care guidelines. NEW! Interprofessional collaboration and delegation content appears throughout the text along with new IPE activities that are integrated into the Evolve resources. NEW & UNIQUE! Review and exam questions tied to learning objectives use a building-block style approach that starts at lower Bloom's taxonomy levels in early chapters and builds to more complex levels as readers acquire more knowledge. NEW! Emphasis on assignment and delegation covers the differences between them and how and when they're appropriate for an RN. NEW! Content on complementary therapies has been integrated throughout the text to reflect the changes to the NCLEX exam. NEW! Additional information has been added in the areas of HCAHPS, Health Literacy, Patient Education, Drugs of Abuse, Zika, Ebola, and more.

Nursing and Informatics for the 21st Century Aug 10 2020 Nursing and Informatics for the 21st Century is the follow-up to the highly successful, award-winning first edition. Published in 2006, the first edition was a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national strategies and health policies around the globe. This updated edition, co-published by AMIA, examines the revolution that has occurred in nursing and explores the role IT is playing in this transformation, with a thoughtful examination of nursing practice, science and research, and education across the globe. With nearly 50 case studies written by nursing's leading innovators and recognized leaders across specific segments of the healthcare industry and the globe, the book presents a "snapshot" of nursing and IT adoption worldwide. The book provides in-depth analysis of nursing developments in the United States and an expanded global focus, including profiles of EHR initiatives in the Middle East and Asia. In addition, new topics in this second edition include nursing faculty development and results of a five-country international survey on nursing clinical documentations.

Avoiding Common Nursing Errors Feb 25 2022 This handbook succinctly describes over 500 common errors made by nurses and offers practical, easy-to-remember tips for avoiding these errors. The Nursing Process May 31 2022 This title is directed primarily towards health care professionals outside of the United States. THE NURSING PROCESS; A GLOBAL CONCEPT critically explores a concept that was introduced into nursing in the 1970s and rapidly spread all over the world. It begins with the background and history of the Nursing Process, and analyses its use in various fields, such as managerial technologies and psychiatric nursing. It then goes on to look at its use in six different countries from a variety of world regions - in Europe, Finland, Germany and the Czech Republic, as well as South Africa, Australia and the Caribbean. It explores its strengths and weaknesses, and tries to make some predictions about future use. The book combines descriptions of the state-of-the-art based on extensive literature surveys, as well as analytical approaches. It creates opportunities for comparison, especially with regard to problem-solving strategies. Combines diverse perspectives of the core concept and its useProvides international overviews as well as detailed country reportsBased on extensive literature surveys as well as analytical approachesCreates opportunities for comparison especially with regard to problem-solving strategies

*Digitale Dokumentation. Reifegradmodell in der Langzeitpflege am Beispiel ausgewählter Schweizer Pflegeeinrichtungen* Jan 27 2022 Doktorarbeit / Dissertation aus dem Jahr 2021 im Fachbereich VWL - Gesundheitsökonomie, Note: PGS, konsekutiv ohne Note, , Veranstaltung: Rigorosum März 2022, Sprache: Deutsch, Abstract: Neben dem Fachkräftemangel in der Pflege ist auch die Digitalisierung und digitale Dokumentation von Gesundheits- und persönlichen Daten der Patienten ein brandaktuelles und viel diskutiertes Thema im medizinischen Sektor. Viele Einrichtungen müssen dabei selbstständig entscheiden, inwieweit sie moderne Technik verwenden und effiziente Systeme entwickeln. Wie kann die Digitalisierung verpflichtende Dokumentationen zum Krankheitsverlauf der Patienten und anderer wichtiger Informationen vereinfachen? Pflegende sollten durch weitere Digitalisierungsschritte nachhaltig entlastet werden. Eine Einschätzung des betriebseigenen Reifegrades der digitalen Pflegedokumentation ermöglicht eine Abkehr vom impulsiven und die Hinwendung zum strategischen, bedarfsorientierten und partizipativen Prozess der digitalen Transformation. Mit welchem Dokumentationssystem können die Einrichtungen vor allem bei der Langzeitpflege Zeit und Geldmittel einsparen? Wie weit entlastet digitale Dokumentation das Gesundheitssystem? Diese und weitere Fragen beantwortet Dirk Sven Kircher in seiner Arbeit. Dabei geht er besonders auf die digitale Transformation der Langzeitpflege in der Schweiz ein. Neben qualitätssichernden Aspekten beleuchtet er auch strategische Managementüberlegungen und die Auswirkungen auf den Kernversorgungsprozess mit zeitlichen Entlastungen und monetären Einsparpotenzialen. Zudem gibt er Handlungsempfehlungen zur strategischen Unternehmensausrichtung und wendet sich damit vor allem an Pflegefachkräfte und Manager in der Langzeitpflege.

*Building Standard-based Nursing Information Systems* May 19 2021 Building Standard-Based Nursing Information Systems is directed to practising and student nurses, health care professionals involved in the implementation of information systems, and information technology professionals working in the health sector. The objective of this book is to provide them with a basic source of facts related to the use and implementation of standards in nursing clinical and administrative documentation. Emphasis is placed on the importance of appropriately documenting nursing care, in order to facilitate analyses of nursing activities, the provision of quality and evidence-based direct patient care, and promotion of continuity of service. Standardized documentation is also required for communication of nursing concepts, interventions, and outcomes to other nurses and health professionals working in different settings and countries. The book focusses on key issues of modem nursing practice and illustrates how information technology support to the implementation and use of standard-based practice can improve clinical and management nursing functions [WHO website]

*Clinical Care Classification (CCC) System Manual* Jun 07 2020 Designated a Doody's Core Title! The Preeminent Nursing Terminology Classification System "The Clinical Care Classification (CCC) System described in this manual is the only standard coded nursing terminology that is based on sound research using the nursing process model framework and that meets the Patient Medical Record Information (PMRI) comparability requirement. The CCC System allows patient care data generated by nurses to be incorporated into the PMRI database, and enables nurses' contributions to patient outcomes to be studied and acknowledged." -- From the Foreword by Sheryl L. Taylor, BSN, RN, Senior Consultant, Farrell Associates TESTIMONIES: "ABC Coding Solutions-Alternative Link developed ABC codes for nursing in collaboration with Dr. Virginia Saba, developer of the CCC system. Approximately two hundred ABC codes were developed from the CCC System of Nursing Interventions to accurately document nursing and integrative health care processes, classify and track clinical care, and develop evidence-based practice models, thus filling significant gaps in older medical code sets." --Connie Koshewa, Practitioner Relations Director, ABC Coding Solutions-Alternative Link "The International Classification for Nursing Practice (ICNPÆ) is a program of the International Council of Nurses (ICN). One of the first steps in the development of the ICNPÆ was to collect and compare all the nursing concepts in existing nursing terminologies, including the CCC. To facilitate the goal of ICNPÆ as a unified nursing language system, a project is under way to map the CCC to the ICNPÆ Version 1.0. This work will facilitate evaluation and ongoing development of both terminologies and allow ICN to compare data using CCC codes with data from other standard nursing terminologies." --Amy Coenen, PhD, RN, FAAN, Director, ICNPÆ Program, International Council of Nurses
