ACLS Fundamentals Sep 22 2021 This book details Advanced Cardiovascular Life Support (ACLS) content per the current 2020 American Heart Association (AHA) emergency cardiovascular care (ECC) guidelines. This book is supplementary to the AHA ACLS Provider Manual and must not be construed as a primary reference document for ECC guidelines. ACLS ECC guidelines direct adult oriented patient care, whereby ACLS providers administer medications, navigate treatment algorithms, interpret electrocardiograms (ECG), and communicate effectively with team members. ACLS Fundamentals breaks down the core concepts required to pass the ACLS Provider course. The chapters of this book build on one another to reinforce memory retention. The ACLS Provider Manual numbers 202 pages and covers a great deal of information. ACLS Fundamentals ideally familiarizes the reader with ACLS in a concise manner. All AHA courses are OPEN RESOURCE and allow for the use of the provider manual, algorithm sheets, and notes. This book is written as a quick read. ACLS Fundamentals utilizes simple diagrams, checks on learning, a pre and posttest, mnemonics, and video links to ensure content mastery. Attempt the ACLS course shortly after reading this book to maximize your success. The author of this book instructs ACLS per the AHA's published curriculum, is a Certified Flight Paramedic and Nationally Registered Paramedic with 15 years of experience working in the critical care setting. The proceeding content mirrors the author's teaching style, which has aided numerous students to pass the AHA's ACLS Provider course on their first attempt.

Manual of Critical Care Nursing - E-Book Jun 07 2020 Compact, yet comprehensive, Manual of Critical Care Nursing: Interprofessional Collaborative Management, 8th Edition is the go-to reference for helping you provide safe, high-quality nursing care in critical care settings. Written in an abbreviated outline format, it presents essential information on more than 75 disorders and conditions, as well as concepts relevant to caring for critically ill patients and functioning in the critical care environment. Award-winning clinical nurse specialist Marianne Baird separates the content first by body system and then by disorder, with each disorder including a brief description of pathophysiology, assessment, diagnostic testing, collaborative management, nursing diagnoses, desired outcomes, nursing interventions, and patient teaching and rehabilitation. Coverage of more than 75 disorders most commonly seen in progressive and critical care settings equips you with all the content needed to handle problems in critical care nursing. Consistent, easy-to-use format mirrors a practicing nurse's approach to patient care and facilitates quick reference to vital information. Diagnostic Tests tables highlight the definition, purpose, and abnormal findings for each test. Gerontologic considerations and bariatric considerations are highlighted throughout to direct attention to patients with unique needs in critical care settings. NOC outcomes and NIC interventions apply standardized nursing taxonomies to the disorders and conditions most commonly encountered in progressive and critical care settings. Portable size makes it ideal for use on the unit or at the bedside. Safety Alert! and High Alert! boxes call attention to issues vital to patient safety. NEW! Focused content and a more streamlined, quick-reference format emphasize generic "patient problems" language in lieu of nursing-specific diagnoses to promote interprofessional collaboration and improved communication facilitated by a shared language. UPDATED! Comprehensive coverage reflects the latest evidence-based practice and national and international treatment guidelines. NEW and UNIQUE! Coverage of interprofessional collaborative management includes Interprofessional Collaborative Management headings and tables that concisely summarize relevant performance measures while incorporating the best available patient care guidelines. NEW! Enhanced focus on need-to-know content facilitates quicker information retrieval in time-sensitive high acuity, progressive, and critical care settings.
