**Principles for Navigating Big Debt Crises** Jul 11 2020 Ray Dalio, the legendary investor and international bestselling author of Principles - whose books have sold more than five million copies worldwide - shares his unique template for how debt crises work and principles for dealing with them well. This template allowed his firm, Bridgewater Associates, to anticipate 2008's events and navigate them well while others struggled badly. As he explained in his international bestseller Principles, Ray Dalio believes that almost everything happens over and over again through time, so that by studying patterns one can understand the cause-effect relationships behind events and develop principles for dealing with them well. In this three-part research series, he does just that for big debt crises and shares his template in the hopes of reducing the chances of big debt crises happening and helping them be better managed in the future. The template comes in three parts: 1. The Archetypal Big Debt Cycle (which explains the template) 2. Three Detailed Cases (which examines in depth the 2008 financial crisis, the 1930s Great Depression and the 1920s inflationary depression of Germany's Weimar Republic) 3. Compendium of 48 Cases (which is a compendium of charts and brief descriptions of the worst debt crises of the last 100 years) Whether you're an investor, a policy maker, or are simply interested in debt, this unconventional perspective from one of the few people who navigated the crisis successfully, Principles for Navigating Big Debt Crises will help you understand the economy and markets in revealing new ways.

**Where Credit is Due** Apr 07 2020 While much recent attention has been focused on the subprime lending and foreclosure crisis, little has been said about its radically-disparate impact. Drawing upon history as well as insight into the current crisis, this book shows that this crisis is not an anomaly, especially for people of color; nor is it over. People of color have been excluded from wealth-building opportunities via homeownership continuously throughout United States history, from the outright denial of credit and residential racial discrimination, to federally-sponsored urban renewal programs. The subprime lending and foreclosure crisis is predicted to strip a quarter of a trillion dollars in wealth from black and Latino homeowners. It has reversed home ownership gains for people of color and has decimated neighborhoods across the United States while impacting local, regional, national, and international economies. The consequences are devastating. This collection of essays provides a framework for creating equitable policy and ultimately building more stable communities for all Americans.
