Economic Inequality and Higher Education Oct 29 2019 The vast disparities

in college attendance and graduation rates between students from different class backgrounds is a growing social concern. *Economic Inequality and Higher Education* investigates the connection between income inequality and unequal access to higher education, and proposes solutions that the state and federal governments and schools themselves can undertake to make college accessible to students from all backgrounds. *Economic Inequality and Higher Education* convenes experts from the fields of education, economics, and public policy to assess the barriers that prevent low-income students from completing college. For many students from disadvantaged socioeconomic backgrounds, the challenge isn't getting into college, but getting out with a degree. Helping this group will require improving the quality of education in the community colleges and lower-tier public universities they are most likely to attend. Documenting the extensive disjuncture between the content of state-mandated high school testing and college placement exams, Michael Kirst calls for greater alignment between K-12 and college education. Amanda Pallais and Sarah Turner examine barriers to access at elite universities for low-income students—including tuition costs, lack of information, and poor high school records—as well as recent initiatives to increase socioeconomic diversity at private and public universities. Top private universities have increased the level and transparency of financial aid, while elite public universities have focused on outreach, mentoring, and counseling, and both sets of reforms show signs of success. Ron Ehrenberg notes that financial aid policies in both public and private universities have recently shifted towards merit-based aid, away from the need-based aid that is most helpful to low-income students. Ehrenberg calls on government policy makers to create incentives for colleges to increase their representation of low-income students. Higher education is often vaunted as the primary engine of upward mobility. Instead, as inequality in America rises, colleges may be reproducing income disparities from one generation to the next. *Economic Inequality and Higher Education* illuminates this worrisome trend and suggests reforms that educational institutions and the government must implement to make the dream of a college degree a reality for all motivated students.

Simply American Jan 01 2020 In the last twenty years, more than five million American workers have lost their jobs in the manufacturing sector in this country. But you and I can put a lot of those Americans back to work by making some very simple changes in how we shop. By making products manufactured by American workers our default choice when we go shopping, we can usher in a renaissance of American manufacturing employment. *Simply American* tells the story of how our nation's consumers evolved from buying mostly American-made products to the new status quo where most of the products we buy are not manufactured on our shores. *Simply American* offers guidance in how to return to the "Made in America" fold and introduces the reader to seven iconic American manufacturing firms eager to sell you their wares.

Unlearning Liberty Jun 29 2022 For over a generation, shocking cases of censorship at America's colleges and universities have taught students the wrong lessons about living in a free society. Drawing on a decade of experience battling for freedom of speech on campus, First Amendment lawyer Greg Lukianoff reveals how higher education fails to teach students to become critical thinkers: by stifling open debate, our campuses are supercharging ideological divisions, promoting groupthink, and encouraging an unscholarly certainty about complex issues. Lukianoff walks readers through the life of a modern-day college student, from orientation to the end of freshman year. Through this lens, he describes startling violations of free speech rights: a student in Indiana punished for publicly reading a book, a student in Georgia expelled for a pro-environment collage he posted on Facebook, students at Yale banned from putting an F. Scott Fitzgerald quote on a T shirt, and students across the country corralled into tiny "free speech zones" when they wanted to express their views. But Lukianoff goes further, demonstrating how this culture of censorship is bleeding into the larger society. As he explores public controversies involving Juan Williams, Rush Limbaugh, Bill Maher, Richard Dawkins, Larry Summers—even

Dave Barry and Jon Stewart—Lukianoff paints a stark picture of our ability as a nation to discuss important issues rationally. *Unlearning Liberty: Campus Censorship and the End of American Debate* illuminates how intolerance for dissent and debate on today's campus threatens the freedom of every citizen and makes us all just a little bit dumber.

South Sudan Sep 28 2019 In July 2011, South Sudan was granted independence and became the world's newest country. Yet just two-and-a-half years after this momentous decision, the country was in the grips of renewed civil war and political strife. Hilde F. Johnson served as Special Representative of the Secretary-General and Head of the United Nations Mission in the Republic of South Sudan from July 2011 until July 2014 and, as such, she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book, she provides an unparalleled insider's account of South Sudan's descent from the ecstatic celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early, bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government, accompanied by her deep knowledge of the country and its history, make this a unique eyewitness account of the turbulent first three years of the world's newest – and yet most fragile – country.
