liquid wikipedia Dec 03 2020 a liquid is a nearly incompressible fluid that conforms to the shape of its container but retains a nearly constant volume independent of pressure as such it is one of the four fundamental states of matter the others being solid gas and plasma and is the only state with a definite volume but no fixed shape a liquid is made up of tiny vibrating particles of matter such as

the effect of light intensity on the rate of photosynthesis Jan 04 2021 10 08 2021 this would happen because of the age of the plant or the ability to carry out photosynthesis may have decreased slightly making it impossible to get exact answers that corresponds with my prediction and so from my graph i can see that as the light moves away from the plant in the test tube that the rate of photosynthesis decreases this is

investigating the light dependent reaction in photosynthesis May 28 2020 test tubes 5 boiling tube pipette for 5 cm 3 pipette for 0 5 cm 3 pipette filler waterproof pen to label tubes colorimeter and tubes or light sensor and data logger 0 05 m phosphate buffer solution ph 7 0 store in a refrigerator at 0 4 c note 1 isolation medium sucrose and kcl in phosphate buffer store in a refrigerator at 0

photosynthesis definition process and diagrams byjus Jul 22 2022 photosynthesis is also used by algae to convert solar energy into chemical energy oxygen is liberated as a by product and light is considered as a major factor to complete the process of photosynthesis photosynthesis occurs when plants use light energy to convert carbon dioxide and water into glucose and oxygen leaves contain microscopic
