Greek and Roman Military Manuals May 24 2022 This volume explores the enigmatic primary source known as the ancient military manual. In particular, the volume explores the extent to which these diverse texts constitute a genre (sometimes unsatisfactorily classified as 'technical literature'), and the degree to which they reflect the practice of warfare. With

contributions from a diverse group of scholars, the chapters examine military manuals from early Archaic Greece to the Byzantine period, covering a wide range of topics including readership, siege warfare, mercenaries, defeat, textual history, and religion. Coverage includes most of the major contemporary siege manual writers, including Xenophon, Frontinus, Vegetius, and Maurice. Close examination of these texts serves to reveal the complex ways in which ancient Greeks, Romans, and Byzantines sought to understand better, and impose order upon, the seemingly irrational phenomenon known as war. Providing insight into the multifaceted collection of texts that constituted military manuals, this volume is a key resource for students and scholars of warfare and military literature in the classical and Byzantine periods.

Oct 29 2022 The inclination towards two wheelers is not newer to the world. From the very beginning, two wheelers are recognized as a mark of triumph, independence and joy. These are considered fast, safe and easy mode of transportation with worthy fuel economy. With the arrival of automation and electronics in two wheelers, the study gained more momentum, which led Two and Three Wheeler Technology to emerge as a new discipline of automobile engineering. The book explains traditional and modern technologies in an easy to understand manner. Various technologies have been explicated with appropriate 2D and 3D diagrams to support learning. Text comprises the state-of-the-art developments in the field of two wheelers. Detailed explanation on the actual assemblies helps the students to cognize the technology systematically. Although the emphasis has been given to the two wheeler technology, considering the requirement of various syllabi, the last chapter is solely

The European Families of the Diptera May
12 2021 The European families of the Diptera
presents an identification key and family
descriptions of all 132 families of Diptera
(midges, mosquitoes, gnats, true flies) occurring
in Europe. For the extensive identification key a
new combination of important characters is

employed, enabling relatively easy identification
of families which are aberrant or traditionally
considered difficult to identify. Over 600 line
drawings are included to illustrate characters
and families.
