Owner Operator LMIA Guidebook Jun 08 2020 The Owner Operator pathway is an efficient process by which foreign nationals may permanently resettle to Canada by starting or purchasing a business. The Owner Operator Labour Market Impact Assessment (LMIA) pathway is a great option for foreign nationals who are looking to become permanent residents and settle in Canada as business owners and operators. To facilitate admission into Canada under the Owner Operator LMIA stream, a foreign national must have a controlling share (50.1%+) in an existing Canadian business or launch their own business in Canada in which they have a controlling interest. The Owner Operator LMIA pathway is most suitable for three types of individuals looking to become permanent residents of Canada.1. Foreign nationals that have an established business in their home country or in several countries and are looking to launch their business in Canada by obtaining an Owner Operator LMIA2. Foreign nationals who have the financial assets to launch a new business in Canada and be approved for an Owner Operator LMIA; and or3. Foreign nationals who have the financial assets to purchase an existing business in Canada to become the Owner Operator and be approved for an Owner Operator LMIA. The process in becoming a permanent resident of Canada through the Owner Operator LMIA pathway is summarized in an estimated possible timeline below and how CIVS can help to make it real for you and your family to immigrate to Canada. This publication is intended as a wellspring for entrepreneurs who wish to make Canada their new home through Canada's Owner Operator stream. For additional information and resources, please visit <https://civs.ca> or <https://civs.ca/resource>

Privacy Act Issuances ... Compilation Mar 18 2021 Contains systems of records maintained on individuals by Federal agencies which were published in the Federal Register and rules of each agency concerning the procedures the agency will use in helping individuals who request information about their records.

Stormwater Discharge Management Feb 14 2021 This comprehensive resource provides engineers, managers, compliance specialists, construction professionals, and students with the tool they need to understand and comply with the requirements of the Code of Federal Regulations (CFR) Title 40 Part 122 stormwater regulations. Stormwater Discharge Management covers the full spectrum of stormwater issues, including stormwater regulations, NPDES permitting, minimum control measures, activities-based discharges, overflows, stormwater monitoring, stormwater enforcement strategy, and the new Stormwater Phase II Rule, which mandated compliance March 10, 2003. Readers will learn who meets the criteria for compliance under this rule and how compliance can be achieved in construction activity, agricultural activity, and marine activity. To help simplify the process, the authors identify each and every compliance requirement, from examining the different types of stormwater discharge permits to writing an effective Stormwater Pollution Prevention Plan (SWPPP). They also include actual EPA field enforcement practices and best management practices to help readers ensure compliance success. Readers will gain a clearer appreciation for the stormwater regulations by reviewing the objectives of the Clean Water Act, the purpose and requirements of the National Pollutant Discharge Elimination System (NPDES), and the types of discharges/facilities affected by the laws.
