bound services overview  
android developers Jul 31 2022  
28 nov 2022 a bound service  
is the server in a client server  
interface it allows components  
such as activities to bind to the  
service send requests receive  
responses and perform  
interprocess communication  
ipc a bound service typically  
lives only while it serves  
another application component  
and does not run in the  
background indefinitely
