Ford GT40 Sep 26 2021 The Ford GT40 is one of the most famous of all sports racing cars. Built by Ford to challenge the supremacy of Ferrari at Le Mans, the GT40 first raced in 1964, and went on to win Le Mans four times in a row, from 1966 to 1969. Here, in this new Haynes Manual, is a unique perspective on what it takes to own, restore and maintain a GT40, as well as an insight into the engineering and construction of this legendary racing car.

McDonnell Douglas F/A-18 Hornet and Super Hornet Jan 07 2020 The US-designed and built McDonnell Douglas F/A-18 Hornet is one of the most important Fourth Generation fighters in the world. Its twin-engine, twin-tails (canted outwards) and leading edge root extensions make it one of the most recognisable fighters in operation. The latest version is the enlarged Super Hornet. It was controversial in being chosen as the replacement for the much loved F-14 Tomcat, but the truth is that it is a potent and fearsome fighter that boasts one of the most capable radars in service (it can operate in both air and ground modes near-simultaneously) and a weapons loadout that takes full advantage of it. The Super Hornet currently performs the bulk of the Western world's airstrikes on the nefarious terrorist group 'ISIS' in Iraq and Syria. Developed initially by Northrop as the P-530 Cobra in response to the US Air Force's Light Weight Fighter competition (winner: the General Dynamics F-16), the Hornet had a troubled start in life. Designated the YF-17 for the LWF fly-off in 1974, it failed to impress the Air Force. However, contractor McDonnell Douglas stepped in confident that it could be improved sufficiently to make it a contender for the US Navy's new fighter competition. McAir, as was often the case, were right. Redesigned and redesignated the F/A-18 (fighter/attack), it won the competition and entered service with the US Navy as a carrier-borne, multi-role fighter, marking the beginning of the

Hornet's journey from Air Force 'reject' to 'king' of the US Navy's Fleet Defenders.
