Governance and Sustainability in Information Systems. Managing the Transfer and Diffusion of IT Jan 22 2022 This book constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference on Governance and Sustainability in Information Systems, held in Hamburg, Germany, in September 2011. The 14 revised full papers and 16 research in progress and practice papers presented were carefully reviewed and selected from 47 submissions. The full research papers are organized in the following topical sections: governance, sustainability, design themes, customer and user integration, and future subjects.

Die Softwareindustrie May 26 2022 Auf Basis der ökonomischen Prinzipien und Spielregeln der Softwareindustrie behandelt dieses Buch Strategien und Geschäftsmodelle für Softwareanbieter. Dabei handelt es sich um Kooperations-, Vertriebs-, Preis- sowie Produktions- bzw. Industrialisierungsstrategien. Ob ERP-Software, Office-Anwendungen, Open-Source-Produkte oder Online-Spiele: Software unterscheidet sich im Hinblick auf ihre ökonomischen

Eigenschaften grundsätzlich von Industriegütern oder Dienstleistungen. Das Buch enthält zahlreiche Fallstudien und neue empirische Erkenntnisse und wendet sich an Fach- und Führungskräfte aus der Software-, Beratungs- und IT-Branche, ist aber auch für Studierende und Wissenschaftler aus Betriebswirtschaftslehre, Informatik, Wirtschaftsinformatik und Wirtschaftsingenieurwesen geeignet. Die dritte Auflage wurde vollständig überarbeitet und erweitert um Themengebiete wie Cloud Computing und Geschäftsmodelle in der Softwareindustrie. Darüber hinaus enthält dieses Buch neue Teilabschnitte, u. a. zur Abhängigkeit in IT-Outsourcing-Beziehungen, zum Fachkräftemangel in der Software- und IT-Industrie sowie zur Bewertung des M&A-Erfolges in der Softwareindustrie.

Re-conceptualizing Enterprise Information Systems Aug 17 2021 This book constitutes the post conference proceedings of the 5th International IFIP Working Conference on Research and Practical Issues of Enterprise Information Systems (CONFENIS 2011), held in Aalborg, Denmark, October 16-18, 2011. The 12 papers presented in this volume were carefully reviewed and selected from 103 submissions. The papers are organized in four sections on conceptualizing enterprise information systems; emerging topics in enterprise information systems; enterprise information systems as a service; and new perspectives on enterprise information systems. These papers are complemented by two keynotes and a short summary of the co-located Workshop on Future Enterprise Information Systems using Lego Serious Games.

Enterprise Information Systems: Concepts, Methodologies, Tools and Applications Apr 12 2021 This three-volume collection, titled Enterprise Information Systems: Concepts, Methodologies, Tools and Applications, provides a complete assessment of the latest developments in enterprise

information systems research, including development, design, and emerging methodologies. Experts in the field cover all aspects of enterprise resource planning (ERP), e-commerce, and organizational, social and technological implications of enterprise information systems.

Open Source Enterprise Software Jun 26 2022 Das Buch bietet einen umfassenden Überblick der am Markt angebotenen quelloffenen Unternehmenssoftware. Mit der praxisnahen Einführung in Open Source Unternehmenssoftware und dem enthaltenen Marktspiegel liefern die Autoren eine wertvolle Grundlage zur Softwareauswahl. Zum Hintergrund: Bei Open Source (OS) Software werden Software und zugehöriger Quellcode den Anwendern kostenlos bereitgestellt. Bei Infrastruktursoftware (z. B. Betriebssysteme, Firewalls usw.) ist OS Software bereits weit verbreitet und IT-Kosten können deutlich reduziert werden. Zunehmend wird auch OS Unternehmenssoftware angeboten. Diese ist ein idealer Ansatz zur Kostenminimierung im IT-Bereich. Dies gilt vor allem für Enterprise Resource Planning (ERP-) Systeme, Customer Relationship Management (CRM-) Systeme, Business Intelligence (BI-) Systeme, Business Process Modeling (BPM-) Systeme, Workflowmanagementsysteme und Projektmanagementsysteme. Noch ist die Durchdringung von OS Unternehmenssoftware in der betrieblichen Praxis gering. Ursache ist vor allem die Unübersichtlichkeit des Marktes. Hier schafft das Buch mit seiner Sammlung der derzeit am Markt angebotenen OS Enterprise Softwaresysteme Abhilfe.

Joining Decisions in Open Collaborative Innovation Communities Feb 29 2020 Daniel Ehls analyzes the impact of contextual factors on attracting volunteers into open initiatives. He answers challenging questions like why do users join one community over another and what are

attractive conditions for user and open innovation With a discrete choice experiment, Daniel Ehls identifies openness trade-offs and joining preferences contingent on access, usage and sponsorship. Also, he reveals causes of taste heterogeneity and shows how context and personality determine joining decisions. Management insights target organizational behavior, e.g. how the governance structure affects user actions, and competitive strategy, e.g. how to source external distributed knowledge.

Information Technology for Small Business Sep 25 2019 Information Technology for Small Business provides a comprehensive guide of applications of end user computing, social media, cloud computing, and open source software to business process, decision making, and outreaching for small businesses. It is designed for students in business programs and small business owners. The e-book highlights the most important concepts of information technology for small business, including information technology solution services and end user computing development. To maintain a well-rounded approach to the topics, both fundamental knowledge about information technology for small business and hands-on material are presented. Succinct tutorials for implementation of end user decision support systems and end user business intelligence in the end user computing environment are included.

Artificial Intelligence and Machine Learning in Business Management May 14 2021

Artificial Intelligence and Machine Learning in Business Management The focus of this book is to introduce artificial intelligence (AI) and machine learning (ML) technologies into the context of business management. The book gives insights into the implementation and impact of AI and ML to business leaders, managers, technology developers, and implementers. With the maturing use of AI or ML in the field of business intelligence, this book examines several projects with innovative uses of AI beyond data organization and access. It follows the Predictive Modeling Toolkit for providing new insight on how to use improved AI tools in the field of business. It explores cultural heritage values and risk assessments for mitigation and conservation and discusses on-shore and off-shore technological capabilities with spatial tools for addressing marketing and retail strategies, and insurance and healthcare systems. Taking a multidisciplinary approach for using AI, this book provides a single comprehensive reference resource for undergraduate, graduate, business professionals, and related disciplines.

ERP TO E2RP Jul 16 2021 ERP to E2RP: A Case Study Approach is a comprehensive and well-organized book that covers the wide aspects of ERP and E2RP. The text highlights the details of operational and supporting processes related to industry verticals, namely, manufacturing, healthcare and construction. It presents general implementation methodologies as well as specific methodologies prescribed by Oracle and SAP for the implementation of their

products. The book contains few sample business processes that are mapped with the help of ERP product screens. Part I of the book focusses on ERP including the concepts, evolution, various business processes in different verticals and implementation methodologies. Part II of the book explicates the concept of E2RP. Apart from that, this part describes its need, major functionality of its modules, namely, supply chain management, customer relationship management, business intelligence and employee focus portals (intranet). Moreover, topics related to new emerging technologies (i.e., open source ERP and cloud ERP) and knowledge management are also covered in this part. Following a simple and engaging style, this book is primarily designed for the undergraduate students of computer science and engineering, information technology and also for the postgraduate students of management and computer application. Key Features Incorporates numerous Case Studies that are based on face to face interaction with the organizations. Includes several pedagogical features such as chapterwise summary, exercises and assignments. Provides glossary at the end of the book.

Open IT-Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion Jul 04 2020 th The 11 Working Conference of IFIP WG 8.6, Open-IT Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion, organized in Madrid in October 22–24, 2008, follows the series started in Oslo in 1995 and continues in the footprints of the past year's conference in Manchester. This year, although the Madrid Conference addresses the usual topics covered in previous WG8.6 conferences, the emphasis is on the issue of open innovation and its relationships with technology transfer and diffusion in the field of information technology. This issue is deeply modifying the way that knowledge is generated, shared, transferred, diffused, and used across the world as a side effect of globalization. It affects the organizational structure, partnerships, roles assumed by stakeholders, and technology transfer and diffusion models and instruments. Industry, academia, and governments are simultaneously concerned. Although the concept applies to all industrial sectors, IT companies were early innovators. The analysis of the contents of this book allows the identification of some trends in technology transfer and diffusion issues as a part of the innovation process. The same problem is addressed in very different ways and extrapolation is not straightforward. Even innovation terminology is not clearly shared by different subcultures in the field.

Free and Open Source Enterprise Resource Planning: Systems and Strategies Sep 29 2022

Free/Open Source Enterprise Resource Planning systems (FOS-ERP) are gaining popularity and acceptance due to two main factors: their lack of licensing fees and customizability. Given this, organizations are able to easily adopt and manipulate these systems to meet their individual needs. Free and Open Source Enterprise Resource Planning: Systems and Strategies unites research on FOS-ERP, comparing differences with proprietary Enterprise Resource Planning products, and demonstrating key research factors. It includes cases demonstrating how small enterprises have benefited from FOS-ERP in Spain and in Belgium, along with difficulties encountered and solutions developed. This essential reference addresses key issues such as security and legal risks, as well as challenges, opportunities, and barriers to adoption.

IT für Existenzgründer und junge Unternehmen Apr 24 2022 Unternehmensgründer stehen vor vielfältigen Herausforderungen und zahlreiche Aufgabenbereiche sind zu strukturieren. Eine besondere Rolle nimmt dabei die Informationstechnik ein, die unabhängig von der Branche für die meisten Aufgabenbereiche in einem neu gegründeten Unternehmen - z.B. Einkauf, Produktion, Vertrieb, Verwaltung, Management - eine wichtige Unterstützungsfunktion besitzt. Dieses Buch beschreibt die Grundlagen des IT-Einsatzes sowie der Softwareeinführung und des Softwarebetriebs in Unternehmen. Es zeigt auf, wie eine Basis-IT schnell, einfach und kostengünstig aufgebaut werden kann und sich spätere Probleme bereits von vornherein minimieren lassen. Auch auf relevante Software und deren Auswahl wird eingegangen. Anhand von Beispielszenarien und Checklisten in den einzelnen Kapiteln dieses Buchs wird jeweils sichergestellt, dass kein relevanter Aspekt der IT-Nutzung und keine anstehende Entscheidung

übersehen werden. Aus dem Inhalt: • Die Rolle der IT • Strategische Ausgangsfragen • Die IT-Landschaft • Auswahl, Einführung und Betrieb von IT-Anwendungsbausteinen Das Ziel des Buchs besteht darin, die Erfolgswahrscheinlichkeit von Unternehmensgründungen durch den richtigen Einsatz von IT deutlich zu erhöhen.

ICT Management in Non-Profit Organizations Mar 24 2022 The instability of today's economic climate calls for non-profit organizations to approach social problems in new and interesting ways, and Information and Communication Technologies may serve as an answer to this call. *ICT Management in Non-Profit Organizations* aims to explore the effective and comprehensive deployment of appropriate ICT strategies within the nonprofit sector. This innovative reference work will discuss how ICT enables the non-profit sector to achieve organizational efficiency, effectiveness, and, ultimately, self sufficiency, and will provide elected and appointed policymakers, managers, and planners in governments, public agencies, and nonprofit organizations with a comprehensive strategy for creating an ICT management agenda in the non-profit sector.

Open Source ERP Systeme für KMU. Leistungsfähigkeit und Einsatz – 38 Anbieter im Vergleich Oct 31 2022 In Unternehmen aller Art und Größe spielen betriebswirtschaftliche Anwendungssysteme oder Warenwirtschaftssysteme für die Bewältigung der aufkommenden

Arbeiten eine zentrale Rolle. Für solche sogenannten ERP-Systeme (Enterprise Resource Planning Systeme) gibt es national und international eine Vielzahl an Anbietern. Eine ganz besondere Gruppe stellen die Open Source Systeme, also Systeme bei denen der Quelltext offen lesbar ist, dar. Diese besonderen Anwendungssysteme tauchen immer wieder aufgrund fehlender Lizenzkosten und absoluter Herstellerunabhängigkeit im zentralen Bewusstsein der IT-Entscheider auf. Um diesen Bereich objektiv zu durchleuchten wird in dieser Arbeit ein wissenschaftliches Konzept vorgestellt, das als Evaluationsschema die Anzahl der Systeme reduziert. Hierzu wird eine Methodik verwendet, die die Auswahl methodisch auf einige wenige Anbieter beschränkt. Insgesamt werden 85 Open Source ERP-Anbieter untersucht. Als Grundlage für die Evaluationen dienen dabei funktionale-technische und nichtfunktionale Anforderungen. Die funktional-technischen Anforderungen orientieren sich dabei an aktuellen Trends und Tendenzen moderner ERP-Systemanbieter auf Basis anderer wissenschaftlicher Ausarbeitungen und Studien. Nichtfunktionale Anforderungen dagegen werden in dieser Studie nach der gängigen ISO Norm zur Softwarequalität bestimmt. Zentraler Bestandteil der durchgeführten Evaluation ist dabei ein Anbieterverzeichnis, das im Laufe der Studie erstellt wurde. Dieses Verzeichnis enthält zusammenfassende lösungsneutrale Darstellungen und Informationen zu 38 aktuell relevanten Systemanbietern aus dem Bereich der Open Source ERP-Systeme. Demnach enthält es auch allgemeine, technische und funktionale Anforderungen und Trends. Die gewonnenen Informationen werden unter dem Aspekt der Leistungsfähigkeit und des Einsatzgebietes mit anderen wissenschaftlichen Arbeiten gegenübergestellt und verglichen. Auf diese Weise konnte ein praktischer Nutzen dieser Systeme nachgewiesen und eine

Empfehlung auf Basis entscheidender Gewichtungsfaktoren ermittelt werden.

The Executive's Guide to Information Technology Jun 22 2019 Praise for the The Executive's Guide to Information Technology "This book is important reading. It offers practical, real-world insight and pragmatic no-nonsense approaches for people who have a stake in corporate IT. " -- Lynda Applegate, Henry R. Byers Professor of Business Administration, Harvard Business School "Information systems and processes are very important parts of our due diligence assessment of a company--yet the jargon is often more difficult to understand than many foreign languages. Baschab and Piot effectively translate IT into words and concepts that businesspeople can easily understand and act upon. This book is a helpful reference guide for corporate executives and private equity groups of all types." --Neal Aronson, Managing Partner, Roark Capital Group "Business success increasingly depends on effective use of IT. Effective use of IT depends on the kind of in-depth, practical insight in this book. Baschab and Piot provide a pragmatic approach to information systems investment that should be required reading for senior executives and CIOs alike." --Erik Brynjolfsson, Schussel Professor of Management, Director of the Center for Digital Business, MIT "This book should provide valuable guidance for management and technology consultants. The Executive's Guide to Information Technology provides field-proven insight on all important aspects of IT planning and execution, from governance to applications to operations and infrastructure." --Gary J. Fernandes, former vice chairman, EDS, member of the Board of Directors, Computer Associates "Baschab and Piot do a great job of laying out the fundamental issues and challenges that every IT organization faces. More often than not, the issues are not technical in nature, but are a reflection of how the IT and

business teams work together to define, execute, and implement new business tools. The threshold issue is leadership. Often it is difficult for business leaders to feel that they have the skills and perspective to provide that leadership on technical projects. The Executive's Guide to Information Technology provides non-technical business leaders a solid framework for engaging with their IT peers." --Tom Nealon, Chief Information Officer, J.C. Penney

Kundenbeziehungsmanagement in Open-Source ERP-Systemen Sep 17 2021

Inhaltsangabe:Einleitung: In Unternehmen spielt heutzutage der elektronische Geschäftsverkehr eine immer wichtigere Rolle. Unter einem zunehmenden Wettbewerbsdruck sehen sich insbesondere die kleinen und mittleren Unternehmen (KMU). Die vorliegende Arbeit soll im Zuge des Forschungsprojektes ERP-Systeme auf Basis von Open Source Software einen Teil dazu beitragen, den Reifegrad von Open- Source-Lösungen im Bereich der

betriebswirtschaftlichen Anwendungssoftware zu ermitteln. Der Fokus liegt hierbei auf der Analyse der Funktionalität der Systeme bei der Unterstützung im Kundenbeziehungsmanagement. Kundenbeziehungsmanagement (engl. Customer Relationship Management [CRM]) versteht sich grundsätzlich als elementarer Teil einer Unternehmensstrategie, welche mittels auf den Kunden abgestimmter Marketing-, Vertriebs- und Dienstleistungskonzepte profitable Kundenbeziehungen aufzubauen und Kunden langfristig zu binden versucht. Enterprise Resource Planning (ERP) beschreibt eine Abbildung und Automatisierung von Geschäftsprozessen und Geschäftsregeln und unterstützt Unternehmen durch eine geeignete IT-Infrastruktur bei einer möglichst effizienten Allokation der zur Verfügung stehenden Ressourcen (z.B. Personal, Rohstoffe oder Kapital) in den verschiedensten betrieblichen Abläufen. Proprietäre Software hat sich im Bereich der betriebswirtschaftlichen Anwendungen überwiegend etabliert. Sie ist dadurch gekennzeichnet, dass ihre Nutzung, Weitergabe oder Modifikation lizenzrechtlich beschränkt bzw. untersagt ist. Für eine dauerhafte Nutzung sind darüber hinaus in der Regel Lizenzgebühren zu entrichten. Namhafte Anbieter wie SAP, Oracle oder Microsoft, aber auch zahlreiche kleinere Hersteller teilen den ERP-Markt weitgehend unter sich auf. Jedoch existieren bereits zahlreiche Ansätze auf Basis von Open-Source-Software (OSS), welche dem Anwender weitreichende Freiheiten gewährt. In einer von der Fraunhofer Gesellschaft veröffentlichten Studie aus dem Jahr 2005 wurde der Reifegrad unterschiedlicher Open-Source-Softwareprodukte anhand bestimmter Qualitätsmerkmale (u.a. Funktionalität, Benutzerfreundlichkeit, Zuverlässigkeit, Leistungsfähigkeit und Support) untersucht. In allen Punkten konnte zwar besonders Open Source Betriebs-, Content-

Management- und Entwicklungssystemen eine hohe Reife attestiert werden, allerdings schlossen ERP- sowie CRM-Systeme weitgehend unterdurchschnittlich ab: Open Source Software hat in diesem Bereich derzeit noch nicht die funktionale [...]

Enterprise Resource Planning for Global Economies: Managerial Issues and Challenges Feb 08 2021 Local functional systems that create inefficient islands of information are being replaced by expensive enterprise-wide applications that unify the functional areas; however, while we have not yet been able to completely and seamlessly integrate across functions, we find that the new islands of information are no longer functional but political, cultural, linguistic, and geographical. The global village is a reality and enterprise resource planning (ERP) implementations face new issues and challenges. *Enterprise Resource Planning for Global Economies: Managerial Issues and Challenges* provides authoritative research on the theoretical frameworks and pragmatic discussions on global implementations of information systems, particularly ERP systems. This book offers professionals, managers, and researchers, who want to improve their understanding of the issues and challenges that arise when information systems cross national boundaries, with an authoritative, essential research resource.

Wikimanagement Jan 28 2020 Wie schaffen es hunderttausende Menschen in ihrer Freizeit eine Enzyklopädie zu erstellen, die in der Qualität der seit Jahrhunderten renommierten Brockhaus-Enzyklopädie in nichts nachsteht und in der Quantität weit übertrifft? Warum veröffentlichen Millionen von Internetnutzern ihre Urlaubsbilder und Videos aus dem privaten Leben im Netz? Wieso funktioniert die Informationsversorgung durch Touristen und Privatleute oftmals besser als die Berichterstattung der großen Agenturen? Und warum versprechen sich Unternehmen wie

Google oder die Holtzbrinck Gruppe so viel von derartigen Plattformen, dass deren Gründer über Nacht zu Millionären werden? Wikimanagement gibt nicht nur einen ausführlichen Überblick über die aktuelle Welt des Web 2.0, sondern stellt auch die Funktionsweise der Wikipedia und anderer Social Software-Systeme den wichtigsten organisationstheoretischen Ansätzen gegenüber. In Anwendungsfeldern wie Innovation, Projektmanagement, Marketing und vielen anderen wird deutlich gemacht, wie Unternehmen von Social Software-Technologie und -Philosophie lernen und profitieren können. Agile Processes in Software Engineering and Extreme Programming Dec 21 2021 This book contains the refereed proceedings of the 15th International Conference on Agile Software Development, XP 2014, held in Rome, Italy, in May 2014. Because of the wide application of agile approaches in industry, the need for collaboration between academics and practitioners has increased in order to develop the body of knowledge available to support managers, system engineers, and software engineers in their managerial/economic and architectural/project/technical decisions. Year after year, the XP conference has facilitated such improvements and provided evidence on the advantages of agile methodologies by examining the latest theories, practical applications, and implications of agile and lean methods. The 15 full papers, seven short papers, and four experience reports accepted for XP 2014 were selected from 59 submissions and are organized in sections on: agile development, agile challenges and contracting, lessons learned and agile maturity, how to evolve software engineering teaching,

methods and metrics, and lean development.

Free and Open Source Software in Modern Data Science and Business Intelligence: Emerging Research and Opportunities Mar 31 2020 Computer software and technologies are advancing at an amazing rate. The accessibility of these software sources allows for a wider power among common users as well as rapid advancement in program development and operating information. *Free and Open Source Software in Modern Data Science and Business Intelligence: Emerging Research and Opportunities* is a critical scholarly resource that examines the differences between the two types of software, integral in the FOSS movement, and their effect on the distribution and use of software. Featuring coverage on a wide range of topics, such as FOSS Ecology, graph mining, and project tasks, this book is geared towards academicians, researchers, and students interested in current research on the growing importance of FOSS and its expanding reach in IT infrastructure.

Open Source Technology: Concepts, Methodologies, Tools, and Applications May 02 2020 The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information, art, and ideas. Now, instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. *Open Source Technology: Concepts, Methodologies, Tools, and Applications* investigates examples and methodologies in user-generated and freely-accessible content available through electronic and online media. With applications in education, government, entertainment, and more, the technologies explored in these volumes will provide a comprehensive reference for web

designers, software developers, and practitioners in a wide variety of fields and disciplines. The Software Industry Sep 05 2020 Whether ERP software, office applications, open-source products or online games: In terms of its economic characteristics, software differs fundamentally from industrial goods or services. Based on the economic principles and rules of the software industry, the book reveals strategies and business models to software vendors that comprise cooperation, distribution, pricing and production and industrialization strategies, as well as software as a service and platform concepts. Further aspects including the outsourcing behavior of software vendors and users; providing business software as open source software; selecting software; and the value chains in the software industry are also addressed. Based on a number of expert meetings, it contains numerous case studies and new empirical findings. Target audience of the book are professionals and executives from the software, consulting and IT branches as well as students and scholars of business administration, computer science, business and industrial engineering.

Open Source Systems Jan 10 2021 This open access book constitutes the refereed proceedings of the 15th IFIP WG 2.13 International Conference on Open Source Systems, OSS 2019, held in Montreal, Quebec, Canada, in May 2019. The 10 revised full papers and 5 short papers presented were carefully reviewed and selected from 35 submissions. The papers cover a wide range of topics in the field of free/libre open source software (FLOSS) and are organized in the following thematic sections: mining OSS data; organizational aspects of FLOSS projects; FLOSS adoption; FLOSS cost and licenses; and FLOSS education and training.
