Neuroimaging Nov 28 2021 Neuroimaging, Part One, a text from The Handbook of Clinical Neurology illustrates how neuroimaging is rapidly expanding its reach and applications in clinical neurology. It is an ideal resource for anyone interested in the study of the nervous system, and is useful to both beginners in various related fields and to specialists who want to update or refresh their knowledge base on neuroimaging. This first volume specifically covers a description of imaging techniques used in the adult brain, aiming to bring a comprehensive view of the field of neuroimaging to a varying audience. It brings broad coverage of the topic using many color images to illustrate key points. Contributions from leading global experts are collated, providing the broadest view of neuroimaging as it currently stands. For a number of neurological disorders, imaging is not only critical for diagnosis, but also for monitoring the effect of therapies, and the entire field is moving from curing diseases to preventing them. Most of the information contained in this volume reflects the newness of this approach, pointing to this new horizon in the study of neurological disorders. Provides a relevant description of the technologies used in neuroimaging, including computed tomography (CT), magnetic resonance imaging (MRI), positron emission tomography (PET), and several others. Ideal resource for anyone studying the nervous system, from beginners to specialists interested in recent advances in neuroimaging of the adult brain. Discusses the application of imaging techniques to the study of brain and spinal cord disease and its use in various syndromes. Contains vibrant, colorful images to illustrate key points. *New York Jurisprudence 2d* Mar 21 2021

Development of New Pavement Design Equivalent Single Axle Load (ESAL) Mar 09 2020 For a given road segment, accurate estimates of current and projected traffic [in terms of Equivalent Single Axle Loads (ESALs)] can result in significant cost savings, either from the standpoint of initial construction cost or future maintenance and rehabilitation cost. The primary objective of this project is to prepare a new ESAL design table for Arizona's highway network. This new table is based on analysis of current traffic data collection procedures, traffic forecasting methodology, and ESAL development procedures, including the assignment of traffic ESAL levels to the various highway segments.

Computer Vision – ECCV 2018 Jul 25 2021 The sixteen-volume set comprising the LNCS volumes 11205-11220 constitutes the refereed proceedings of the 15th European Conference on Computer Vision, ECCV 2018, held in Munich, Germany, in September 2018. The 776 revised papers presented were carefully reviewed and selected from 2439 submissions. The papers are organized in topical sections on learning for vision; computational photography; human analysis; human sensing; stereo and reconstruction; optimization; matching and recognition; video attention; and poster sessions.

Challenging the Monolingual Mindset Feb 06 2020 This volume illustrates the distinctive and interconnected use of languages in increasingly diversified communities, examining a range of multilingual contexts, including post-migration settlement, language policy, education, language contact and intercultural communication. With contributions from researchers in Australia, Europe and Asia, the book discusses the opportunities and tensions that can emerge when societies attempt to manage and understand multilingual communication within and across communities. Reflecting the ideas of Professor Michael Clyne, the volume makes clear how ongoing research across a broad range of topics can assist in challenging the monolingual mindset by bringing to the attention of readers the rich linguistic diversity, as well as linguistic potential, of our communities around the world.

Legal Services Commission Annual Report and Accounts 2011-12 Apr 02 2022 While good governance is a worthy goal by itself, this book argues that it is not a prerequisite for economic growth or development. Challenging the conventional good governance paradigm favored by the donor community, this book exposes the methodological shortcomings of the commonly-used governance indicators developed within the World Bank. It argues that aggregate good governance indicators are less helpful for identifying governance failure in specific areas needing policy interventions. Bringing together contributions from leading political scientists, political economists and development practitioners, this is the first book that focuses on such good governance issues.

Principles of Financial Regulation Jul 13 2020 The financial crisis of 2007-9 revealed serious failings in the regulation of financial institutions and markets, and prompted a fundamental reconsideration of the design of financial regulation. As the financial system has become ever-more complex and interconnected, the pace of evolution continues to accelerate. It is now clear that regulation must focus on the financial system as a whole, but this poses significant challenges for regulators. Principles of Financial Regulation describes how to address those challenges. Examining the subject from a holistic and multidisciplinary perspective, Principles of Financial Regulation considers the underlying policies and the objectives of regulation by drawing on economics, finance, and law methodologies. The volume examines regulation in a purposive and dynamic way by framing the book in terms of what the financial system does, rather than what financial regulation is. By analysing specific regulatory measures, the book provides readers to the opportunity to assess regulatory choices on specific policy issues and encourages critical reflection on the design of regulation.

Harvard Law Review Dec 18 2020 The Harvard Law Review is offered in a digital edition, featuring active Contents, linked notes, and proper ebook formatting. The contents of Issue 3, January 2013, include: • Article, "Politicians as Fiduciaries," by D. Theodore Rave • Book Review, "Is Copyright Reform Possible?" by Pamela Samuelson • Note, "The SEC Is Not an Independent Agency" In addition, student research explores Recent Cases on the Fourth Amendment implications of "pinging" a GPS signal on a cellphone, the First Amendment and mandatory tobacco graphic warnings, the First Amendment and police impersonation statutes, whether software method claims are patent ineligible, and other research.

The Commonwealth Yearbook 2013 Nov 04 2019 The Commonwealth Yearbook is the flagship annual publication of the Commonwealth Secretariat. It is the essential reference guide to the countries, organizations, activities and values of the modern Commonwealth. The 2013 edition has been fully updated and includes: • Analysis from leading commentators as the Commonwealth approaches 2015 and new global goals on development • The Commonwealth in Action - a review of the Commonwealth's work in democracy, development and diversity • Details of the Charter of the Commonwealth, signed by Her Majesty the Queen on Commonwealth Day 2013 • Essential communiqués and declarations forming the background to the Charter • The history, structure and activities of the Commonwealth Secretariat and other leading organizations • A guide to Commonwealth Heads of Government Meetings and other key summits • Comprehensive profiles of 54 member states including overseas territories • A directory of around 80 Commonwealth intergovernmental, cultural and professional organizations • An extensive statistics and reference section Published by Nexus Strategic Partnerships for the Commonwealth Secretariat

Foundational African Writers Feb 17 2021 The essays in this collection were written in celebration of the centenaries, in 2019, of Peter Abrahams, Noni Jabavu, Sibusiso Cyril Lincoln Nyembezi and Es'kia Mphahlele, all of whom were born in 1919. All four centenarians lived rich and diverse lives across several continents. In the years following the Second World War they produced more than half a century of foundational creative writing and literary criticism, and made stellar contributions to the founding and enhancement of institutions and repertoires of African and black arts and letters in South Africa and internationally. As a result, their lifeworlds and oeuvres present sharp and multifaceted engagements with and generative insights into a wide range of issues, including precolonial existence, colonialism, empire, race, culture, identity, class, the language question, tradition, modernity, exile, Pan-Africanism, and decolonisation.

Deep Learning: Fundamentals, Theory and Applications Dec 30 2021 The purpose of this edited volume is to provide a comprehensive overview on the fundamentals of deep learning, introduce the widely-used learning architectures and algorithms, present its latest theoretical progress, discuss the most popular deep learning platforms and data sets, and describe how many deep learning methodologies have brought great breakthroughs in various applications of text, image, video, speech and audio processing. Deep learning (DL) has been widely considered as the next generation of machine learning methodology. DL attracts much attention and also achieves great success in pattern recognition, computer vision, data mining, and knowledge discovery due to its great capability in learning high-level abstract features from vast amount of data. This new book will not only attempt to provide a general roadmap or guidance to the current deep learning methodologies, but also present the challenges and envision new perspectives which may lead to further breakthroughs in this field. This book will serve as a useful reference for senior (undergraduate or graduate) students in computer science, statistics, electrical engineering, as well as others interested in studying or exploring the potential of exploiting deep learning algorithms. It will also be of special interest to researchers in the area of AI, pattern recognition, machine learning and related areas, alongside engineers interested in applying deep learning models in existing or new practical applications.

Cumulative Author Index for Poole's Index to Periodical Literature, 1802-1906 Jul 01 2019

Is Reality Secular? Aug 06 2022 What is the nature of reality? What does it mean to be human? And how do we account for ethics and morality? Mary Poplin examines naturalism, humanism, pantheism and Judeo-Christian theism and explores the fundamental assumptions and limitations of each perspective.

The spatiotemporal dynamics of longevity-defining cellular processes and its modulation by genetic, dietary and pharmacological anti-aging interventions Aug 26 2021 Aging of multicellular and unicellular eukaryotic organisms is a highly complex biological phenomenon that affects a plethora of processes within cells. This wide array of longevity-defining cellular processes - which are governed by an evolutionarily conserved signaling network - includes oxidative metabolism and protein synthesis in mitochondria, lipid and carbohydrate metabolism, NAD+ homeostasis, amino acid biosynthesis and degradation, ammonium and amino acid uptake, ribosome biogenesis and translation, proteasomal protein degradation, nuclear DNA replication, chromatin assembly and maintenance, actin organization, apoptosis, necrosis, autophagy, protein folding, stress

response, signal transduction, cell cycle, and cell growth. The focus of this *Frontiers Special Topic Issue* is on an important conceptual advance in our understanding of how cells integrate and control these numerous processes and how genetic, dietary and pharmacological anti-aging interventions extend longevity by altering their functional states and spatiotemporal dynamics. The Issue will highlight the various strategies used by evolutionarily diverse organisms for coordinating these longevity-defining cellular processes in space and time, critically evaluate the molecular and cellular mechanisms underlying such coordination, and outline the most important unanswered questions and directions for future research in this vibrant and rapidly evolving field.

Annual Report May 11 2020

FASNY Fire Service Laws of the State of New York 2022 Edition Apr 09 2020 Produced in cooperation with the Firemen's Association of the State of New York, this all-in-one reference guide combines Fire and Emergency Services related Statutes, Rules, and Regulations. Fire Service Laws of the State of New York gathers a diverse and wide-ranging area of law covering penal law, environmental conservation, municipal law, insurance law, and much more. A typically arranged index allows you to find the law you need in seconds.

Beyond the Code Sep 26 2021 Although the law on infringement is relatively straightforward in relation to the copying of literal and textual elements of software, it is the copying of non-literal and functional elements that poses complex and topical questions in the context of intellectual property (IP) protection. In many cases, it is these non-literal and functional elements that contain the real value of a software product. This book concerns the copying of non-literal and functional elements of software in both the United States and European Union, using a holistic approach to address the most topical questions facing experts concerned with legal protection of software products across a range of technological platforms. The book focuses on six distinct but interrelated areas: contract, copyright, patents, trade-dress, designs and trade secrets, discussing these areas separately and in relation to one another. The book discusses software as a multilayered functional product, setting the scene for other legal discussions by highlighting software's unique characteristics. It examines models for the provision of software, addressing licensing patterns and overall enforceability, as well as the statutory and judicial tools for regulating the use of such licences. It assesses the protection of non-literal and functional software elements under EU and US laws, focusing on internal architecture, interfaces, behavioural elements and GUIs.

The Social History of Crime and Punishment in America: A-De May 03 2022 This comprehensive and authoritative four-volume work surveys the history and philosophy of crime, punishment, and criminal justice institutions in America from colonial times to the present.

Yeasts in Biotechnology and Human Health Jun 04 2022 This book discusses genome-based strategies to provide a holistic understanding of yeasts in Human Health and as model organisms in basic research or industrial production. Using numerous *Saccharomyces cerevisiae* strains and various non-conventional yeast species isolated from diverse origins, it describes essential biological processes, the biotechnological exploitation of yeast and pathogenesis control. It also demonstrates how functional and comparative genomics and the development of genome engineering tools are used in modern yeast research. The use of yeasts as experimental eukaryotic models increasingly gained prominence when several Nobel Prizes in Physiology/Medicine and Chemistry were awarded for innovative research, using yeast strains to elucidate molecular mechanisms in a wide range of human physiological processes and diseases, such as autophagy, cell cycle regulation and telomerase activity. This book offers useful insights for scientists in yeast research, clinical scientists working with yeast infectious models and for industrial researchers using applied microbiology.

Bielefelder Katalog Klassik Oct 04 2019

Analytical Techniques in the Pharmaceutical Sciences Dec 06 2019 The aim of this book is to present a range of analytical methods that can be used in formulation design and development and focus on how these systems can be applied to understand formulation components and the dosage form these build. To effectively design and exploit drug delivery systems, the underlying characteristic of a dosage form must be understood—from the characteristics of the individual formulation components, to how they act and interact within the formulation, and finally, to how this formulation responds in different biological environments. To achieve this, there is a wide range of analytical techniques that can be adopted to understand and elucidate the mechanics of drug delivery and drug formulation. Such methods include e.g. spectroscopic analysis, diffractometric analysis, thermal investigations, surface analytical techniques, particle size analysis, rheological techniques, methods to characterize drug stability and release, and biological analysis in appropriate cell and animal models. Whilst each of these methods can encompass a full research area in their own right, formulation scientists must be able to effectively apply these methods to the delivery system they are considering. The information in this book is designed to support researchers in their ability to fully characterize and analyze a range of delivery systems, using an appropriate selection of analytical techniques. Due to its consideration of regulatory approval, this book will also be suitable for industrial researchers both at early stage up to pre-clinical research.

Romania Mar 01 2022 As an European Union (EU) Member State, Romania is subject and aligned to the EU common regulatory framework for banking supervision. The EU regulatory framework for banking supervision has been subject to significant changes since the 2008 global financial crisis and the subsequent sovereign debt crisis. The adoption of the Capital Requirements Regulation and the Capital Requirements Directive IV (CRR/CRD IV) which forms the Single Rule Book was an important step towards stronger prudential regulation. Given that a large part of Romania's banking system is owned by Eurozone banks, the Single Supervisory Mechanism (SSM), as the home supervisor for Eurozone banks, is a key partner of the National Bank of Romania (NBR). Prudential regulations of the NBR are broadly aligned to the requirements of the Basel Core Principles (BCP). As of 2017, the NBR has identified 11 banks as systematically important, of which 8 are supervised at group level by the SSM.

PRICAI 2021: Trends in Artificial Intelligence Jun 23 2021 This three-volume set, LNAI 13031, LNAI 13032, and LNAI 13033 constitutes the thoroughly refereed proceedings of the 18th Pacific Rim Conference on Artificial Intelligence, PRICAI 2021, held in Hanoi, Vietnam, in November 2021. The 93 full papers and 28 short papers presented in these volumes were carefully reviewed and selected from 382 submissions. PRICAI covers a wide range of topics in the areas of social and economic importance for countries in the Pacific Rim: artificial intelligence, machine learning, natural language processing, knowledge representation and reasoning, planning and scheduling, computer vision, distributed artificial intelligence, search methodologies, etc. Part I includes the following topical headings: AI Foundations / Decision Theory, Applications of AI, Data Mining and Knowledge Discovery, Evolutionary Computation / Optimisation, Knowledge Representation and Reasoning.

Noah's Ravens Jul 05 2022 How can the tracks of dinosaurs best be interpreted and used to reconstruct them? In many Mesozoic sedimentary rock formations, fossilized footprints of bipedal, three-toed (tridactyl) dinosaurs are preserved in huge numbers, often with few or no skeletons. Such tracks sometimes provide the only clues to the former presence of dinosaurs, but their interpretation can be challenging: How different in size and shape can footprints be and yet have been made by the same kind of dinosaur? How similar can they be and yet have been made by different kinds of dinosaurs? To what extent can tridactyl dinosaur footprints serve as proxies for the biodiversity of their makers? Profusely illustrated and meticulously researched, *Noah's Ravens* quantitatively explores a variety of approaches to interpreting the tracks, carefully examining within-species and across-species variability in foot and footprint shape in nonavian dinosaurs and their close living relatives. The results help decipher one of the world's most important assemblages of fossil dinosaur tracks, found in sedimentary rocks deposited in ancient rift valleys of eastern North America. Those often beautifully preserved tracks were among the first studied by paleontologists, and they were initially interpreted as having been made by big birds—one of which was jokingly identified as Noah's legendary raven.

Patents Oct 16 2020 The patent system is criticized today by some practitioners and economists. In fact, there is a partial disconnection between patent demographics and productivity gains, but also the development of actors who do not innovate and who develop business models that their detractors equate with a capture of annuities or a dangerous commodification of patents. This book provides a less Manichaean view of the position of patents in the system of contemporary innovation. It first recalls that these criticisms are not new, before arguing that if these criticisms have been revived, it is because of a partial shift from an integrated innovation system to a much more fragmented and open system. This shift accompanied the promotion of a more competitive economy. The authors show that this movement is coherent with a more intensive use of patents, but also one that is more focused on their signal function than on their function of direct monetary incentive to innovation.

Delivering High Performance Jan 31 2022 Douglas Long is the author of *Third Generation Leadership* and the *Locus of Control* which focused on the new understanding of what influences individuals' values, world views and the behaviours needed to facilitate leadership fit for the future. Here, in *Delivering High Performance*, he concentrates on individual, unit and organisational performance when an organisation is using a *Third Generation Leadership* approach. Leaders constantly seek high performance and high levels of staff engagement; but achieving either depends on the competence and commitment of individuals or groups. The relationships between these factors are complex. Many people are competent to do things - they have the ability - but are not prepared to do them. They lack the willingness, confidence or motivation and the readiness to perform. You can even have the most committed and capable people in the world, yet still miss performance targets if there are issues with other factors impacting on performance. This book is a response to enquiries from those excited by the prospect of a *Third Generation Leadership* approach but who still have to grapple with performance issues - people who want to obtain and maintain high performing organisations. In that sense it builds on the new knowledge imparted in *Third Generation Leadership* and the *Locus of Control*. It is a 'How to ...' book that gives the reader practical tools that can be immediately applied and activities that can be undertaken in order to develop and maintain the required or even the desired level of performance.

County Lines Apr 21 2021 Described by the National Crime Agency as a 'significant threat', county lines involve gangs recruiting vulnerable youth to sell drugs in provincial areas. This phenomenon has impacted local drug markets, increasing criminal activity and violence. Exploring how county lines evolve, Harding reveals extensive criminal exploitation and control in the daily 'grind' to sell drugs. Drawing upon extensive interviews and case studies, this timely book gives voice to users and dealers, providing an in-depth analysis of techniques, relationships and 'trapping'. With county lines now a critical issue for policing and government, this is an invaluable contribution to literature on gangs, youth violence and drugs.

Water Bankruptcy in the Land of Plenty Jan 19 2021 As the American Southwest faces its deepest drought in history, this book explores the provocative notion of “water bankruptcy” with a view towards emphasizing the diversity and complexity of water issues in this region. It bridges between the narratives of growth and the strategies or policies adopted to pursue competing agendas and circumvent the inevitable. A window of opportunity provided by this current long-term drought may be used to induce change by dealing with threats that derive from imbalances between growth patterns and available resources, the primary cause of scarcity. A first of its kind, this book was developed through close collaboration of a broad range of natural scientists, social scientists, and resource managers from Europe and United States. It constitutes a collective elaboration of a transdisciplinary approach to unveiling the inner workings of how water was fought for, allocated and used in the American Southwest, with a focus on Arizona. Specifically, it offers an innovative scientific perspective that produces a critical diagnostic evaluation of water management, with a particular view to identifying risks for the Tucson region that is facing continuous urban sprawl and economic growth. The book offers a diversity of complementary perspectives, including a statement of natural resources, biodiversity and their management, an analysis of water policy and its history, and a statement of ecosystem services in the context of both local biodiversity and also the economic activities that sustain economic growth. Finally, it presents a concerted effort to explore the interplay between a variety of related scientific disciplines and frameworks including climatology, hydrology, water management, ecosystem services, societal metabolism, political economy and social science.

The Asian Turn in Foreign Investment Aug 14 2020 Critically discusses the increasing significance of Asian States in the field of international investment law and policy. Contains analyses of national investment law rule-making in Asia, contributions of Asian States on cutting-edge developments to the global community, and contemplates future possibilities for investor-State dispute settlement.
